Update From Our Editor

No sooner did I announce in this column, in the last issue of The SPECTRUM, that we would soon be accepting advertising, than several of you out there in readerland quickly contacted us about exploiting that possibility. On page 47 there is an outline of the rates and procedures for those of you who may be interested in such a venture.

It has taken some time and thought to arrive at reasonable advertising rates for a publication of our unusual profile and scope. We are told that most all of our readers save their issues of this paper, like a growing reference library, and many also share their paper with quite a few other sets of eyes.

Call our offices if you have any questions and someone from our new Ad Department will assist you as promptly as they can. And while I'm on the subject of phones: Please be thoughtful and use our toll-free number ONLY for the expedient conducting of business matters. Our monthly phone bill is not a very pretty sight!

The offering of classified ads (in addition to the more usual kinds of ad presentations) provides an avenue to solve a longstanding problem for some of you. We often get requests from people: "Can you please tell me if there is some other reader(s) in my geographic area with whom I might talk or socialize?" The answer has always had to be "No" for basic privacy reasons. We wish we could, but it becomes a legal and logistics nightmare pretty fast. But now there is nothing stopping any of YOU from placing such a request in a classified ad.

Since our Editorial Board will always retain the right to refuse any advertisement request which is considered inappropriate, we expect to maintain our usual high standards of quality and information service in the process of generating some much needed cash flow.

And speaking of cash flow, note that subscription rates have been increased slightly to help cover a bit more of the actual costs of printing and postage for a publication of this size and scope.

I have often commented that an Unseen Hand seems to Guide the coming together of each issue of this newspaper. Let's be honest here: We're not THAT smart to achieve this unique end result on our own, nor are we very flush with resources to be able to coordinate such an effort. But it happens anyway.

This issue of The SPECTRUM is no exception, beginning with our provocative Front Page story concerning the Indigo Children. In some ways I feel we have only managed to address the very tip of the iceberg where this important subject is concerned, though the articles on Ritalin, on MSG, and on Vaccinations contribute and connect in such a

way as to give some hint of what sinister shenanigans lie hidden beneath the surface.

We will be focusing on several of these topics in upcoming papers and, where our children are concerned, there can never be too much information presented which may help in creating a better world for them—rather than the deplorable world that the crooks in high places have planned for all of us under their New World Order agenda.

As Commander Hatonn comments in his multi-faceted message, the dark ones must work feverishly at this time since so many of us are awakening and questioning the status quo that their illusion "house of cards" is about to collapse and disintegrate in the Light of ever growing awareness. It doesn't take that many awakening ones to throw a large wrench into their flimsy machinery, and that awareness is the biggest fear being wrestled with by these so-called "elite" controllers—and their other-dimensional puppet-masters who truly pull the strings and use these dark "elite" dupes.

While the prices of oil and gasoline, for example, are kept artificially high right now, for reasons of a global political agenda, how much longer will these crooks in high places be able to suppress the kinds of "free energy" technologies such as we address in our feature article on Cold Fusion? Once THAT cat is out of the bag, you won't be able to GIVE away the "black soup" from those old, greasy dinosaur remains. And that couldn't happen a moment too soon from the point of view of fresh air and water supplies critical to sustaining ALL life on the surface of patient and longsuffering Mother Earth. Why should our children have to endure such a filthy mess for the sake of the greed of a callous few?

And speaking of greed, don't miss Ray Bilger's outline of the stirrings for independence by our Native American brothers and sisters. That's another "house of cards" which is about to collapse. His article this month, while challenging in itself, sets the stage for a unique interview that will hopefully appear in our next issue on this most heart-wrenching and volatile of topics.

Meanwhile, we have been receiving some much appreciated praise as a result of both a recent expo in Northern California (at which we had a booth and met many fine people), and due to an invitation (originating from that expo) to appear on a popular cable-TV program with an additional wide (international) tape distribution audience. There will be more to say about these blessings at a later time.

For now, check out our masterfully renovated website and KNOW that your many prayers and good wishes (and financial assistance) on our behalf are working! Amen.

—Dr. Edwin M. Young, Editor-In-Chief

SILVER HELPS REGROW
HUMAN TISSUE

From the INTERNET, <para-discuss@tje.net>, 2/11/00: [quoting]

“It is only from a truth-filled state of consciousness, the willingness to speak the truth and know the truth, that we can build a firm, lasting, and truly loving relationship with ourselves and others. Anything less than this is not love. It is fear.” —Iyanla Vanzant

From: “earthman” <hardJube@ihug.co.nz>
Reply to: <adventuresunlimited@onelist.com>

Silver Helps Regrow Human Tissue—Physician Patents Technique Using Silver Ions; July 27, 1999.

Washington, D.C.—Silver, the same commodity used in coins and in the manufacture of jewelry, silverware, mirrors, and electronics, helps regenerate human cells that have been destroyed by disease or damaged in accidents, according to a recently released report in this month’s edition of *Silver News*, a bi-monthly newsletter published by The Silver Institute.

Clinical tests indicate that the silver-based procedure is so successful that one patient who had sustained three crushed fingers in an accident grew new tissue rapidly. Within 2-1/2 months, skin coverage was complete and there was normal full sensation, good blood supply, and all joints had a normal range of motion. If left untreated, the 30-year-old electrician’s fingers would have fallen off after turning black from gangrene, and he would have been left with a totally useless hand. Ironically, his orthopedic surgeon recommended amputation of all three fingers, but the patient requested silver-ion therapy, which proved successful.

The mechanism by which silver ions help rebuild tissue has been studied for more than a decade by Dr. Robert Becker of Becker Biomagnetics in New York.

Dr. Becker initially reported his findings at The First International Conference On Silver And Gold In Medicine, co-sponsored by The Silver Institute in 1987. In the decade since, this technique has been used in clinical settings where hundreds of patients with various wounds have recovered. In addition, a laboratory study conducted by the U.S. Army Institute for Surgical Research in Houston, Texas, showed that laboratory animals with burn wounds, treated under controlled conditions, experienced shortened time for reconstruction with silver-nylon dressings.

Recovery of skin function was faster when electric current was applied, compared to no application of electric current. Last fall, Dr. Becker received a U.S. patent (5,814,094) for the devices, materials, and techniques involved in regeneration of tissue using silver ions.

After several hundred cases, Dr. Becker believes that the technique works in three stages. The first stage is the chemical combination of highly active free silver ions with all bacteria or fungi present in the wound which are inactivated within 20 to 30 minutes. The second stage occurs over the next few days. Silver acts on fibroblast cells to cause them to revert to their embryonic state, becoming stem cells. These cells are universal building blocks whose role is to reconstruct new tissue. In the final stage, silver ions form a complex with the living cells in the wound area to produce immediately convertible stem cells. The end result of this conversion is that the stem cells supply all the building blocks necessary to completely restore all anatomical structures.

No other known treatment provides sufficient numbers of the embryonic or stem cells required for true regeneration of damaged or destroyed tissues in humans and animals. The success indicates that there is the potential not only for the healing of near-surface wounds, but for regenerative repair of internal organs such as the heart, liver, brain, and the spinal cord. [End quoting]

This sounds like a very big breakthrough that is important to be brought to public attention. This may be what Christopher Reeves has been looking for as a breakthrough for the healing of his spinal cord.

If you haven’t read last month’s special feature article on silver colloids, be sure and do so. Back issues are available.

I am preparing an article for next month that will include information by Dr. Bob Beck, who also provides useful instructions on silver colloids and the use of electro-pulsing techniques.

DIET COKE: A PLAGUE
OF 92 SYMPTOMS

From the INTERNET, <para-discuss@tje.net>, 2/23/00: [quoting] *Illusions Digest*, Vol. 1 #437.

Remember, in a study on 7 monkeys, 5 had grand mal seizures and one died, a casualty rate of 86%. Nice! Temporal lobe epilepsy is just a nice form of the grand mal. — Anna

RE: Diet Coke: a plague of 92 symptoms

(Ramsey, William)

To: illusions@beyond-the-illusion.com
Subject: [illusions] Diet Coke: a plague of 92 symptoms

FOR IMMEDIATE RELEASE—Please Distribute Widely

CRUMPLED COKE CAN

The photo of a crumpled can of Diet Coke told the story in the *Atlanta Journal Constitution*, Coke’s hometown paper. Fitting, poetic, just, but tragic for the company once rated “The most admired business in the world”.

Today Coke wouldn’t even make the list. Sales are down, profits collapsing, and 6,000 employees soon will be gone.

(To make room for 6,000 defense attorneys?) The tragedy is stupendously larger than 6,000 jobs; it affects hundreds of millions of unwarned, innocent, afflicted consumers across the broad face of planet Earth.

This crisis can’t be solved by belt tightening, greater efficiency, more advertising, etc. It’s so bad Coke can’t say the word; to pronounce it will bring instant cataclysm.

That word is ASPARTAME, and their only recourse is denial, denial, denial, though every ad and commercial builds higher the scaffold upon which Coke shall surely hang.

Reality is in that twisted Diet Coke can.

It’s poison. It’s killing the unborn, raining tumors and seizures on the population, destroying children, incapacitating workers, mimicking MS, erasing memory and blinding.

Inexorably Diet Coke visits a plague of 92 symptoms listed by our FDA on a secret report they’ll never show which names diet soda as the first source of aspartame disease. And yes, DEATH was one of the 92.

Diet Coke is poison. And it’s addictive; some victims drink several liters a day and keep it on their nightstands. If Coke changes the formula to remove aspartame, the world will heal and the surge of hatred and vengeance by the disabled and bereaved shall certainly destroy Coca Cola.

The poison in Diet Coke is aspartame. As a member of the National Soft Drink Association, Coke opposed FDA approval of aspartame for beverages.

Their objections, running to several pages and published in the *Congressional Record* of 5/7/85, said aspartame is uniquely and inherently unstable and breaks down in the can.

It decomposes into formaldehyde, methyl alcohol, formic acid, diketopiperazine, and other toxins.

In a study on 7 monkeys, 5 had grand mal seizures and one died, a casualty rate of 86%.

Coke knew; and knowing, broke their good faith contract with customers, a breach exhibited by the recent plot to program vending machines to raise the price with the

temperature.

Dissatisfied with selling flavored sugar water plus phosphoric acid, they switched to pushing an addictive formula called "Diet".

Addictive substances multiply markets, so Diet Coke soared off the sales charts, spreading obesity in its flight. We're fatter because aspartame suppresses serotonin and makes us crave carbohydrates.

So why is aspartame/NutraSweet/Equal/Diet Coke/Diet Pepsi/etc. on the market and in thousands of foods? Can you say CORRUPTION? One FDA Commissioner and one acting Commissioner have changed sides to work in the NutraSweet industry, plus 6 underlings and two federal attorneys assigned to prosecute NutraSweet for submitting fraudulent tests to get it approved.

"It's like a script for Abbott & Costello" lamented an honest FDA scientist writing to Senator Metzenbaum.

It works like this: "Approve our poison, and when you stop being a bureaucrat, we'll make you a plutocrat! After it's licensed, we'll pay off the American Dietetics, the American Diabetes Association, the AMA, and anyone we need who's for sale."

The jig's up! Worldwide consumer action has exposed aspartame, and millions have kicked the habit. Coke's profits are down 37%, and for a year Monsanto has been trying to sell the NutraSweet company.

Finally they sold NSC, producer of the phenylalanine in NutraSweet for \$125 million. Now Monsanto faces a \$71 million lawsuit for exaggerating profits.

Monsanto stock is in the toilet, but they may have found a buyer in the Swiss firm Pharmacia-Upjohn. P.U. for short! The deal won't finalize for a year.

The plans are to ditch the Monsanto name as its stench is unendurable.

CEO Bob Shapiro may soon be history, like Doug Ivester of Coke who just resigned. Will the last one out please turn off the lights! [End quoting]

The public is finally awakening—and not a moment too soon! And for an encore:

MONSANTO ANNOUNCES
SALE OF TABLETOP
SWEETENER BUSINESS

From the INTERNET, <http://sightings.com>, 2/4/00: [quoting]

Monsanto announced February 4 the signing of a definitive agreement related to the sale of our tabletop sweetener business, including the Equal, Canderel and NutraSweet tabletop brands, to Tabletop Acquisition Corp. (TAC), whose institutional investors are led by Pegasus Capital Advisors, L.P. and MSD Capital, L.P. Under terms of the agreement, TAC will pay \$570 million cash for the business.

All tabletop sweetener people will be offered employment by the new owners. The tabletop-sweetener management team will remain in place following completion of the transaction.

The divestiture of the tabletop business is part of a restructuring plan announced by Monsanto that includes selling businesses that are not core to our long-term strategy.

"TAC is acquiring a solid, established business with highly recognizable brands, a sound customer base, and a quality, experienced management team" said Gary Crittenden, Monsanto's chief financial officer. "As we stated last year, the tabletop sweetener business, as well as the sweetener ingredients and biogums businesses, are excellent revenue-generating businesses that are not in line with Monsanto's strategic direction. We're pleased that TAC is investing in the tabletop sweetener business and intends to further enhance its competitive position in the marketplace."

Monsanto Today is an email newsletter published on Tuesdays and Thursdays for Monsanto people. Please contact Corporate Communications (314/694-5291) for help or information about reproduction or retransmission of *Monsanto Today*. [End quoting]

One wonders if they are "selling" these, since they are probably highly profitable, because they are getting so much bad publicity that they don't want it to rub off on the Monsanto name any further. And thus they "sell" the offending businesses to a shell corporation where the same real owners still remain in control behind the scenes and still get the profits. But if the lawsuits start to really hit them, only the shell corporation falls.

YOUR FAVORITE
HEALTH FOOD STORE
MAY SOON HAVE TO CLOSE

From SPIRAL—THE SOCIETY FOR THE PROTECTION OF INDIVIDUAL RIGHTS AND LIBERTIES, Feb. 2000: [quoting]

ALERT—WHY? WHY? WHY?

GOOD NEWS: Last April of this year (1996) Congress passed, and the president signed into law, the Health Insurance Bill. The Health Insurance Bill was hailed as a great victory for we-the-people, however...

BAD NEWS: The Bill contained what is termed a "rider", a small amount of information that was passed quietly, without much fanfare, that undid everything we worked for recently to keep the FDA from interfering in our use of vitamins and herbs and alternative health products. This "rider" was not from the FDA, but from the World Health Organization Codex Program.

The FDA now has the authority to close down all health food stores and now require us to obtain a medical doctor's prescription for vitamins, herbs, and other food supplements. The FDA is presently working on implementing this new law. IT IS A DONE DEAL. It will likely cause the eventual closure of health food stores across the country and there is absolutely nothing we can do about it. This rider is part of the United Nations W.H.O. Alimentarius Commission's program to CONTROL all food supplements worldwide. The program is REQUIRED by all signatories to the GATT Treaty. Commission members are all from the giant drug companies and we-the-people have ZERO input or representation. Not long ago the country of Norway passed into law this identical program and already their government has closed down over half of their health food stores, and the closings continue as this is being written.

QUESTION: Is there any way to reverse this law?

ANSWER: No.

QUESTION: Is there anything we can do? This appears to be a total and absolute affront to all of us and is extremely repressive to people seeking to attend to their health needs.

ANSWER: This can turn out to be the straw that breaks the camel's back in turning the masses against the United Nation's globalists' agenda and their numerous programs and encroachments into the freedoms of individuals in this country. If all of the health field and industry and people concerned about health care should turn their anger toward this Bill and toward the United Nations World Health Organization, their program to gain CONTROL over us may be a complete reversal. They may have won a battle over a law, but by doing so they may possibly turn the tide of the war against them. Please jump in and help in whatever way you can. We are all greatly needed. IF NOT YOU, THEN WHO?

From American Patriot Fax Network (APFN), 512-596-4274, "Friends Faxing Friends For Freedom" c/o Kenneth L. Vardon, P.O. Box 946, Shiner, TX 77984. [End quoting]

While this assault on health food stores has been expected for some time, it can't succeed unless concerned citizens simply look the other way. Flood your Congressional representatives with your thoughts on this matter, and let all your neighbors and friends know what is going on, too.

PHYSICIST INVENTS WORLD'S
FIRST STEALTH CAR!

From the INTERNET, <para-discuss@tje.net>, 2/13/00: [quoting]

By the year 2001, some American automobiles may be equipped with an astonishing new stealth device—an option that

makes the cars invisible to radar!

But the feature is not without its critics, who say the idea is dangerous and call its manufacturers irresponsible.

The technology was created and developed by physicist Dr. David Galberon who often consults with the Pentagon on top-secret military projects. Dr. Galberon says the idea was inspired by the stealth bomber, which is invisible to standard radar.

“Like the famous war plane, the cars will be made out of a Kevlar-like material. The paint is also similar to that used on the stealth” Dr. Galberon says.

“When the driver pulls a lever in the car’s interior, properties in the material and in the paint render the car invisible to radar.”

The noted researcher says the invisibility feature will come as standard equipment in most police cars in the year 2001 and will be available to all drivers as an option.

“For most people, it will be a novelty item” Dr. Galberon says, “a fun feature that will allow a driver to breeze past radar traps on highway like a ghost car.

“But for police, it will be of tremendous value. They will be able to catch speeders, sneak up on criminals and, in effect, create a deterrent to crime by virtue of the fact that no gangster or drug dealer will know when the police are nearby, even with the latest high-tech equipment.”

But opponents are horrified at the idea of invisible cars.

“Dr. Galberon’s argument overlooks one obvious fact” says automobile-safety advocate Wilma Jurno. “If police can use invisibility to their advantage, so can criminals. Bank robbers, hit-and-run violators, drunk drivers—all kinds of lawbreakers—can commit their crimes and simply disappear.”

Mrs. Jurno says she and her advocacy group, Citizens For Safe Roads And Highways, plan to fight the automobile industry on this matter, all the way to the Supreme Court. [End quoting]

Something is wrong with this picture. Can you really believe that we would be able to buy stealth cars so we can just bypass the speeding tickets and the cops?

CHINA URGES WORLD TO ACCEPT IT WILL ABSORB TAIWAN

From the INTERNET, 2/9/00: [quoting]

China urged the world on Sunday to accept its goal of absorbing Taiwan along the lines of its unification with Hong Kong and Macau—or else risk consequences “you don’t want to see”.

<<http://www.insidechina.com/news.php?id=132311&text>> [End quoting]

China has always been a sleeping giant and a world power to be reckoned with. This type of situation can break out into a horrifying display of force very fast. For instance:

CHINA THREATENS TO STRIKE US WITH ICBMS IF TAIWAN DEFENDED

From the INTERNET, <<http://sightings.com>>, 3/1/00: [quoting]

China stepped up its war of words over Taiwan yesterday, bluntly threatening to fire long-range nuclear missiles at the United States if it defends the island.

The warning, published in the official People’s Liberation Army newspaper, comes as a U.S. aircraft carrier and two cruise-missile destroyers recently began exercises off Japan. Defense officials said the warships could be sent to the Taiwan Strait in a crisis.

The official military newspaper, *Liberation Army Daily*, stated in a commentary made public in Beijing that U.S. intervention in a conflict between China and Taiwan would result in “serious damage” to U.S. security interests in Asia.

The military then warned that China could resort to long-range missile attacks on the United States during a regional conflict. “China is neither Iraq nor Yugoslavia but a very special country,” the newspaper stated.

While China is a permanent member of the Security Council of the United Nations, “on the other hand, it is a country that has certain abilities of launching a strategic counterattack and the capacity of launching a long-distance strike” the article said. “It is not a wise move to be at war with a country such as China, a point which the U.S. policy-makers know fairly well also” the newspaper said. “The U.S. military will even be forced to [make] a complete withdrawal from the East Asian region, as they were forced to withdraw from southern Vietnam in those days” the paper said.

The article was unusually harsh, according to Pentagon officials familiar with the translation, and echoed a private warning made in 1995 by Chinese Lt. Gen. Xiong Guangkai.

Gen. Xiong, the PLA’s top intelligence and foreign policy official, told a former Pentagon official at that time that Washington would not help defend Taiwan because it cared more about Los Angeles than Taiwan. The remark was reported to the White House as a threat to use nuclear weapons. [End quoting]

KOREA DEMANDS LIFTING OF ALL U.S. SANCTIONS

From the INTERNET, 2/9/00: [quoting]

North Korea warned the United States Tuesday to lift all economic sanctions imposed on the country or face the “consequences”. The North Korean threats came less than two weeks after it agreed to send a high-level delegation to Washington in March to discuss improving bilateral ties. [End quoting]

The New World Order gang in Washington is going to be facing some serious outlashes

from countries being caught in their “squeeze play” control tactics. And remember that North Korea has nuclear weapons—probably bought from us via Israel.

ALASKA AIR PILOTS, CREW SAY NTSB CRASH STORY IS ‘BS’

From the INTERNET, <<http://sightings.com>>, 2/27/00: [quoting]

Notes From John Quinn & Anthony J. Hilder’s *Newspad*.

From NewsHawk Inc. <hawknews@saber.net> 2-27-00.

Alaska Airlines pilots and crews aren’t buying into the National Transport Safety Board bureaucrats’ “cover-up story” on how AK Air’s Flight 261 went down for the final count, killing all 88 aboard.

Scuttlebutt has it that employees are deeply disturbed by the fact that the airline isn’t furnishing any information to their staff people. An inordinate amount of personnel have been absent the first three weeks after the crash due to “emotional trauma”.

“We’re not buying the NTSB’s bull s--t” says one source. “The Feds have tossed a foul ball and we are not hitting it.” The airline’s mechanics are near unanimous in the belief that the “air holocaust” wasn’t because of any “faulty” stabilizer screw. In the words of one mechanic with Alaska Air: “That’s so much hokum!”

Moreover, in talking to one employee who knew Fl. 261’s pilots Bill Tansky and Ted Thompson, they said: “They were two of our most experienced pilots.” But when asked why they headed out to sea, turning away from the airfield at Point Mugu with its open and immediately accessible runway, they didn’t have an answer. “I just don’t know why they bypassed the runway; no one here can explain it” our source divulged with tears in their eyes. “I was crying for a week and I haven’t been able to sleep ever since. I knew eight of the people on board personally. They were my friends.” We know for certain that a number of the Hilder/Quinn articles were circulating in various Alaska Airline offices around the country. Apparently some of Alaska Air’s flight attendants made copies. They have been seen from Puerto Vallarta to Anchorage and all spots in-between.

The articles, including “It Defies All Logic”, have been picked up by other major websites, including Robert Sterling’s <Konformist.com>, Jeff Rense’s <sightings.com>, Kent Steadman’s <Cyberspaceorbit.com>, and Doug Pooley’s *FlashRadar*. The articles have been seen by millions at this point.

Attorneys across the country representing those who died needlessly in the crash have also been availed of the information and are taking a CLOSE LOOK at what was going on

at the U.S. Navy's Pt. Mugu Weapons Testing Center on February 1st.

One of our sources at Alaska Air says: "When I came into the employee's room, there were five people reading it at the same time. I was busy and didn't have time to read it until the next day." The source said: "One girl (a flight attendant) was concerned that we are not being given the truth." Our contact went on to say: "Everybody is asking why we (the flight) didn't land at Point Mugu. They had plenty of opportunity. But who knows what happened? They're not telling us anything." Three weeks later, it's still "mum's the word". As to the NTSB's "spin story", the widely-prevailing view within Alaska Air is "No way! It didn't happen that way." [End quoting]

This is too long of a story so please get a friend who has a computer to get it for you if you don't have one. It is a very good story. We would have used the space for the story but it is quite similar to the other recent "accident cover-ups" although each have their own twists and turns. However, it should strike you as more than coincidence that 2 "accidents" in a very short space of time would have tail problems and that both lost parts or all of their tails before hitting the water.

Good questions are: Were they shot off by a weapon or blown off by enclosed explosives? Was there somebody "important" on that airplane? Or—after hearing the cover-up stories—first the explosive and then an outside weapon source to finish the job when crews tried to recover the ailing craft. And, what if there occurred some kind of mishap involving super-secret technologies from any of several nearby military installations?

SEVERE FLOODING IN QUEENSLAND, AUSTRALIA

CNN *Headline News* on Feb. 28, 2000 had a big report on the very, very severe flooding there and much of the area is a disaster.

Stan Deyo, who publishes reports on weather, quakes, ocean temperatures, volcanos, etc., and is a regular guest on Art Bell's late-night talk-radio program, has put out a report that parts of Australia are under severe drought in contrast with this latest report about the Queensland area. <<http://www.millennium-ark.net>>

This is—as most of us know—not just happening in Australia, but all over the world. The controlled media are keeping much of this activity quiet so as not to awaken us to a state of questioning what is going on—and why.

"GULF WAR SYNDROME" LINKED TO RADIATION

From the INTERNET, 2/9/00: [quoting]

The so-called Gulf War syndrome may have been caused by radioactive material in the

shells used by coalition forces during the conflict. [End quoting]

I think there is more than one reason for this syndrome and another one of them is probably vaccinations. You can be sure that any explanation offered is a token to deflect attention from further digging and possible discovery of even more horrendous shenanigans.

BROADCASTERS SEEK TO KILL NEW "LOW POWER FM"

From the INTERNET, <<http://sightings.com>>, 2/8/00: [quoting]

This is an update to last month's article in this column.

Turn off that radio!

In the last 12 months we've seen a veteran radio broadcaster removed from his place of work by armed guards (Dennis Bernstein at KPFA in Berkeley) and writers being prosecuted by the federal government on serious—and trumped up—charges (Peter McWilliams, David Hoffman and James Sanders).

One ray of sunshine was the recent and surprising FCC decision to approve low-power FM radio stations for community broadcasting.

Well, it ain't over 'til it's over.

Broadcasters Seek To Kill Low-Power FM, from JWFoster97@aol.com, Union Democracy <<http://www.uniondemocracy.com>>.

The Federal Communications Commission (FCC) approved a low-power FM radio service on January 20, 2000. This new FM service will allow community-based organizations and groups to license low-power 100 and 10 watt radio stations in their community.

This new FM service was endorsed and supported by the AFL-CIO, CWA, IUE, and other labor organizations. Unions can use this new service for many useful purposes, such as organizing and providing important information to their community.

Mike Oxley, Congressman from Ohio, has introduced H.R. 3439, "The Radio Preservation Act Of 1999". This bill would repeal and kill this new FM radio service.

This Bill is very important to me and should be to members of the labor community. Please let everyone know that they should make every effort to oppose and defeat this Bill by contacting their representatives in Congress immediately, and go on record in favor of this new low-power FM radio service.

If you have any questions, please feel free to contact me.

Sincerely, Jim Foster, member UAW 249 Kansas City, Missouri <jwfoster97@aol.com>.

SAMPLE LETTER TO MEMBER OF CONGRESS

January 28, 2000

Dear Representative/Senator,

H.R. 3439, titled the "Radio Broadcasting Preservation Act of 1999", was introduced on November 17, 1999 by Representative Michael Oxley. The stated purpose of this Bill is "To prohibit the Federal Communications Commission from establishing rules authorizing the operation of new, low-power FM radio stations".

The Rep. Oxley Bill is a serious betrayal of the public trust. For over a year, the FCC has been conducting a Notice of Proposed Rule Making [NPRM] regarding the proposed establishment of these new stations. This NPRM was initiated in response to a significant national movement advocating new classes of FM stations in response to extensive radio media consolidation and loss of radio media localism in the wake of the Telecommunications Act of 1996. Proposals for the initial NPRM have been distilled and published by the Commission and two iterations of comments from literally hundreds of participants are presently on file.

Mr. Oxley now seeks to circumvent the FCC's statutory rulemaking with special interest legislation. H.R. 3439 was introduced at the behest of the National Association of Broadcasters [NAB]. This group claims new LPFM stations are technically incompatible with existing FM stations and with the proposed In-Band On-Carrier [IBOC] digital transmission standard. These arguments have been refuted in comparative studies and in a published system evaluation by IBOC developer USADR itself. In any event, such technical matters must be scrutinized and ruled on by the FCC, where the relevant expertise resides, and not by congressional fiat.

It appears that the NAB pressured Rep. Oxley into introducing this special-interest legislation because established radio broadcasters fear the potential for added competition. Although Mr. Oxley has long been a champion of selective deregulation and has often adopted the NAB's peculiar interpretation of public-interest standards (such as allowing majority foreign ownership of U.S. broadcast media), this legislation is so contrary to the public interest that it defies rational explanation.

I would therefore greatly appreciate it if your office would seek an immediate and thorough explanation from Mr. Oxley regarding the public-interest aspects of his anti-LPFM legislation and his rationale for preempting the FCC's rulemaking process.

I also strongly urge you to request that Representative Oxley withdraw his ill-considered legislation and, should the legislation not be withdrawn, my sincere request is that you actively oppose this legislation on the grounds that it seeks to

circumvent the statutory rule-making authority of the Federal Communications Commission.

Thank you for your consideration and I look forward to hearing from you regarding your position on this matter.

Sincerely,

Your name and address, phone, email.

[End quoting]

Remember that the radio frequencies are generally not available to the majority of desenters of the status quo. This is supposed to give desenters a better chance at getting their voices heard—not just labor unions. This is the same kind of opposition that FM faced when first introduced, since the Powers That Be had just completed their acquisitions of all controlling aspects of the AM band. The story of how FM's inventor, the great (but largely unknown) Edwin Howard Armstrong, was driven to the point of suicide is an insightful, if nasty and disgusting, chapter in the history of radio. Power and greed always seem to follow closely on the heels of invention.

ARIZONA MAKES PREPARATIONS FOR SECESSION

Excerpted from the INTERNET, 2/6/00:
[quoting]

An Arizona state legislative committee has approved a resolution calling for the dissolution of the federal government in the event that it abolishes the *U.S. Constitution*, declares martial law, or confiscates firearms—scenarios some say are not unrealistic. Critics of the resolution, however, call the measure a “total waste of time”.

Karen Johnson is an Arizona state representative (<http://www.azleg.state.az.us/members/kjohnson.htm>). Rep. Karen Johnson, a Mesa Republican and chair of the House Committee on Federal Mandates and States' Rights, authored the resolution which the committee approved 3-2. Only the committee's vice-chair, Republican Rep. Gail Griffin, abstained from voting.

Specifically, House Concurrent Resolution 2034 outlines the origin of the United States, emphasizing the sovereignty of the states and their constitutional right to “establish a new federal government for themselves by following the precedent established by *Article VII, Constitution Of The United States*, in which nine of the existing thirteen states dissolved the existing Union under the *Articles Of Confederation* and automatically superceded the *Articles*.”

It also articulates constitutional violations committed by the federal government as justification for the measure, saying “...the fifty current principals, or signatories, to the [*Constitution*] have done well in honoring and obeying it, yet the federal agent has, for decades, violated it in both word and spirit.

The many violations of the *Constitution Of The United States* by the federal government include disposing of federal property without the approval of Congress, usurping jurisdiction from the states in such matters as abortion and firearms rights, and seeking control of public lands within state borders” says the resolution.

By adopting HRC 2034, Arizona states its intention to dissolve the current federal government with the approval of 34 other states and, in essence, start over. Participating states would re-ratify and re-establish the present *Constitution* “as the charter for the formation of a new federal government, to be followed by the election of a new Congress and President and the reorganization of a new judiciary” in keeping with the original intent of the “founding fathers”. Individual members of the military will return to their respective states and report to the governor until a new president is elected.

In addition, each state will assume a prorated portion of the national debt and will own all land within its borders. After the new government is formed, the remaining 15 states will be permitted to join the revised union upon application, as was the case with the original union.

A three-year veteran to the Arizona Legislature, Johnson told the *Sierra Times* the resolution is an “insurance policy”.

“If the federal government declares martial law or attempts to confiscate guns, the states shouldn't have to put up with that” she said. [End quoting]

If this is for real, maybe it will begin to shake up some of the parasites controlling the federal government. We can always hope! We do know the so-called elite controllers don't have a whole lot of time left before their dastardly and cowardly deeds catch up with them. Too many people are awakening—whether it be to aspartame in diet soda, closing down health stores, or usurping any of a dozen other basic rights and privileges of our original constitutional republic.

POSSE COMMITATUS

From *THE SPOTLIGHT*, 2/7/99: [quoting]

According to radio personality Alex Jones and reporter Linda Witt of *The Granger County News*, on Jan. 15, National Guard troops, along with sheriff's officers, maintained a “DWI checkpoint for four hours in Granger County, Tenn., on 11 W Highway. During that time, there were 12 arrests, two cars impounded, and two ‘seizures of property’.” The sheriff's office reportedly doesn't want to talk about it. [End quoting]

This probably is another test to see how far they can push us into the illegal use of the National Guard without much complaints. Are we going to just ignore these actions??

BOTTOM LINE OKAY

From *THE SPOTLIGHT*, 2/7/99: [quoting]

While people the world over have a choice of paying exorbitant heating oil prices or staying cold, Exxon Mobil Corporation's fourth quarter earnings last year jumped 34 percent higher than even Wall Street expected them to. Meanwhile, Merrill Lynch & Co.'s profits for the same quarter more than doubled to a new record due to what the company calls “a boom in mergers and equity underwriting increased investment banking”. [End quoting]

Does anybody see a correlation to all the mergers and what is happening to prices and our freedoms?

Also the news tells us there is really no shortage of oil—OPEC is holding tight control of the shipping of it. Think the so-called elite controllers could have this tight of control if it wasn't for all of these mergers?

TAX CODE ABOUT TO ENDURE MORE ABUSE

CLINTON'S PLAN ANOTHER EXAMPLE OF POLITICAL GOALS CAUSING CHAOS

Excerpted from *THE DAILY NEWS*, Los Angeles, by Daniel J. Mitchell, 2/14/00:
[quoting]

The Internal Revenue Code is America's national nightmare: Its 17,000 pages of fine print law and regulations have spawned 721 different forms.

The paperwork mailed out each year by the Internal Revenue Service could circle the Earth 28 times. Even the “simple” 1040EZ return requires 32 pages of instructions.

Taxpayers squander more than 5.4 billion hours every year in a futile effort to comply with tax laws that have changed more than 6,000 times since 1986. Yet, if President Clinton has his way, the tax system will become even more complicated and unfair.

His final budget contains 221 new proposals, including 93 tax increases, 42 “user fees”, 27 new credits, five new exclusions, three new deductions, and two new marriage penalties, with perhaps “a partridge in a pear tree” in the fine print.

Who wins from this game? Certainly not the taxpayers. If all of the administration's changes are approved, tax collections over the next five years are estimated to be \$10.825 trillion, compared with \$10.829 trillion if the tax laws are left unchanged.

In other words, the president is only willing to cut taxes over the next five years by \$4.4 billion, an infinitesimal reduction of four-hundredths of 1 percent. While taxpayers get a pittance, politicians and lobbyists come out winners.

Politicians win because they can rake in

campaign cash by rewarding friends with new tax preferences. Lobbyists win because they can bill hundreds of dollars for each hour spent getting new loopholes in the tax code or making sure their clients are not affected by the multitude of tax increases the president has proposed.

Indeed, the president's budget is a perfect example of why our tax code has become such a mess. From its beginnings as a simple, two-page form in 1913, the income tax has grown into a monstrosity because politicians have been unable to resist the temptation to use it for political purposes. [End quoting]

Remember that the IRS is the extortion arm of the equally illegal Federal Reserve—both of which came into existence in 1913 by secret, underhanded means, with the blessing of the puppet-president Woodrow Wilson. It appears that the entire entity is about to bury itself in the complications of its own greed. One can but hope.

ONE NIGHT OF DRINKING CAN DAMAGE UNBORN CHILDREN

From *THE DAILY NEWS*, Los Angeles, for 2/11/00: [quoting]

A single drinking binge by a pregnant woman can be enough to permanently damage the brain of her unborn child, according to a new study of the effects of alcohol on babies.

Although experiments in the study were conducted on laboratory rats, experts said the findings offer an explanation of why children born to drinking mothers can suffer learning disabilities and other brain disorders.

The study indicates that rats, and presumably humans, are most susceptible to alcohol-related neurological damage during a period when developing brain cells are furiously building the connections needed for memory, learning, and thought. In humans, this brain growth spurt starts in the sixth month of gestation and continues for two years after birth. In rats, it comes in the two weeks after birth.

"We call this a brain growth spurt period" said Dr. John W. Olney, a Washington University School of Medicine researcher and senior author of the study appearing today in the journal *Science*.

During this brain growth spurt, said Olney, a single prolonged contact with alcohol lasting for four hours or more is enough to kill vast numbers of brain cells.

"There is a massive wave of cell suicide after the brain is exposed to ethanol (alcohol)" said Olney. "The cells die by the millions and millions."

The "binge" used in the study gave the rats a blood alcohol level of .20, or 200 milligrams of alcohol per deciliter of blood. Such a level in people is twice the legal standard of drunkenness in many states.

Dr. David Lovinger of the Vanderbilt University School of Medicine said in *Science* that the study carries a powerful message: Drinking in late pregnancy "is really unsafe for the brain". [End quoting]

Hopefully you will help broadcast this important message far and wide to expectant mothers.

ARKANSAS HIGH COURT LOOKS TO STRIP CLINTON OF LAW LICENSE

From *THE DAILY NEWS*, Los Angeles, for 2/11/00: [quoting]

The Arkansas Supreme Court has given President Clinton 30 days to respond to two ethics complaints seeking to strip him of his law license because of his conduct in the Monica Lewinsky scandal.

The court's Committee on Professional Conduct notified the Southeastern Legal Foundation, which filed one of the complaints, that it is notifying Clinton of the deadline and he is entitled to have a public hearing.

"If the attorney (Clinton) takes exception to the committee's decision, he has a right to request a public hearing" the committee's executive director, James Neal, wrote the foundation on February 3.

Lawyers told The Associated Press that Clinton has received notification of a second complaint seeking to revoke his license and must respond within 30 days, although Clinton can seek a 30-day extension. The lawyers spoke on condition of anonymity.

The second complaint specifically cites as evidence against the president U.S. District Judge Susan Webber Wright's ruling that Clinton gave intentionally false testimony about his sexual relationship with Lewinsky in the Paula Jones civil lawsuit.

The court's decision resurrects a controversy that Clinton hoped was put behind him at an impeachment trial last year. His lawyers will now have to defend his license at a time when Clinton is trying to close out his presidency with initiatives ranging from tax cuts to new benefits for Medicare recipients.

Clinton attorney David Kendall declined to comment Thursday. [End quoting]

Can't you just see Billy boy crying his eyes out over this as he walks away free from all the murder charges they could put him on trial for if they wanted to really get him.

FDA DECLARES ALOE VERA ILLEGAL!

From *CALIFORNIA SUN* newspaper, Millenium Issue: [quoting]

By Ron Wert

Aloe has had a long history of therapeutic uses for burns, reduction of pain, as well as antiviral and antibacterial applications. Now a new highly concentrated form of aloe in a

product called T-Plus is capable of boosting the body's immune system with a vengeance!

In 1995, Allen Hoffman, Ph.D., discovered that high concentrations of aloe vera were able to increase T lymphocytes and attack cancer, AIDS, herpes, and other viruses like nothing else before it. Developed and produced exclusively under the direction of Dr. Hoffman, T-Plus has the incredible attributes of being natural, nutritional, and non-toxic, as well as extremely powerful. We're not talking about diluted aloe vera juice or concentrate you buy at your local healthfood store. T-Plus takes sixty-four gallons of organic aloe vera juice just to make one teaspoon!

What actually happens is that T-Plus builds up the number of T-4 and T-8 lymphocytes in the body, which in turn produce cytokines which destroy microbes and cancer cells. It doesn't matter if you are involved in conventional treatment or not. T-Plus is a totally natural, nutritional substance, and will not cause any harm.

The health value of aloe vera comes as no surprise to Dr. Wendell Winters, associate professor of Microbiology at the University of Texas Health Science Center in San Antonio, who has been researching aloe vera for the past 16 years. He authored his first major scientific paper on the plant in 1981. Dr. Winters, who also heads the Phytobiology Research Department, says "We think of aloe as a pharmacy in a plant."

Another report from the Maryland Anderson Cancer Center suggests that aloe vera gel can stop immune system damage caused by sunburns. Over one hundred studies in the past ten years show the efficacy of this extraordinary plant in a myriad of problems.

Among the one hundred forty substances contained in aloe, there are several that reduce inflammation, along with some that promote tissue growth and healing. In the past ten years, researchers around the world have confirmed the ability of aloe, in a highly concentrated solution, to stimulate the growth of white blood cells.

FDA APPROVED ALOE

In 1994, aloe vera was approved by the U.S. Food and Drug Administration for human testing against the human immune deficiency virus, HIV. Furthermore, the Dietary Supplement Health and Education Act of 1994 allowed public access to the use of naturally occurring substances for medical use. So what went wrong?

WHY THE FDA IS PUBLIC HEALTH ENEMY #1

Apparently, the FDA wasn't expecting an aloe vera concentrate to work so well. As word spread throughout the natural healing

community about a new aloe vera concentrate, the testimonies came flooding in. In 1998, the state of Maryland (Hoffman's home base), at the urging of the AMA and using their legal arm, the FDA, indicted Hoffman for promoting an unapproved HIV and cancer therapy. As is normally the case, patients and doctors appearing on Hoffman's behalf were not allowed to testify as to the rapid medical benefits they experienced. The judge constantly reminded all witnesses that the court's only concern was to focus on whether or not there was a "rule" violation. Medical results were not relative to the "rules" issue, the basis for the indictment. Subsequently, Hoffman was fined \$3.7 million for not following the rules. Our "protective" government then went after the farmer, charging him with 5 counts of growing aloe for unapproved medical use. In addition, they went after a Dr. Donald Mackay, charging him with 10 counts of using T-Plus as an unapproved cancer therapy. Dr. Mackay experienced miraculous results from using T-Plus on his cancer patients, but was not allowed to testify in court as to these benefits.

GESTAPO TACTICS

AMA and FDA tactics are not new. Famous brain cancer specialist, Dr. Stanisloff Berzynski in Texas (see *The Sun*, May 1997), was under attack by the FDA and indicted a record 72 times before he finally defeated the FDA in federal court. Being interviewed on *HeartBeat*, Radio Free America, Berzynski said: "I come from Poland and I'm helping people with cancer and I refuse to give in to the 'Gestapo' tactics of the FDA."

ALOE VERA ON TRIAL

In March of 2000, Dr Hoffman will stand trial again for continuing to promote T-Plus. As he has said to this reporter: "I'd rather go to jail than let people die not knowing the benefits of a safe, natural product like T-Plus. Not a single AIDS or cancer patient has to die since all that is truly necessary is to properly and effectively stimulate the immune system. T-Plus does that and more."

It is through the courage and dedication of doctors like Allen Hoffman that this country's health system will make the shift from toxic modalities to natural healing, immune building herbs, and substances. Currently Dr. Hoffman needs your funding and support.

For more information on T-Plus or to order a cassette tape of Dr. Hoffman's interview on *HeartBeat*, Radio Free America, contact Heart to Heart Media Group at (805) 646-8269 or (888) 230-7505. [End quoting]

It is certainly time that both the AMA and FDA are put in their place. Their version of "protecting" us is getting to be old and

continually more damaging to the good health of we-the-people. The one technique which works with bureaucrats who are acting as puppets for special interests (in this case, the large drug companies) is to overwhelm them with the spotlight of protest in any way you can legally do so—including alerting the media and your congressional representatives.

DIGITAL RADIO DAYS

From *PC MAGAZINE*, 3/7/00: [quoting]

Digital radio was one of the hottest topics at the recent Consumer Electronics Show, even though it won't reach the open market for over a year. The buzz isn't surprising, considering that radio is one of the most popular broadcasting media (if not the most popular) in the U.S. There are over 550 million radios in the U.S. right now, 6.1 per household, according to the Consumer Electronics Society. All these radios are tuning in to analog broadcasts, full of static and interference. That's about to change.

Some stations have begun testing digital radio technology and will start transmitting digital signals in the second quarter of next year. That's plenty of time for manufacturers to start building digital radio receivers into all sorts of devices beyond alarm clocks and portable tape players. You're likely to see cellular phones, PDAs, and PC cards with built-in digital radios.

While radio broadcasts transmit only sound via the airwaves, digital audio broadcast (DAB) technology can also transmit data in bit form. And the broadcasts are received in an enhanced audio format along with the digital information, using what is called in-band, on-channel (IBOC) DAB technology. As a result, AM radio will have FM quality, and FM sound will be equivalent to that of CDs.

IBOC lets broadcasters transmit digital audio and data simultaneously over existing AM/FM frequencies. The data will include information such as station, song, and artist identification, as well as news, stock, traffic, and weather updates. Eventually, you may be able to receive instant messages, e-mail, and calendar information.

Two companies are now developing competing versions of IBOC DAB technology. Lucent Digital Radio uses its version of the Perceptual Audio Coder (PAC), originally developed by Bell Labs, to convert analog audio signals to digital. USA Digital Radio uses Advanced Audio Coding (AAC). Both versions are currently under review by the FCC.

Rockin' Radio: USA Digital Radio recently demonstrated a digital AWFm radio from Kenwood that receives text data as well as audio.

This issue's contributors: Carol Levin, Sharon Nash, and Sebastian Rupley. [End

quoting]

I'd think more about this news item if there was imposed a reasonable limit on advertising time for transmissions over the radio airwaves. We are supposed to own the airwaves, but to listen to them, about all we get is 10-12 minutes of show per 30 minutes of airtime for many programs worth listening to—even the *Art Bell Show*. All the rest of the air time is filled with commercial messages of one kind or another.

NO EXCUSE FOR 63,000 BUGS

Excerpted from the INTERNET, 2/10/00: [quoting]

According to an internal Microsoft memo, as reported by my colleague Mary Jo Foley, the company has identified some 63,000 potential problems to be addressed in the next release of the product.

That's a staggering number.

To be sure, Win2K is staggeringly huge, and defect rates, not absolute numbers, are a better measure of likely reliability in practice. At less than two defects per 1,000 lines of code, Win2K is 80% better than the threshold that software-quality guru Steve McConnell suggests as the signal for a ground-up redesign. Not that I find this entirely comforting, since McConnell also observes that defect distribution is far from uniform; one IBM study, he reports, found 57% of the software errors in only 7% of the studied modules.

But it's Microsoft's stockholders who have the most reason to be troubled by the notion that defects are acceptable in a shipping software product, and that fixing them in a subsequent release is a viable strategy. One Microsoft comment on the 63,000-bug memo was that "bugs are inherent in computer science", which is patently false in theory and bad economics in practice.

THE COST OF BUG FIXES

By most estimates, the cost of repairing a software bug after a rollout is three to 10 times as great as the cost of defect prevention and 50 to 200 times as great as the cost of a more rigorous requirements definition before coding even begins. If Microsoft, optimistically, spends about \$1,000 per item to resolve those 63,000 potential problems (that's only 10 hours of professional staff time plus overhead), then ship-and-fix is costing the company at least an extra \$40 million—perhaps \$60 million—compared with defect prevention. And perhaps those numbers should be at least 10 times greater.

In addition to the costs that go straight to the bottom line, Microsoft faces revenue delays due to poor customer confidence in the company's initial releases—not to mention loss of customers to other platforms, such as AS/

400, that have solid reputations for getting it right the first time.

Moreover, development teams and their managers need to realize that schedules slip more, rather than less, when attention to quality is compromised. The need to ship the product is the most-often-cited excuse for cutting corners, but McConnell observes that the corner you cut today is followed by testing and integration of code that will later be discarded.

[End quoting]

Is it any wonder so many people hate Microsoft? Can you imagine what would happen to a car company or most other companies if they put out such half-baked products? The people and the courts would be all over them. This shows us how much power Bill Gates exercises over the computing markets. It's time something was done about it, even if it's suing Microsoft for false advertising and for refunds for knowingly selling faulty products all over the world.

SWISS SEE HOLES IN MICROSOFT'S PRICES

GOVERNMENT THINKS SWISS CONSUMERS PAY TOO MUCH FOR WINDOWS AND OFFICE. MS SAYS HAMBURGERS COST MORE, TOO.

From the INTERNET, 2/14/00: [quoting]

ZURICH—Switzerland's price regulator said on Monday he was launching an investigation into Microsoft Corporation's software prices after an initial probe backed complaints from consumer groups that they were paying too much.

Werner Marti, referred to in French-speaking Switzerland as "Monsieur Prix", is the state official charged with monitoring pricing. His office can in certain circumstances veto price increases or demand reductions.

Other headlines:

Windows 2000

EU begins Windows 2000 probe

Corporations cool to Windows 2000 [End quoting]

Between bad products and too-high pricing, there is plenty of room for other enterprises to give Microsoft a run for the money.

THE DANGER OF THE MAGNETIC BUZZ

From CALIFORNIA SUN newspaper, Millenium Issue: [quoting]

By Ilonka Harezi

In recent years, much has been written about the benefits of using magnets on the human body. Companies are getting rich selling magnets, with consumers using magnets at an alarming rate. Promotion is focused on the benefits, with little attention given to proper

use of the magnet, its limitations, hazards from over use, or using the wrong type of magnet for the problem area.

After years of research, the unmistakable bottom line is: which end is which? The Southern Hemisphere electron spin differs from the Northern Hemisphere spin. The Indians don't agree with the Japanese. There is no room for guessing. If you don't use magnets correctly, YOU CREATE MORE DAMAGE THAN IF YOU HADN'T DONE ANYTHING!

No one wants to tell the public about this technology—it is a double-edged sword of the sharpest kind. If the person using magnets is untrained, he/she can only follow the directions on the box—putting the magnets on a body with no regard for the polarity. However, ALL diseases or maladies require specific pole use for organs, at a specific time, and as the condition improves, a reversal of the magnetic field may be indicated to speed up the healing process. If the wrong pole (north or south) is used, the problem can become aggravated.

When an organ or part of the body becomes injured, it immediately turns negative in an attempt to retard growth of infectious materials. Later, as it begins to repair itself, it will turn positive in an attempt to speed up the healing. Thus, the eventual switch of polarity. However, if a germicide is used as soon as the injury occurs, and it can be determined there is no chance of infection, the positive may be used from the start. This action, in most cases, will stop the pain faster than with the negative polarity and will dramatically speed-up circulation and healing.

A passive, static magnetic field causes the metabolism to be heightened. This effect stops the pain and causes adrenaline and endorphins to be produced. These are both natural painkillers, which will afford greater relief from whatever problems happen to be causing the pain. After a few month use, however, the body acclimates to the magnetic field, because of the continued use of the magnet. When the body begins to overcome the field produced by the magnet, metabolism drops and the user not only goes into a deep depressive state, but their physical pain problem is heightened when the body is no longer receiving "endorphine" rush.

Many tests have been done in Germany and demonstrate that a static magnetic field boosts the metabolism, but does not oxygenate the body. A pulsed electromagnetic field causes oxygenation to the system. Do not be confused! Many "experts" confuse the effects of a static magnetic field with a pulsed electromagnetic field. To be electromagnetic, the field must contain magnetic component as well as an electric component. Bone healing, as well as other medical applications, are electromagnetic fields—not a static magnetic field. Read the experiments put forth on work done by Drs. Becker and Marino. These

experiments are performed with electromagnetic fields—not magnetic fields produced by magnets! Promoters tend to use electromagnetic research, Robert O. Becker's book *THE BODY ELECTRIC*, and other electromagnetic studies to prove their point for using magnets. This is incorrect!

If the user has been applying the wrong polarity, they may shut down certain areas of the body by depolarizing the cells themselves. Remember, all cells have a spin, and polarity is much like a top put in motion. A strong magnet (200 gauss plus) applied to the body over a period of time will alter the shift of the "diseased" cell and cause it to wobble. When this happens, these cells are no longer able to perform their normal functions. If a certain field can polarize a cell, why not depolarize? Blood and the oxygen it carries are dependent on the action of hemoglobin, a very iron-rich fluid. Iron is highly influenced by the application of magnetic fields.

Our bodies are like tiny universes. Each cell or blood platelet has a spin much like the Earth itself. Even the frequency of the brain has been shown to be in tune with the Earth's natural resonant frequency of 7 to 9 hertz. When disease strikes or the body takes a hard blow, the cells begin to teeter and their polarity becomes reversed. Like a small magnet, the cells attract each other and form a thrombus, tumor, blood clot, etc. The Earth's magnetic field is only .05 gauss and that is all the field strength required to be biologically effective and cause a change in our cells.

Greedy manufacturers are creating huge "gimmick" products to sell to the unsuspecting public. Beds with 6,000 to 12,000 gauss, and magnets of 2,000 to 6,000 gauss, to be used on each side of the head, have enough strength to cause brain ionization. Some shoe pads and other body pads have 2,000 gauss each. This is pure overkill! But even worse, these magnets can be used with the wrong polarity and create a new problem or aggravate an existing one. No two bodies are alike, so there is no such thing as a common magnet.

The "bipolar" magnet can be a real killer. All researchers know that one must never use both polarities at the same time. That is worse than the wrong polarity. Yet, bipolar magnets are being sold to the unsuspecting public.

Magnets DO work—applied by professionals with years of study and experience. The professional can best determine the gauss strength, polarity and length of time to use the magnet. In the hands of inexperienced users, magnets become a dangerous biological weapon. [End quoting]

There are always the charlatans out there to take your money, so please research any method for boosting your health. Magnet therapy is quite old but just now is being rediscovered.

This is the first article I've come across

where someone is trying to wake up the public to the possible dangers of misusing magnets, which are being sold from millions of magazine ads.

I agree that magnets, USED PROPERLY, can be a big asset to the maintenance of a healthy body.

CHECK MEATS YOU BUY FOR THE HIGH AMOUNTS OF WATER

From the INTERNET, <para-discuss@tje.net>, 2/8/00: [quoting]

Did anyone ever read the amount of water added to the meat they are eating? One ham I looked at had 35% water and selected juices?? and two had 20% and one 15% So for every 10 pounds of high Dollar ham 3½ lbs. is water, so you are paying up to \$4.00 a lb. for water. Check the lunch meat also—same thing. [End quoting]

Consumers really have to watch out for all kinds of scams. Beware!

BIG BROTHER ALWAYS HAS ANOTHER TRICK!

DATAGLYPHS CAN BE PROGRAMMED INTO EVERY PRINT DEVICE WITHOUT YOU KNOWING IT, SO THAT EVERYTHING WE PRINT CAN BE TRACED BACK TO THE MACHINE THAT PRINTED IT!!

From the INTERNET, 2/20/00: [quoting]

DataGlyphs are a new technology for encoding machine-readable data onto paper documents or other physical media. They encode information into thousands of tiny, individual glyph elements. Each element consists of a small 45-degree diagonal line, as short as 1/100th of an inch or less, depending on the resolution of the printing and scanning that is used. Each one represents a single binary 0 or 1, depending on whether it slopes to the left or right. Sequences of these can be used to encode numeric, textual, or other information.

The individual glyphs are grouped together on the page, where they form unobtrusive, evenly textured gray areas, like half-toned pictures. One of the reasons for using diagonal glyph elements is because research has shown that the patterns that they form when massed together are not visually distracting.

DataGlyph technology allows ordinary business documents to carry thousands of characters of information hidden in these unobtrusive gray patterns that can appear as backgrounds, shading patterns, or conventional graphic design elements. Often, their presence will go completely unnoticed. (The entire *Gettysburg Address* will fit in a DataGlyph about the size of a small US postage stamp.) DataGlyph areas can be printed on a document as part of its normal printing process. The

information to be put in the DataGlyphs is encoded as a sequence of individual glyphs, and these can be printed either directly by the encoding software (for instance, by a computer laser printer) or via a conventional printing process, such as offset.

The glyphs are laid down on a finely spaced rectangular grid so that the area is evenly textured. In addition, each glyph area contains an embedded synchronization lattice or “skeleton”—a repeating, fixed pattern of glyphs which marks the boundaries of the glyph area and serves as a clocking track to improve the reliability of reading.

Before data is placed into the synchronization frame, it's grouped into blocks of a few dozen bytes and error correcting code is added to each block. The amount of error correction to be used is chosen by the application, depending on the expected quality of the print-scan cycle.

Higher levels of error correction increase the size of the glyph area needed for a given amount of data, but improve the reliability with which the data can be read back. This can be very important in environments where there's a high level of image noise (for example, fax) or where the documents are subjected to rough handling.

As a final step, the bytes of data are randomly dispersed across the glyph area, so that if any part of the glyph area on the paper is severely damaged, the damage to any individual block of data will be slight, and thus easy for the error correcting code to recover. Together, error correction and randomization provide very high levels of reliability, even when the glyph area is impaired by ink marks, staples, and other kinds of image damage.

DataGlyphs are a Trademark of Xerox Corporation. [End quoting]

We couldn't really believe that big brother would pass up another good opportunity to keep an eye on us, would we??

EGYPTIANS FIND TOMB OF ANCIENT GOD OSIRIS

From the INTERNET, courtesy of Calvin Burgin, <wrlldline@texas.net>, 2/20/99: [quoting]

By Tony Snow, *The Independent*

Sinking water levels in the land of the pyramids have led to an unprecedented discovery—a granite sarcophagus of the ancient Egyptian god Osiris.

Osiris was one of the most important gods of ancient Egypt. His sarcophagus was found in a 98-foot-deep tomb at the Giza pyramids.

According to mythology, Osiris was murdered by his wicked brother Seth. He was buried by Isis, his sister-wife, and brought back to life as judge of the dead and ruler of the underworld.

Egyptian archaeologist Zahi Hawass said

the sarcophagus, which he dated to 500 BC in the New Kingdom, was surrounded by the remains of four pillars built in the shape of a hieroglyphic “Bir” or “House of Osiris”.

The excavation unearthed 3,000-year-old bones and pottery found in the underground water, he said.

“I never excavated this shaft because it was always full of water. But when the water went down about a year ago, we started the adventure” he said.

After dirt and most of the remaining water were cleared from the shaft, located between the Sphinx and the Pyramid of Chefred (Khafre), archaeologists found three underground levels, with the submerged Osiris sarcophagus at the lowest.

“Many people believed there were tunnels going to the Sphinx and another leading to the Great Pyramid, but only when we sent a young boy into a tunnel in the west wall of the tomb shaft did we find this exciting discovery” said Hawass. [End quoting]

There are likely to be many more such surprises. The question is—how many will be made public?

PERFUME—CUPID'S ARROW OR POISON DART?

Joint release issued by the Cancer Prevention Coalition and the Environmental Health Network.

Excerpted from the INTERNET, <http://sightings.com>, 2/13/00: [quoting]

The following was released today by Samuel S. Epstein, M.D., Professor of Environmental Medicine, University of Illinois School of Public Health, Chicago, and Chairman of the Cancer Prevention Coalition, and Amy Marsh, President of the Environmental Health Network, Larkspur, California:

Lovers looking for the perfect Valentine's gift should think twice before giving a bottle of toxic chemicals to their sweethearts. Recent analysis of Calvin Klein's “Eternity Eau de Parfum” (Eternity) by an industry laboratory specializing in fragrance chemistry revealed 41 ingredients. These include some known to be toxic to the skin, respiratory tract, nervous, and reproductive systems, and others known to be carcinogens; no toxicity data are available on several ingredients, while data on most are inadequate. Additionally, some ingredients are volatile and a source of indoor air pollution. Since 1995, several consumers have complained to the Food and Drug Administration (FDA) of neurological and respiratory problems due to Eternity.

The analysis was recently commissioned by the Environmental Health Network (EHN) as many members had complained of asthma, migraine, sensitization, or multiple chemical sensitivity when exposed to Eternity. Based on

this analysis, EHN filed a Citizen Petition with the FDA on May 11, 1999, which was subsequently endorsed by the Cancer Prevention Coalition. The petition requests that the FDA take administrative action and declare Eternity “misbranded” or “adulterated” since it does not carry a warning label as required by the terms of the Food, Drug, and Cosmetic Act and the Fair Packaging and Labeling Act. Grounds for requesting the warning label include FDA regulation 21 CFR Sec. 740/10: “Each ingredient used in a cosmetic product and each finished cosmetic product shall be adequately substantiated for safety prior to marketing. Any such ingredient or product whose safety is not adequately substantiated prior to marketing is misbranded unless it contains the following conspicuous statement on the principal display panel: Warning: the safety of this product has not been determined.”

Since May, over 700 consumers with health problems from exposure to various mainstream fragrances have written to the FDA supporting EHN’s petition. The FDA responded on November 30 to the effect that they had been unable to reach a decision on the grounds of “other priorities and the limited availability of resources”. The petition is thus still open for further public complaints and endorsements. [End quoting]

Maybe this is a good incentive to support natural fragrances rather than those concocted in a laboratory.

SEVERE BURNS CAUSED FROM HEATING WATER IN MICROWAVE OVEN!

From the INTERNET, <para-discuss@tje.net>, 2/20/00: [quoting]

I feel that the following is information that anyone who uses a microwave oven to heat water should be made aware of.

About five days ago, my 26-year-old son decided to have a cup of instant coffee. He took a cup of water and put it in the microwave to heat it up (something that he had done numerous times before). I am not sure how long he set the timer for, but he told me he wanted to bring the water to a boil. When the timer shut the oven off, he removed the cup from the oven.

As he looked into the cup he noted that the water was not boiling but instantly the water in the cup “blew up” into his face. The cup remained intact until he threw it out of his hand, but all the water had flew out into his face due to the buildup of energy.

His whole face is blistered and he has 1st and 2nd degree burns to his face which may leave scarring. He also may have lost partial sight in his left eye. While at the hospital, the doctor who was attending to him stated that this a fairly common occurrence and water (alone) should never be heated in a microwave oven.

If water is heated in this manner, something should be placed in the cup to diffuse the energy such as a wooden stir stick, tea bag, etc. It is however a much safer choice to boil the water in a tea kettle.

Please pass this information on to friends and family. [End quoting]

Though they are accepted as part of almost every kitchen these days, microwave ovens sometimes induce any of a number of strange and undesirable effects in foods and beverages. The action of the microwaves themselves on the molecules of the food or drink can impart locally high energy levels which can then lead to effects such as the kind described above.

EXPRESSIONS OF LOVE

From A REGULAR E-MAIL CONTRIBUTOR, 2/16/00: [quoting]

My grandparents were married for over half a century, and played their own special game from the time they had met each other.

The goal of their game was to write the word “shmily” in a surprise place for the other to find.

They took turns leaving “shmily” around the house, and as soon as one of them discovered it, it was their turn to hide it once more.

They dragged “shmily” with their fingers through the sugar and flour containers to await whoever was preparing the next meal. They smeared it in the dew on the windows overlooking the patio where my grandma always fed us warm, homemade pudding with blue food coloring.

“Shmily” was written in the steam left on the mirror after a hot shower, where it would reappear bath after bath. At one point, my grandmother even unrolled an entire roll of toilet paper to leave “shmily” on the very last sheet. There was no end to the places “shmily” would pop up. Little notes with “shmily” scribbled hurriedly were found on dashboards and car seats, or taped to steering wheels.

The notes were stuffed inside shoes and left under pillows.

“Shmily” was written in the dust upon the mantel and traced in the ashes of the fireplace. This mysterious word was as much a part of my grandparents’ house as the furniture.

It took me a long time before I was able to fully appreciate my grandparents’ game. Skepticism has kept me from believing in true

love—one that is pure and enduring. However, I never doubted my grandparents’ relationship. They had love down pat. It was more than their flirtatious little games; it was a way of life. Their relationship was based on a devotion and passionate affection which not everyone is lucky enough to experience. Grandma and Grandpa held hands every chance they could. They stole kisses as they bumped into each other in their tiny kitchen. They finished each other’s sentences and shared the daily crossword puzzle and word jumble.

My grandma whispered to me about how cute my grandpa was, how handsome and old he had grown to be. She claimed that she really knew “how to pick ’em”. Before every meal they bowed their heads and gave thanks, marveling at their blessings: a wonderful family, good fortune, and each other. But there was a dark cloud in my grandparents’ life: my grandmother had breast cancer. The disease had first appeared ten years earlier. As always, Grandpa was with her every step of the way.

He comforted her in their yellow room, painted that way so that she could always be surrounded by sunshine, even when she was too sick to go outside.

Now the cancer was again attacking her body. With the help of a cane and my grandfather’s steady hand, they went to church every morning.

But my grandmother grew steadily weaker until, finally, she could not leave the house anymore. For a while, Grandpa would go to church alone, praying to God to watch over his wife. Then one day, what we all dreaded finally happened. Grandma was gone.

“Shmily.” It was scrawled in yellow on the pink ribbons of my grandmother’s funeral bouquet. As the crowd thinned and the last mourners turned to leave, my aunts, uncles, cousins, and other family members came forward and gathered around Grandma one last time.

Grandpa stepped up to my grandmother’s casket and, taking a shaky breath, he began to sing to her.

Through his tears and grief, the song came, a deep and throaty lullaby. Shaking with my own sorrow, I will never forget that moment.

For I knew that, although I couldn’t begin to fathom the depth of their love, I had been privileged to witness its unmatched beauty.

S-h-m-i-l-y: See How Much I Love You.

Pass this on to some of your friends and family and tell them how much you love them, for there may not be another day that you will talk to them.

“He who loses wealth, loses much; he who loses a friend, loses more; but he who loses courage, loses all.” Friends are those rare people who ask how you are and then wait to hear the answer—or take the time to send you an e-mail. [End quoting]

Good advice. I love you, Al. 

Purposeful Con-fusion

Surrounding Cold Fusion

Editor's note: I (E.Y.) have been wanting to present in this newspaper forum a good general overview article and "state of the art" summary on the intriguing subject of so-called "cold fusion" for a loong time. Ever since the University of Utah scientists, Pons and Fleischmann, first announced their findings on March 23, 1989, and then, in short and mysterious order, were subsequently "run out of town", the developments in this area have been most fascinating—if largely censored from the public media outlets.

I remember around January of 1992 when a huge explosion occurred one night at the very secretive Stanford Research Institute, near Stanford University, where one scientist died. It was hushed pretty well, except for we locals, and I'm sure it was "inconvenient" for them to have to admit the explosion's epicenter was a cold fusion experimental laboratory there at SRI—while the world had been told, over and over again, for several years by that time, that there was nothing to cold fusion.

The subject of cold fusion is one aspect of "free energy" or "over unity" devices—ways of seemingly achieving something for nothing. This is not actually the case; it only seems that way to conventional scientific thinking. Rather, it is a matter, figuratively speaking, of knowing how to fashion the right kind of "paddlewheel" to put in a particular kind of always flowing "stream". It only SEEMS like magic because we don't have a very good picture of reality in our so-called modern physics—for many reasons.

Naturally the true owners of the big oil, gas, and electric companies (the world's so-called "elite" families who control all the natural resources of this planet) would really rather you not have any such free avenue for obtaining something that they have so completely monopolized and metered to their benefit. These same ones have even gone to great lengths to make sure the physics textbooks have been well sanitized from carrying anything which could lead an inventive, creative young mind down any of a number of roads which would all lead to the development of "free energy" devices.

Starting before the turn of the century, the great electrical scientist, engineer, and inventor, Nikola Tesla, was mightily persecuted because of the danger he posed to the status

quo due to his insights in this most fundamental area of energy exchange. And in our more modern era, there have been many, many gifted, creative ones who have suffered all kinds of life-threatening and life-ending "situations" engineered to give the impression of them being crackpots.

Moreover, considering the mind control (disguised as higher educational schooling) which the vast majority of the scientific community has been subjected to, myself included, is it any wonder that there are few equipped to understand, much less stand up for, those who have unlocked one of Mother Nature's free energy secrets?

Two excellent articles on this most intriguing subject recently crossed my desk. The first one, which is "tuned" more for a general (rather than scientific) audience, was generously offered for our use by Mr. Wayne Green. Mr. Green is a widely talented and accomplished and articulate person, who many of you have heard periodically on Art Bell's late-night talk-radio program over the years. Mr. Green does such a good job of providing background about himself and this subject, in the process of telling the story, that it is best to simply turn over the podium to "professor" Green in our first article below. We are also providing an information box telling how to contact Mr. Green and/or order some of his wide range of interesting materials.

Then, while this first article was being prepared for publication as a stand-alone piece, another dynamite article "just happened" to fall open under my nose from one who is highly credentialed to speak on this subject—professional scientist Hal Fox.

We thank NEXUS magazine (2940 E. Colfax, PMB #131, Denver CO 80206; phone: 1-888-909-7474) for first presenting this material in their December 1999-January 2000 issue, and we strongly endorse this fine publication.

Hal's gem is in two sections. The first section is an update (from 10/18/99) on the unarguable reality that is the current state of cold fusion research, and the second section (from 8/6/99) courageously relates his first-hand knowledge concerning the relentless and diabolical covert effort desperately working to suppress cold fusion research. (Mr. Green's article chooses to overlook the conspiracy

aspect of the cold fusion subject—an aspect which only makes the more aware observer all the more sure of The Truth, like when the FDA intervenes to "protect" us by removing useful items from the healthfood store shelves.)

Well, let's shed some more Light on this important scientific area—and see if we can't help to keep it alive and well and actively threatening to lower our power bills!

Cold Fusion Overview

SPRING, 1996 WAYNE GREEN

I came to the cold fusion controversy as neither a true believer nor a skeptic (aka non-believer). In my chosen role in life as an editor and publisher, I try to approach controversy pragmatically. However, I do have to admit to a bias. When I see any establishment group fighting a new idea, I tend to side with the bringers of change. This is a non-conservative side to my nature, which is otherwise strongly conservative.

For instance, I've found little evidence in life to support the basic concepts of socialism, and endless affirmation of the power of capitalism. And while democracy has some serious shortcomings, they're not as many as its competitors. So I'm resistant to socialized medicine and our American socialized school system.

Never have I seen any establishment group to be progressive. Indeed, history provides endless examples of the establishment fighting off new ideas and technologies. So when I discovered that the scientific elite was trying to prevent research in cold fusion, my natural instinct was to suspect that the elite were going to be wrong again. I wanted to find out more about this new field of research.

My publications helped the cellular telephone industry grow from the experimenting of a few amateur radio enthusiasts into a new industry, where I was the *only* publisher covering this field. I did this by publishing hundreds of articles in my amateur radio magazine on repeaters, then publishing a series of books, and finally by publishing a magazine devoted to the subject (*The Repeater Bulletin*).

I held a series of conferences around the country to get this new technology organized and standardized.

I repeated this when the personal computer was first invented by starting the first microcomputer publication (*Byte*), followed by the first computer-specific publication (*80-Micro*), and many more publications and software. I organized the first computer industry standards conference.

My success with cellular telephones and computers encouraged me to support the newly introduced compact disc with publications (*Digital Audio, CD Review, Music Retailing, the Independent Music Producer's Society Journal*), helping to make this become the fastest growing consumer electronics product in history.

Once I'd talked with a few of the scientists researching cold fusion, I felt that a dedicated publication might be able to help this grow into an industry. But this industry would be even more far reaching in its impact on the world than the personal computer.

As I talked with researchers and read their papers, I realized that Professors Pons and Fleischmann had discovered something of enormous potential. The researchers who initially were unable to replicate the P&F experiments apparently had been either careless or, expecting nothing to happen, accepted this result without question. But I also found that several researchers had confirmed the excess heat reported by P&F. As a side note, when the Department of Energy (DOE) issued an edict that any laboratory doing any cold fusion research of any kind would be denied any government funding for *any* of their research, this quickly stopped all further thought of cold fusion research by universities and any other even partially government funded labs.

When I got interested in cold fusion I remembered reading in the Rensselaer Polytechnic Institute *Review* that students there had early on sought to confirm the P&F experiments and had, indeed, been able to replicate the reported excess heat. But when I wrote to the new president of RPI, he refused to answer my letters on the subject. In retrospect I can understand why. RPI is heavily dependent on government funds for research, so the last thing they need is to admit to having done cold fusion research. That could cost them millions of dollars.

As I looked into the state of cold fusion further, I found that as a result of the DOE chill on cold fusion research, one of the leading American researchers in the field was Professor Dennis Cravens, a young physics teacher at a small community college in Vernon, Texas, who was experimenting in his garage. Dennis had invested around \$5,000 of his own money in his lab and was successfully generating excess heat using the P&F approach.

Could the scientific establishment be

wrong? Again? History told me that this was not just possible, but probable. Sure enough, researchers all around the world were making progress. They'd found that not only palladium, but also rubidium, rhodium, titanium, and platinum could also be made to generate excess heat. Even nickel! Some labs were reporting success with plain water, so the reaction didn't even require the use of the much more expensive "heavy" water used by P&F.

Researchers were exploring different temperatures, metals, electrolytes, pressures, radio-frequency excitation, magnetic fields, and so on, experimentally seeking higher ratios of output to input energy. They had to go by intuition because there was as yet no accepted theory explaining the reaction.

Meanwhile, other sources of apparent excess heat were turning up. Were they in some way connected to the P&F phenomenon? Sonoluminescence, hydrosonics, ball lightning, all seem to, in some way, be defying Newton's Third Law, producing more energy out than in.

If these sources are real, do they involve some sort of nuclear reaction, or can they be drawing energy from the fabric of space (whatever space is)?

I found myself in a new world of N-machines, magnetic motors, and zero-point energy. Alas, none of the research reported seemed to have significant substantiation beyond the enthusiasm of adherents.

Where does science end and science-fiction begin? I'm still pragmatic, so I'm waiting to see how all this shakes out.

The heralded end of the oil age is still off somewhere in the future. I don't doubt that researchers will continue to improve the efficiency of the P&F phenomenon as they develop more data and understand better what's going on. But generating heat is only the first step.

Power companies have settled for steam turbines for turning heat into electricity. Maybe it's time to look for a more direct and efficient method.

As I understood the situation, when Dr. John Huizenga, the head of the DOE, put the hex on cold fusion, complete with his book *Cold Fusion, The Scientific Fiasco Of The Century*, he also contacted the US Patent Office and got their cooperation to reject all cold fusion patent applications. I'd heard rumors that one applicant had managed to get around this blanket ban via applying as a senior citizen, and thus going through a different route in the Patent Office. Sure enough, on December 12, 1994, Dr. James Patterson of Sarasota, Florida, was issued a patent for his microsphere approach to generating heat. This was the first cold fusion patent!

Jim already had patents for his process of making microspheres, so that simplified his cold fusion patent application. No, "cold fusion" was not mentioned anywhere in the patent

application. But the data presented did clearly show that substantially more energy was being detected coming out of the Patterson microsphere cell during tests than energy was being put in.

By coating microspheres of polymer first with copper, which adheres to the polymer much better than palladium, then a coating of nickel for strength, and then adding a coating a few molecules thick of palladium, followed by another coating, also very thin, of nickel to keep the palladium from flaking off under pressure or heat, the surface area of metal is at a maximum for the volume taken by the microspheres. This, in turn, greatly speeded up the ability of the nickel and palladium sandwich to absorb hydrogen. With this approach to loading the hydrogen into the metal lattice of the metals, it could be accomplished in minutes instead of taking days to weeks.

Once the metal lattice had absorbed over 85% of its volume with hydrogen, the mysterious excess energy phenomenon could be reliably started. Patterson, 76, is anxious to supply his patented microsphere cold fusion cells to researchers, to simplify their experiments with various metals, electrolytes, and other parameters.

The more I've tried to find out about what may be going on to produce the excess energy, the more I've run into scientific controversies over atomic structure, and even implications with cosmology. It turns out that once we get beyond what we can see in the micro and macro, we're off into a welter of theories. We don't know how the universe started. We don't know how life started. We don't know why the force constants are what they are, except that, if they weren't precisely what they are, we couldn't be here, and neither could the universe. Wow, talk about luck!

In the past, every time scientists developed the means for extending their vision into either the micro or the macro, they invariably discovered that the previously accepted theories had been wrong.

Having been involved with the microcomputer since its inception, I see many parallels with what's going on in the cold fusion field. I started the first microcomputer magazine even before any manufacturer was able to ship a microcomputer that actually worked. Seeing the potential this new invention promised, I decided to do my best to help turn a laboratory curiosity into an industry.

When the minicomputer was first developed, the mainframe manufacturers laughed at it, and ignored it. Soon almost all of them were out of business and minicomputers had taken over. The minicomputer offered computing power at about one-tenth the cost of the mainframe. History has shown us that, any time there is a ten times improvement in a product, it will be successful.

Then came the microcomputer (the personal computer). The minicomputer firms sneered at this “toy” and ignored it. They were led down this garden path by *Computerworld*, the major industry publication, which led the ridiculing. The microcomputer, providing computing power at a tenth the cost of minicomputers, has almost put the minicomputer firms out of business. Data General, Wang, Digital Equipment Corporation, and Prime are all basket cases.

In our field we’ve seen the mainline journals ridiculing cold fusion mercilessly. It’s a scam, a fraud, a fiasco. It almost reminds me of Galileo trying to get his fellow scientists to at least take a look through his telescope. And failing. Pasteur suffered the same fate with his microscope. As did Royal Rife with his super-microscope.

The critics are right, there’s not enough nuclear ash or radiation to explain what’s going on by the old nuclear reaction theory. But where theory and experiment diverge, it’s theory that should give way, not experimental research. And in this case we have a large and growing body of carefully executed experiments which confirm the data, even though it conflicts with cherished theory.

One of the first things Dr. Patterson did when he received his patent was to invite Dennis Cravens to redo his experiments to confirm his data showing that excess heat was being generated. Which Professor Cravens was quickly able to do. When you consider that Dr. Patterson had been getting 200% excess heat dependably, and up to 7000% at times, his approach seems viable. And keep in mind that he was not even bothering to measure the heat lost through venting hydrogen and oxygen from his cell, nor the substantial heat that would be generated if these two elements were reunited to produce water.

When I predicted in 1976 that we would eventually have laptop computers with more power than minicomputers, I got a big laugh. This was just a year after the first crude microcomputer kits had been developed. It was a year before the first practical microcomputers reached the market, made by Commodore and Radio Shack. It was seven years before the first laptop computer.

Today predictions of a new energy source which will replace oil, gas, coal, hydropower, and so on, are just as unbelievable for most people. I believe we’ll be seeing as much progress in developing new energy sources as we have seen in computers and communications, but that this will change the world far more than any previous technologies have. Cold fusion promises power at less than a tenth of today’s costs, so it cannot fail to prevail. The energy companies which try to ignore cold fusion could eventually find themselves in the position of the disappeared mainframe computer manufacturers, or in the

precarious shape of Wang and Data General. Very few things or even industries last forever.

The cold fusion discovery comes at a good time. Scientists have been becoming increasingly concerned over the depletion of fossil fuels, as well as over the pollution burning these fuels is producing. These fuels will become increasingly expensive as natural gas, oil, and coal reserves peter out, leaving the Earth pretty well stripped of resources for future generations. It’s time to move on. But how many oil companies have plans reaching 25 and 50 years into the future? How many power companies are planning on how to survive when transmission wires are no longer needed? Will we even need gas stations in ten years?

What will the power sources of the future be? We can no more predict what they may be than we could predict the PowerPC or Pentium chips when the first transistors were invented. But I won’t be surprised if our wrist communicator/watches are self-powered by minuscule cold fusion cells. Today’s rockets are mostly huge fuel tanks with only a small space left for the astronauts. Substantially lower energy costs will make many manufacturing processes economical that aren’t now.

It’s too easy to rhapsodize over the what-ifs of cold fusion. If it turns out to be even 10% of what is expected of it by today’s dreamers, this will be by far the most important discovery of the 20th century.

It is probably too much to hope that the “establishment” scientists learn from their mistake of passing judgment on cold fusion with too few facts, and thus make it easier for scientists to make progress in other forbidden areas. The other potential sources of low-cost energy should be more carefully researched to make sure that the establishment hasn’t blundered again in counting them out. But that holds true in a wide variety of areas where research has been seriously underfunded because they were not in the mainstream.

If scientists would treat anomalies as red flags, waving to attract their attention, instead of sweeping them under their mental carpets, we’d have far more progress in many fields. The work and ideas of Tesla, Rife, Reich, Velikovskiy, Rhine, Backster, O’Leary, Naessens, Bob Beck, and many others needs to be more carefully investigated. I wish I had the time to start magazines to help more new fields develop. The greatest shortage I face is in finding people interested and willing to work and help. For instance, in the medical field alone I see areas which could be developed which could cut our healthcare costs by about 90%.

Cellular phones, microcomputers, and compact discs probably would have been unstoppable new technologies without my contributions, but then I look at the distressing

number of potential new technologies which have been successfully stopped by the establishment, and I wonder.

Patterson and Cravens took the Patterson cell to the Fifth Cold Fusion Conference in Monaco in April ’95 and demonstrated it, sitting there on a tabletop, generating from 200-600% excess heat for the four days of the conference. At the University of Illinois conference in October, just six months later, the Patterson cell was producing 100 times more energy out than in, as observed by scientists from 35 countries. The cold fusion movement was now unstoppable.

The cellular telephone, pioneered by radio amateurs, has changed communications world wide. And we haven’t seen anything yet! Look at the impact the personal computer has had on the world. It’s changed the structure of businesses. It’s opened up endless new industries. Now we’re seeing the compact disc developing into a data transfer device, and now we’re even seeing movies on ’em (DVD). I have the entire country’s phone numbers listed on just five CD-ROMs.

And I helped. Now—what have *you* done to help move the world along? Or are you one of the people who are doing your best to stop progress? Or are you just along for the ride? It’s fun to reach out for that brass ring instead of just riding life’s merry-go-round. Sure, it takes some extra effort. But you’ll be surprised at how little extra effort it takes before you find yourself out in front.

1997 - UPDATE:

In the two years since the Monaco Fifth International Conference on Cold Fusion (ICCF-5), Jim Patterson and Dennis Cravens have been very busy. Dennis has left his Vernon, Texas teaching position to pursue cold fusion research full time from a laboratory he set up in New Mexico.

The result is that on June 11, 1997 Jim demonstrated his cell working in a prototype hot water heater on the *Good Morning America* (ABC) show. It was running at about 150% efficiency, but I expect they’ll surpass that by the time a commercial model reaches the market.

But even more astounding was Jim’s demonstration of his cell decontaminating radioactive uranium. Here was the promise of a solution to the multi-trillion-dollar nuclear waste problem. You may be sure that this got some attention in high places and had a number of scientists looking up crow recipes.

The scientific community had already been shaken by a NASA research report (N96-22559) which confirmed the generation of excess heat using nickel and plain water. Heat far beyond anything possible via a chemical reaction. This report, which is “no longer available” from NASA, has been reprinted in

issue #22 of *Elemental Energy*.

Yes, cold fusion is not just real, it's impossible to sweep under the rug for even the most reactionary of critics from the physics "establishment".

But why is all this happening? It defies current atomic theory. So theory is just going to have to change, no matter how resistant the establishment is to this. There are no more straws for Doug Morrison, Gary Taubs, or John Huizenga, the most voluble of cold fusion's skeptics, to grasp.

One theory that I like is that the too small amount of helium which is being detected, presumably from the transmutation of hydrogen, can be explained by some transmutation of the palladium to silver, and some of the lithium electrolyte to boron. Where potassium is used as the electrolyte, this could be transmuting to calcium. This effect is explained in rather good detail in the Michio Kushi book *The Philosopher's Stone*. (The book is \$10 from One Peaceful World Press, Becket MA 01223, for those willing to do their homework.)

The transmutation of elements may be an anathema to some physicists, but only if they are able to ignore a mountain of evidence going back several centuries. This is cold fusion, not cold fission, so we may be moving elements up the periodic table, not down. Thus the lack of radioactivity observed.

Recent spectrographic tests by Prof. Miley at the University of Illinois have confirmed this explanation for the generation of excess heat.

GRAVITY & INERTIA

The "standard model" for the atom has generated some impossible situations, but that hasn't yet forced the true-believer scientists to rethink their theory. Well, that's what they were taught in college, and it's the model they've lived with ever since. It even influenced Einstein in his thinking. And may have led him seriously astray. The old paradigm-shift problem.

As I explained in my editorial in *Cold Fusion*, after reading Eric Lerner's *The Big Bang Never Happened*, and seeing his model for the creation of the solar system, the galaxy, and then the super-galaxies, and its application to known plasma experiments and ball lightning, I remembered the model for the sub-quark, as published in 1908 by Besant & Leadbeater in their book *Occult Chemistry*, and then followed up in 1980 by Stephen Phillips in his *Extra-Sensory Perception Of Quarks*.

These models applied the laws of fluid dynamics, the same laws drawn upon by Maxwell for his equations. And we know from super-collider experiments that all particles have spin, but for some reason the next seemingly obvious step of reasoning hasn't happened. If electrons, protons, etc., all have spin, then they are all much like miniature gyroscopes. A

group of spinning particles (wavicles?) is thus much like a box full of tiny gyroscopes, all with different orientations so they cancel precession. We know that when we push a gyroscope it resists changing direction. And when it starts moving it tends to maintain its direction and momentum. And that's what we observe as inertia.

Now, each of the spinning wavicles (Feynman) is holding itself together with a force generated by the energy (whatever *that* is) spinning around the outside of the ball and up into a vortex at the top, then back out the bottom. The suction formed by the tight vortex, just as we have in fluid dynamics, holds the energy ball together. But this force also extends to nearby balls, tending to attract them with this small force. And this we perceive as gravity.

Don't you like that explanation better than Einstein's concept of gravity being a deflection of the space-time continuum? Well, it sure is easier to understand the concepts involved.

Now, I hope a math expert will apply the equations to the system for us. I make no pretense of math expertise, nor do I intend to spend the time to develop any. I've found that while math is helpful to some scientists in dealing with abstractions, in my publications it has been a barrier to explaining complex matters to newcomers in any field. My feeling is that if a scientist is unable to explain a concept without equations, then he doesn't really understand what he's trying to write about.

In 47 years of publishing technical magazines and books, I've always insisted on authors using a minimum of math. It's been difficult for some authors, but the result has been the opening of one new technology after another to masses of newcomers, and their growth into new industries.

COLD FUSION 1998

Most of the papers being submitted for publication in *Elemental Energy* by foreign authors seem to be concentrating primarily on theoretical discussions. The nuts and bolts researchers, other than Dr. Patterson, are either making little progress or keeping their results secret. The work of Drs. Pons and Fleischmann has been kept very close. I suspect they are hiding an embarrassing lack of progress. Dr. F. bailed out and is back in UK. There are rumors that Toyota has lost its enthusiasm for the project and is looking for some other company to buy them out.

The most visible success in the field is the Patterson Patented Cell, as promoted by Clean Energy Technology Inc. (CETI). Laboratories or universities interested in getting more information and prices for research cells should contact Jim Reding at 941-951-2384.

Patterson has been granted a series of

patents (which I've been publishing in *Elemental Energy*) covering both the generation of excess heat and the amelioration of radioactivity. It looks as if we'll be able to turn thousands of tons of radioactive waste into heat and electricity!

The most recent International Conference on Cold Fusion was held in April 1998 in Vancouver, where not much really happened. The previous ICCF in Sopporo, Japan in 1996 was a similar dud. The problem seems mostly to be in the unprofessional approach to organizing these conferences, where every effort seems to have been made to exclude and discourage the media.

The 1998 conference was organized by Eneco, whose major contribution to the field so far seems to be the sale of their stock. Efforts to get information about their activities have been ignored.

PAPERS REQUESTED

Papers are particularly requested from researchers in the field as a way to help others avoid dead ends, and to provide visibility for possible funding.

RICHES GALORE!

Thus, as I hope you can see, the field is still wide open for pioneers. The Patterson microsphere cell seems to me to be more complicated than is necessary. Jim has proven that the action is a surface phenomenon, so the obvious next step, it seems to me, is to use finely powdered metals which should start the reaction faster, be more dependable, and provide greater efficiencies.

As Dennis has proven, it doesn't take a multi-million-dollar lab to be a cold fusion pioneer, any more than it took that to be a personal computer pioneer like Bill Gates, Paul Allen, Steve Jobs, and Steve Wozniak. They all started out on shoestrings.

Of course, if your pioneering spirit has been totally crushed by our truly dreadful school system, then all you can do is read about the adventures the pioneers are having and be jealous of their resulting riches.

Pioneering opportunities are wide open for the adventurer at every turn. We know very little about magnetism, water, and hundreds of anomalies which have been ignored by scientists.

Right now, if you wanted, you could start from almost zero and learn enough about cold fusion to do your own research at home and have a good chance at making a breakthrough.

Opportunity is always there, knocking quietly on your door. Now, with a new multi-trillion-dollar industry about to get started, the rapping is getting louder. Will you be able to sleep through it, lulled by your TV and ball games? No problem, right?

Yes, researchers are going to constantly improve elemental energy systems as they experiment with different metals, electrolytes, temperatures, SAF and RF excitation, and other parameters. But right now the technology has advanced enough for manufacturers to start building small home or water heating units. I'd like to see a hundred entrepreneurs producing the first commercial products using this technology. And, as with personal computers, we'll be seeing improved models being marketed every few months.

NOW, LET'S TACKLE THE BASICS

This "Letter to Emma" was written to my granddaughter to help her in a science project.
— Talbot Chubb

Dear Emma,

Thank you for your letter suggesting that I help you with your independent study project about cold fusion. It sounds like a good idea, but it will require some work on your part since you will need to have a certain level of understanding about chemistry and physics. As you know cold fusion is a very controversial subject. If it is real, which I happen to believe, it will change many things in the world, probably even in my lifetime.

First it is important to recognize that there are 4 distinct types of energy production: (1) chemical energy, that powers our cars and most of our civilization, (2) nuclear fission energy, as used to generate about 15% of our electricity, (3) hot fusion nuclear energy, which powers the Sun and most stars, and (4) cold fusion nuclear energy, which appears as unexplained heat in a few experimenter's laboratory studies and which most scientists believe is impossible. The three types of nuclear energy produce 10 million times as much heat per pound of fuel than occurs with chemical energy.

How do these types of energy differ? To understand this question, you need to know some chemistry and physics.

LESSON 1

Nature has provided us with 2 types of stable charged particles, the proton and the electron. The proton is heavy, normally tiny, and has a positive charge. The electron is light, normally large and fuzzy, and has a negative charge.

The positive charge and the negative charge attract each other, just like the north pole of a magnet attracts the south pole of a magnet. When you bring 2 magnets together with the north pole of one facing the south pole of the other, they pull together—bang! When they bang into each other, they release a little bit of energy in the form of heat, but it is too small an amount to easily measure. To pull the

magnets apart you have to do work, which is another way of saying you have to use up energy.

It's almost like rolling a rock down a hill. Rolling the rock down a hill actually creates a little heat, and pulling the rock back up the hill takes energy.

In the same way, the positive charge of the proton pulls on the negative charge of the electron and they stick together, releasing energy in the process. The result is a hydrogen atom, designated H.

A hydrogen atom is nothing but a fuzzy electron hugging a compact proton. The proton is the nucleus of the hydrogen atom. If you knock the electron off the hydrogen atom, you get a positive ion H^+ , which is nothing more than the original proton. An ion is the name applied to an atom or molecule that has lost or gained one or more electrons, and hence is no longer electrically neutral.

LESSON 2

As you know, Nature has provided us with more than one type of atom. We have oxygen atoms, nitrogen atoms, iron atoms, helium atoms, etc.

How do these atoms differ? The answer is that they all have different types of nuclei (plural of nucleus, from the Latin). And these different nuclei all have different numbers of protons inside them, which means they all have different plus charges.

The nucleus of the helium atoms has 2 protons inside it, hence has plus-2 charge, and requires 2 electrons to neutralize its charge. When 2 electrons stick to it, it becomes a helium atom.

The oxygen nucleus has 8 protons and has charge 8. When 8 electrons stick to it, it becomes an oxygen atom. The nitrogen atom has 7, and the iron atom has 26.

But all the atoms are built more or less the same way, with a compact, positively charged nucleus embedded in a cloud of fuzzy electrons. The difference in size between the compact nucleus and the fuzzy electrons is enormous. The Sun has a diameter only about 100 times that of the Earth. The electron cloud on an atom has a diameter which is about 100,000 times that of the nucleus. Cube these numbers to get the difference in volumes.

LESSON 3

We now are in a position to understand what chemical energy is. The atoms, all electrically neutral, can actually join with each other and release more energy. This is another way of saying that they can join into more stable configurations.

The electrons in an atom try to snuggle up to their nuclei as close as possible, but their fuzzy nature requires that they take up a certain volume of space. However, if they join

together with the electrons of another atom, they can usually find a tighter configuration that leaves them closer to their beloved nuclei.

For example, 2 hydrogen atoms can join together in a snuggler configuration if each hydrogen atom contributes its electron to a 2-electron cloud, which the separate protons share. In this manner they form a grouping of the two electrons in a single cloud, together with the two isolated protons spaced apart from each other but still within the electron cloud. The result is a heat-producing chemical reaction $H + H \rightarrow H_2$. (The \rightarrow means "goes to" or "becomes".)

The H_2 configuration is the hydrogen molecule, and when you buy a tank of hydrogen gas, H_2 molecules is what you get. Furthermore, the 2 electrons of the H_2 molecule and the 8 electrons of the O atom can find a still snuggler configuration by combining their electrons to create the water molecule H_2O , plus heat.

The water molecule is really a single cloud of electrons in which are embedded the three point-like nuclei to form a minimum energy configuration. So when we burn oil or coal we reconfigure the electrons to produce more stable configurations of point-like nuclei embedded in electron clouds, liberating heat. So much for chemical energy.

LESSON 4

We have slid over one point in the above discussion. How does Nature make a nuclei containing two or more protons in the first place?

After all, each of the protons has a positive charge, and the positive charges repel each other very strongly when they are separated by a distance equal to the distance across a nucleus. The repulsion of like charges is just like the repulsion between the north poles of two magnets when they are pushed together the wrong way. Something must overcome this repulsion, or else the only kind of atoms we would have would be those of hydrogen.

Fortunately, this is not what we observe. The answer is that there is a second kind of force which acts on protons, the nuclear force. The nuclear force is very strong but requires particles to almost sit on each other to have any effect.

And also there is a second kind of heavy particle, which is just like a proton, except that it has no positive or negative charge. This other kind of particle is called the neutron, since it is electrically neutral. A peculiar fact of life is that it exists in stable form only inside a nucleus. When not in the nucleus, it changes into a proton and electron and a very light neutrino in about 10 minutes. But it lasts forever inside a nucleus.

Anyway, the neutron and the proton really love each other once they can get close enough

together, and then they combine to form a very stable pair called a deuteron, which we designate by D^+ . Moreover, two deuterons will embrace each other even more tightly if brought into contact, despite the push apart by their two positive charges. They then fuse to form a doubly charged particle consisting of two protons and two neutrons. This particle is the nucleus of the helium atom, designated He^{++} . When neutralized by two electrons, it becomes the helium atom.

The single deuteron, when it combines with a single electron, forms the heavy hydrogen atom called deuterium, designated D. Larger groupings of neutrons and protons exist in Nature and serve as the nuclei of carbon, nitrogen, oxygen, and iron, etc. atoms. All of these groupings are made possible by the very strong nuclear force, which is felt between particles only when they are in contact or partially occupy the same volume of space.

LESSON 5

We can now understand normal nuclear energy, which is really nuclear fission energy. In the explosion of massive stars, lots of different types of nuclei were formed and exploded back into space. Second and later generation stars and planets were formed from this mix, including our Sun. In the explosion process, probably every possible stable configuration of protons and neutrons has been produced, plus some almost-stable groupings, such as the nucleus of the uranium atom.

There are actually 3 different types of uranium atom nuclei, called uranium 234, uranium 235, and uranium 238. These "isotopes" differ in their number of neutrons, but they all have 92 protons.

The nuclei of all uranium atoms can go to a lower energy configuration by ejecting a helium nucleus, but this process occurs rarely, so that the uranium has already lasted over 4 billion years.

But the uranium nuclei are unstable in another way. In general, groupings of protons and neutrons are happiest if they have about 60 protons-plus-neutrons. The uranium nuclei contain more than three times this number. So they would like to split in two, which would release a lot of heat.

But Nature doesn't provide a way for them to split apart, because they would have to go to a higher energy configuration before splitting in two. However, one of the three forms of uranium nucleus found in Nature, called uranium 235 and designated ^{235}U , can be given this energy if it captures a neutron. The energized nucleus that results from neutron capture then splits apart with enormous energy release, and incidentally with release of additional neutrons. The additional neutrons can then split more uranium nuclei, keeping the reaction going.

This is what happens in nuclear power plants where the heat, which is the end product of the nuclear splitting process, is used to boil water, generate steam, and turn electrical generators. (One also gets lots of radioactive products, which are a nuisance to dispose of safely.)

LESSON 6

We are now also in a position to understand hot fusion nuclear energy. As mentioned in Lesson 5, the groupings of protons plus neutrons is most comfortable when the numbers of neutrons and protons approximate those found in the nucleus of an iron atom. Just as uranium has too many neutrons plus protons to be comfortable, so the light elements like hydrogen, helium, carbon, nitrogen, and oxygen have too few. If they can be made to snuggle up under proper conditions, they can combine to create more stable groupings, plus heat.

This is the process of fusion. Nature has found a way of doing this in stars, like the Sun. All Nature has to do is heat compressed hydrogen hot enough, and wait long enough, and hot fusion will occur. If Nature were to start with deuterium, which already has a paired proton and neutron, the task would be relatively easy in a star.

Temperature is a measure of how much speed an atom of a given type has as it bangs around inside a cloud of such atoms. The higher the temperature, the higher the speed and the closer the atoms get to each other momentarily during a collision. In a star, the temperatures are high enough that all the electrons quickly get knocked off the atoms, so one is really dealing with a mixed cloud of electrons and nuclei. At very high temperature the nuclei occasionally get close enough during collisions for the pulling-together short-range nuclear force to turn on. Then the nuclei can stick together and go to a lower energy configuration of protons plus neutrons, releasing heat.

Hot fusion nuclear energy is an attempt to carry out this process in the lab, using deuterium and mass-3 hydrogen (whose nucleus is a compact grouping of 1 proton and 2 neutrons) as the gas. Hot fusion requires that the gas be contained at temperatures of hundreds of millions of degrees, which can be done with the help of magnetic fields, but only for 1 or 2 seconds.

The hope is to contain the gas for longer times. During the period of high temperature containment, nuclear reactions occur during collisions. The main form of energy release is ejection of high-energy neutrons and protons. The proton energy quickly converts to heat. The neutron energy can also be converted to heat, but makes the equipment highly radioactive. It then becomes difficult to repair the equipment, which could make hot fusion a

poor candidate for commercial power production.

In any case, hot fusion power is a dream that is still probably at least 50 years away. But most scientists view hot fusion as the only way to achieve fusion power, which produces less radioactivity than fission power, is environmentally benign, and has a virtually limitless fuel supply on Earth (many millions of years at present energy usage rates).

LESSON 7

So now we come to cold fusion. Cold fusion may provide an easier and non-radioactive way of releasing nuclear fusion energy.

Cold fusion relies on a different way of letting protons and neutrons in nuclei snuggle up so that the nuclear force can bring them into a more stable configuration. The requirement for any nuclear reaction to occur is that the reacting nuclei occupy the same volume of space. This condition is called particle overlap.

In hot fusion, particle overlap is brought about briefly by banging the nuclei together so as to overcome momentarily the repulsion of the two positive charges which try to keep the particles apart. In cold fusion, particle overlap conditions are achieved by making deuterium nuclei act as fuzzy objects, like electrons in atoms, instead of like tiny points.

When either light or heavy hydrogen is added to a heavy metal, it occupies positions inside the metal where it is surrounded by heavy metal atoms. This form of hydrogen is called interstitial hydrogen.

With interstitial hydrogen, the electrons of the hydrogen atom become part of the pool of electrons of the metal. Each hydrogen nucleus oscillates back and forth through a negatively charged electron cloud provided by the electrons of the metal. They can be thought of as moving back and forth like the pendulum in a grandfather clock.

This vibration exists even at very low temperature, due to a peculiarity of a branch of physics called quantum mechanics. The vibration is called zero-point motion.

The nucleus then becomes a fuzzy object, like the electrons in an atom. But this amount of fuzziness is not enough to permit a hydrogen nucleus to share volume with another hydrogen nucleus.

To get two or more hydrogen nuclei to share the same volume, one must go one step further. In a metal, electrical current is carried by electrons that act more like stationary matter waves than like point particles. If electrons did not become wave-like inside solids, there would be no transistors and no present-day computers.

This wave-like kind of electron is called a Bloch-function electron. [*Editor's note: This model is named after Felix Bloch, who was one of the contributors to the mathematical*

development of quantum mechanics in the 1920s and 1930s. Besides what is mentioned here about a “wave-like kind of electron”, a number of unusual or counter-intuitive scenarios are connected with that mathematics. As we come to better understand the way matter is REALLY put together, and how it actually manifests in our physical space, some of those seemingly outrageous concepts and experimental findings from early quantum mechanics will make more sense. It is all an issue of the relative frequency of vibration between interacting “bits” of matter and readily leads to such applications as invisibility cloaking, shifting in space and time and, say, one object passing through another solid object like a wall or closed box. But this is getting off the subject under discussion here!] The secret of cold fusion is that one needs Bloch-function deuterons: one needs wave-like deuterons inside a solid in order that two or more deuterons share the same volume of space.

But once the Bloch-function deuterons are created, the nuclear force comes into play and the protons and neutrons making up the deuterons can rearrange themselves into a more comfortable configuration, with a release of heat. To study cold fusion, the experimenter has to force deuterons to assume the wave-like form and keep them in the wave-like state.

The successful cold fusion experiments

show that this can be done. But at present only one scientist team knows how to do it reliably. These scientists are Drs. Yoshiaki Arata and Yue-Chang Zhang. They work in a university laboratory in Japan. Since cold fusion promises millions of years of energy without the problems of global warming or radioactivity, a real effort should be made to learn from them how to reliably release cold fusion energy.

WAYNE SAYS:

Chubb has done a nice job of explaining something complicated. But perhaps I can help a little when it comes to the last step, the cold fusion phenomenon, which isn't very difficult to understand, with or without Bloch waves. (Lordy!)

Back in 1989, Pons and Fleischmann discovered that when they put some palladium in heavy water and passed a current through it, eventually it would start to heat up and produce more heat energy out than the electrical energy going into the system. Since this was happening at around room temperatures, as opposed to hot fusion at several million degrees, they called it cold fusion.

The scientific establishment had no theory to explain this, so they branded P&F as either fools or rascals, forcing them to leave the country.

Subsequent research has shown that a number of the metals which have a lattice-like structure can be made to produce excess heat. Metals such as rhodium, rubidium, platinum, and nickel have all performed well.

It was discovered that it was necessary for hydrogen from the water to be absorbed in the metal's lattice, which acts like a sponge, before the reaction could take place. This led to the use of a thin film of the metal being deposited on tiny plastic spheres (by Jim Patterson) or the use of powdered metal, both of which provide a maximum of surface area per unit of volume, and thus allows the hydrogen to fill the metal lattice faster. With this advance, the “cold fusion” reaction could be made to start up in minutes instead of taking hours to days, as it had for P&F. It also made it possible to use nickel instead of palladium, which is much cheaper, and plain water instead of the far more expensive deuterium (heavy water).

What seems to be happening is that the hydrogen is absorbed into the metal's lattice. Then, when an electric current is passed through the metal, the hydrogen atoms get very agitated, which is understandable (who doesn't get agitated when an electric current is passed through them?) and, the hydrogen, constrained by the lattice, has nowhere to go, and the trapped neutron triggers a reaction which produces energetic particles to start a breeding

Website: www.waynegrreen.com

Fax: 603-588-3205

For a reprint of Wayne Green's *Cold Fusion Overview* article use the above information and send \$5.00+s&h. (Shipping & Handling: \$3 for total order. For Canada: US\$ on US bank; add \$3 extra (\$6 total) for shipping. Foreign orders, please add \$10 for shipping.)

Wayne has a plethora of information available at very reasonable prices. Here are just a few brief examples of what Wayne offers:

Cold Fusion Journal — \$30/six issues +s&h

I predict this will be one of the largest industries in the world in a few years. Power at about a tenth the cost of oil, coal, or natural gas! Even cheaper than hydro, solar or wind power! My Journal publishes the patents and theory involved in this new field of solid-state physics and the transmutation of elements. For \$5 I have an Overview available which explains the history and, in simple language, how and why cold fusion works. Or you can get a sample issue for \$10. I publish about six issues a year, but that depends on the rapidity of new developments. Oh yes, this Journal won the Folio Magazine prize as the best designed new technical publication.

Secret Guide to Wisdom — \$5 +s&h

This is a review of a bunch of books which our school system should have encouraged you to read. No, I don't sell these books—that would be a conflict of interest. I'm recommending them because they are critically important to helping you understand what a sham most of the things we've been brought up to believe in are. I've had to read thousands of books to find these few gems. You don't.

Yes, I'm an iconoclast—that's someone who challenges conventional or cherished beliefs and institutions as being false or harmful. Hey, that's me, and I want to enlist you in my crusade.

But to do that I need you to understand more about the world—the stuff they don't teach you in school. This guide will, I predict, turn out to be one of the most treasured reference books you'll ever get.

After reading these books you'll be death to any party because you'll know more about almost anything than anyone else. You'll be a social pariah unless you learn to keep your mouth shut—a skill I have not yet mastered. But it is fun to be able to go on talk-radio shows like *Art Bell*, *Sightings*, and *Laura Lee* and talk knowledgeably about a wide range of subjects.

Secret Guide to Health — \$5 +s&h

We are all brought up to believe in doctors. We eat and breathe what we want, including a bunch of poisons such as caffeine, nicotine, alcohol, and aspartame, and when we get sick as a result, we turn the responsibility for our health over to our doctor. What the AMA, the FDA, and other groups don't want you to know is how totally the pharmaceutical industry is in control of the health industry. Well, sickness industry, actually. There are several well researched books which blow the whistle on this whole mess. The American healthcare system is (a) the most expensive in the developed world and (b) one of the worst in terms of longevity and infant survival.

The *Secret Guide to Health* will help you avoid the poisons which are making you sick and help you add 30 to 60 healthy years to your life. You need to learn about what foods to eat and which to avoid. You need to know about the importance of drinking enough pure water. You'll learn the truth about vaccinations, dental amalgams, root canals, and other health threats. Or you can do like most people and die of cancer, a stroke, a heart attack, or hobble around a nursing home as an Alzheimer's veggie like my mother did.

Secret Guide to Wealth — \$5 +s&h

There are no known benefits to being poor, yet most people settle for careers which will never net them much money—such as working for a big company, the government, or teaching. The basic secret to making money is to own your own company. My book explains how you can get others to happily pay you to learn what you need to know to be an entrepreneur, and do it even though you have no college degree, resumé, or even any experience! And do it from 17 to 70.

An *Inc. Magazine* survey of America's most successful

entrepreneurs showed that virtually none of them ever completed college. They either never bothered to waste the time and money or, like Bill Gates, they dropped out. I spill the beans on the whole job scam. If you work for someone else for more than a couple of years, you're a sucker. When I finally figured out what was really going on, I started my own company, and within a couple of years I was buying the toys of the rich—like a yacht, an Arab horse, a plane, and a couple Porsches.

My guarantee: If you follow my instructions and aren't a millionaire within seven years, you get your \$5 back. Now, I realize that gratitude is the least felt of all human emotions, but maybe you could send me a check for the \$5,000 I should charge for this book when you make your first million? I'll send you the \$5 change.

73 Magazine — only \$25/year (a steal)

Most of the ideas in my books are first tried out on my 100,000 *73 Magazine* readers. As far as I know, I write longer editorials than any other editor in the world—and I've had over a thousand published down through the years. Long editorials? The 216-editorial 1997 reprint ran 260 pages! 1998 was only 248 pages, but that's because I reprinted one of the three-volume set in smaller type. They cover any subject I think should interest you.

Oh yes, in addition to my editorials, there's a complete ham radio magazine, with simple construction projects, reviews of new ham equipment, and a bunch of columns on special ham interests. Amateur radio has provided me with a lifetime of excitement and adventure, so I encourage everybody to get involved. The new no-code license is a snap to get for starters. Heck, we have kids of four getting their license and girls of eight getting the Extra, which is the top class license, so how difficult can it be? Once you're licensed you can talk with people anywhere in the world. And go and visit them, if you want to. On my recent visit to Iceland I met 28 of the local amateurs and we had a great party. But then I've partied with hams in South Africa, Kenya, Sudan, Lebanon, and countries all around the world. How about Nepal? Swaziland? Sabah?

These examples just scratch the surface of what Wayne has to offer, and these descriptions were taken from his website where you can get a much more detailed description of what Wayne has to offer.

reaction, so the hydrogen neutron is forced into the nucleus of one of the metal atoms, changing its atomic weight, making it a new element. For instance, let's take nickel, which has a weight of 58.7, picks up five nucleons, bringing it up to 63.7. Copper has a weight of 63.5, so that leaves 0.2 that is turned into heat.

By the time we stick that into Einstein's $E=mc^2$, the mass of 0.2 is multiplied by the speed of light squared, so the resulting energy released is enormous for a very tiny bit of matter converted.

The leading theoretician in the field, Professor Hideo Kozima, calls the process Trapped Neutron Catalyzed Fusion (TNCF), and he has done the field a great service by showing that the research data from labs all around the world all agree when this model is used for calculations.

And when we look at the nickel (or palladium) with an electron microscope after it's been used in a cell to generate heat for a while, we can clearly see the craters left where the mass has exploded, releasing energy (heat).

It's much like microscopic hot fusion reactions. And indeed, the temperatures involved in the conversion of mass to energy are in the millions of degrees, but only for a nanosecond or so, but it's enough to overcome the nuclear repulsion force.

This process of changing one element to another is called transmutation, and the old-line physicists and chemists get really upset when such a thing is suggested. Harumph, that's alchemy! Yep, sure is. Oh well, the scientific establishment has, throughout history, unfailingly ridiculed and fought every major new discovery. Please let me know if you are aware of any exceptions.

[*Editor's note: Shortly after the turn of the century, one of the other pioneers of quantum mechanics, Max Planck, said that the only reason science moves forward is because the current generation of scientists dies off, and the younger ones, having grown up with what was heresy to the oldsters, accept the new ideas!*]

Scientists at several universities are now taking elemental energy cells that have generated excess heat and are examining them with their mass spectrometers to see what new elements have been created, and they're finding a bunch of them.

Not that the transmutation of elements is very difficult to prove, even on your kitchen table. All you have to do is take two pieces of pure carbon and rub them together with an electric current passing through them. Save the carbon powder that rubs off and then check it with a magnet. Presto, you'll find the magnet moves some of the particles.

How come? Some of the carbon has been changed to iron. How'd that happen? Easy, simplifying the reaction described by the TNCF model, we have two carbon atoms (weight 12 each), plus two oxygen atoms (weight 16 each),

added together give a weight of 56, which is the weight of iron. Tell the physicists to stick that in their ear.

René, in his *Skeptic* book, showed how he and a friend transmuted elements when they inadvertently created a miniature volcano.

There's a great little book on the subject, *The Philosopher's Stone*. It's only \$10 and worth its weight in embarrassing your chemistry professor. (The author is Michio Kushi; the book is \$10 from One Peaceful World Press, Becket MA 01223.)

Successes With Cold Fusion & New-Energy Experiments

FALL, 1999 HAL FOX

As a professional scientist, I have spent the past ten years (plus), since the announcement of "cold fusion", tracking down, investigating, and reporting on a variety of proposed new-energy devices. Our group (Fusion Information Center and Trenergy, Inc.) has published hundreds of articles and collected, read, and reported on over 3,000 professional papers on various new-energy devices, systems, proposals, and theories. In a capsule, here are the results:

1. Cold fusion *does* work. Over 600 papers from over 200 laboratories in 30 countries have reported successes. However, none of the varieties of cold fusion devices (as yet) is robust and easily replicated, so there is no threat to the hot-fusion community.

2. The Cincinnati Group has shown both excess thermal energy and nuclear reactions from a special electrochemical configuration. The most important finding is the ability to reduce the radioactivity in some aqueous solutions.

We have replicated and extended this work in Trenergy's laboratory and have reported the results in a meeting of the American Nuclear Society. Some similar (but different configuration) low-energy nuclear reactions have been accomplished and fully reported by Professor George Miley, editor (until 1999) of *Fusion Technology*, the international journal of the American Nuclear Society.

This work is now being extended to the on-site stabilization of high-level, radioactive, spent-fuel pellets by the Trenergy group. This work is being performed with private funds so that the intellectual property rights are preserved. Several patents are pending.

3. The newest work of Prof. Ruggero M. Santilli has shown that a special type of underwater arcing can produce a combustible gas from carbon-containing wastes (sewage and other types of contaminated water). This gas can be produced to provide two-and-one-half times as much energy output as energy input to

create the gas. Patents are pending. The work is being supported and commercialized by Toups Technology Licensing, Inc. of Florida.

4. Dr. Randell Mills has shown that energy can be obtained by the collapsing of the hydrogen atom below its normal ground-state. For further information, including a paper presented before the American Chemical Society in early October 1999, see the www.blacklightpower.com website. Patents are pending.

5. Kenneth Shoulders (see US Patent No. 5,018,180) has shown how the use of high-density charge clusters can produce both excess thermal and direct electrical energy. Up to now, the devices have been small (about one watt per device). Plans have been made and private funding is being used to scale up these thermal and direct electrical output discoveries. According to the patent, the excess energy apparently comes from tapping the vacuum energy of space.

These are the unemotional facts about new energy. There are several other developments that could be cited. However, these are the patented (and patent-pending) discoveries that are being commercialized. In all cases, the research and development has been done with private funds (except possibly for some work done by Prof. George Miley). The US Department of Energy has yet to discover and officially announce these new-energy processes.

Anyone who desires to condemn all new-energy projects as fraudulent is, of course, either vastly misinformed or working under someone else's agenda. The genuine, new-energy development program is vigorous, scientific, privately funded, patented, and (as with the above items 3, 4, and 5) is being commercialized.

There is nothing that the new-energy detractors can do that will prevent the increasingly rapid commercialization of new-energy devices and systems. The most important aspect is the following: there is no need for government funding. Government funds only delay projects and add to paperwork.

The end result is that the Department of Energy will find it increasingly difficult to get funds for energy development when it has been so reluctant to fund anything but hot fusion for so many years. It has really failed in its assigned mission to develop new energy sources.

COLD FUSION CONSPIRACY?

The following is edited from a briefing paper by Hal Fox, President of the Fusion Information Center, submitted to an inquiry by the US Commerce Department's Office of the Inspector-General. The department is investigating complaints that the Office of Patents and Trademarks is not allowing any

patent applications for cold fusion or low-energy nuclear reactions to be processed beyond being rejected. - Ed.

BACKGROUND

As the director of the first research laboratory at the University of Utah Research Park, I was intensely interested in the March 23, 1989 announcement of cold fusion, called by the University of Utah administration (not called by Pons and Fleischmann). The announcement of a new source of energy was most exciting to me. That day I began the plans for trying to be of some help (systems engineering background, missile system specialist for several years). By mid-April 1989, we had organized the Fusion Information Center and obtained offices at the University of Utah Research Park.

By July 1989, we had decided that information-gathering and publishing such information would be our best role. Our first edition of *Fusion Facts* was published in July 1989 and continued as a monthly publication for several years before being incorporated as part of the *Journal Of New Energy*, a peer-reviewed, quarterly, scientific journal (abstracted from the first issue by *Chemical Abstracts*, the world's foremost scientific abstracting organization).

ATTACKS ON COLD FUSION

By the fall of 1989, it was apparent that someone had organized and was carrying out a campaign against the new technology of cold fusion. All of this was done in secrecy (except for the ERAB [Energy Research Advisory Board] Subcommittee). Here are the facts, insofar as we have been able to gather and publish them.

A subcommittee of the Energy Research Advisory Board traveled to various laboratories where successes in cold fusion had been claimed. If the researchers were measuring neutrons, they were told that it was background radiation. If the researchers were getting tritium, they were told that it was contamination. If excess heat was being produced, they were told that they didn't have proper calorimetry. Except for one small paragraph, demanded by one of the honest members of the committee, the ERAS final report was entirely negative about cold fusion.

An arrangement was made for someone in the Office of Patents to ensure that no cold fusion patent application was accepted for patenting (whether any type of coercion or reward was involved is unknown). Each person, as far as we have been able to determine, was sent the same information: a copy of a newspaper article from the *New York Times*, saying that cold fusion doesn't work, and a copy of the paper by 16 PhDs from MIT

[Massachusetts Institute of Technology] stating that they could not replicate cold fusion (this is the paper where the authors removed the data showing that they *did* get a small amount of excess heat).

A person (representing powers-that-be in Washington, DC) called many of the physics and chemistry departments at major universities in the United States. Here was his message as relayed to me from one such department: "If you have so much as a graduate student working on cold fusion, you will get no contracts out of Washington."

All editors of the major scientific journals were contacted and were instructed not to publish articles on cold fusion. All editors but one then set up barriers against cold fusion publication. The one editor who did not accept that type of instruction was Professor George Miley of *Fusion Technology*.

An amount of US \$30,000 (or \$40,000 according to different sources) was given to Random House to have a "hatchet job" done against cold fusion. The result was the widely acclaimed (by orchestration) book by Gary Taubes, *Bad Science: The Short Life And Weird Times Of Cold Fusion* (1993). For one knowledgeable about cold fusion developments, it is obvious that this book was a deliberate hatchet job.

In addition to the above well-orchestrated activities, some appointed or self-appointed scientists have been very active in traveling to conventions, etc., and doing their best to

challenge any positive cold fusion results. Two of these are (were) Dr. Douglas R. O. Morrison (CERN, Switzerland) and Professor John R. Huizenga (University of Rochester), chairman of the ERAB subcommittee (if my memory is correct).

One of the most active protagonists has been Robert Parks, with some association with the American Physical Society. (The current president of the American Physical Society denied in a recent conversation that Robert Parks speaks for the Society.) Parks was instrumental in preventing a recent conference from being held in a proffered auditorium in a government facility. Parks has an email list of many people in the Department of Energy and, about once a month or more often, sends out statements that ridicule any cold fusion or low-energy nuclear reaction experiments, papers, books, etc.

Please recognize that this anti-cold fusion program was a very well planned and orchestrated scheme to destroy cold fusion. These were clever and well-executed operations. We have been told that, were it not for *Fusion Facts* and its rapid exchange of information of successes in various parts of the world, cold fusion would have been dead. That is more credit than we deserve.

(Source: Hal Fox, President, Fusion Information Center, Institute For New Energy, Utah, USA; tel: 801-466-8680; email: halfox@mail.slkc.uswest.net; website: www.padrak.com/ine.) 

The Untold History Of America

by Ray Bilger

This book shatters the image that has traditionally been portrayed as American History, by exposing the high-level corruption that passes for business as usual in the Halls of Congress, the White House and throughout our entire Judicial system.

***The Untold History Of America* was written for the specific purpose of providing a high school textbook for all American schools that would educate students about the real nature of our national situation. With a clear understanding of things as they exist in reality, students will then be in a much better position to go on in life and do something to correct our current downhill course.**

This book is for those who want to know why America is the way it is today, where we went wrong, who are the responsible parties, and what we can do to bring back the American Dream our forefathers and mothers fought so hard to establish and gave their very lives to defend.

Special emphasis is placed throughout the book on the original inhabitants of America, the Native Americans. They lived for thousands of years on this continent in complete harmony and balance with the Earth. With their help we may yet be able to turn things around so that our tomorrows will be something we will all be honored to pass on to the children who are our future generations.

The first 16 parts of Ray Bilger's ongoing research are compiled into the book:

The Untold History Of America, Vol. 1.
Available from Wisdom Books & Press

Vaccination: An UnGodly Practice

Editor's note: The following message is more or less self-explanatory for those of you who are exploring religious and moral avenues to counter the kinds of vaccination strongarm tactics which are in full force at this time. In addition to an awakening population-at-large, we have all been hearing for months now, even on the controlled major print and broadcast media outlets, about the refusal of many, many military personnel around the world to accept vaccinations—no matter how ominously the coercion sales-pitch is made. These military people would rather lose their jobs, pensions, livelihood, and go to jail if necessary, than accept the latest “mandatory” vaccinations. What do you think they know that the average school nurse and parent doesn't?!

Dr. Horowitz has specifically asked that we share the following message with you. Len is certainly no stranger to the pages of this newspaper, having shared outstanding information with us on several occasions—and most recently giving us a “flu bug” update for the Front Page story of our January, 2000 issue. His scientific credentials are, to say the least, of the very highest calibre. Moreover, he has long championed The Truth and he has found it in some of the most interesting documentation this side of the secret Vatican underground archives!

In the event you are unfamiliar with Len Horowitz, D.M.D., M.A., M.P.H., he is a Harvard graduate, independent investigator, and internationally known authority in public health education. He has authored eleven books, including the dynamite Emerging Viruses—AIDS & Ebola: Nature, Accident, Or Intentional? and his most recent Healing Codes For The Biological Apocalypse.

Additionally, for those of you with access to the Internet, Dr. Horowitz's website address www.tetrahedron.org contains a wealth of information on diseases, viruses, illnesses, vaccines, and also has important links to other primary sources of cutting-edge information. If you would like to phone Tetrahedron directly to order any of Dr. Horowitz's books, or to inquire for other information, you may do so by dialing 1-888-508-4787, which is also good from Canada.

Otherwise, for more information regarding any of the books or tapes mentioned below, please contact: Tetrahedron Publishing Group,

P. O. Box 2033, Sandpoint, ID 83864; phone: 1-800-336-9266; fax: 208-265-2775; e-mail: tetra@tetrahedron.org; or visit their website catalog at: <http://www.tetrahedron.org> for some of the most astonishing, infuriating, and well researched information you will ever read on a number of health and medical subjects—information which may just save your life and the lives of your loved ones.

2/19/00 DR. LEN HOROWITZ

(with Pastor Norm Franz
and Errol Owen)

Many people believe that vaccinations are safe and “mandatory” for school and/or workplace attendance. They are clearly deceived in most cases.

Vaccines are not “mandatory” in most American states that allow for personal, religious, and/or medical exemptions. Furthermore, the practice of vaccination is far from safe. In fact, if you were to seriously consider the suppressed facts, you would likely conclude that the alleged benefits of vaccination do not outweigh the severe and extensive risks.

For parents who elect to forego these risks, in celebration to God and His blessings, among which are health and natural immunity, the following message includes *Bible* verses that should be copied and then attached to your vaccination waiver or declination form(s).

These *Bible* excerpts serve as a supplement to the ninety-minute audio tape entitled *Horowitz On Vaccines*. This tape provides a lengthy discussion of a citizen's right to refuse vaccination for spiritual and religious reasons. Ways to avoid vaccinations and assertively respond to coercive vaccine proponents and shot administrators are discussed. Moreover, the tape presents stunning admissions by vaccine industry experts, including 1998 Sabin Gold Medal of Honor awardee Dr. Maurice Hilleman, and others who admit to the contaminated and deadly nature of many of our most trusted vaccines.

Biblical support for those who wish to avoid vaccinations for spiritual and religious reasons include the following law prohibiting genetic engineering or the use of its products:

Ye shall keep my statutes. Thou shalt not let thy cattle gender with a

diverse kind; thou shalt not sow thy field with mingled seed; neither shall a garment mingled of linen [plant] and woolen [animal] come upon thee.

— *Leviticus 19:19*

Relevant reasons for God's warning in this regard include the fact that bovine (cow) fetal serum is commonly used in the manufacturing process of vaccines. So are monkey kidney cells, chicken embryo parts, bacterial or viral genetic materials, RNA and DNA, as well as yeast and human proteins.

Using the example of cows, bovine fetal serum is mixed with bacteria or viral particles and other vaccine ingredients, including toxic metals, such as mercury and aluminum, and immune-destructive chemicals. Thus, proteins and genetic materials from the cattle, viruses, and bacteria are mixed before these particles are injected into you or your children.

Once the vaccine ingredients, including foreign RNA and DNA, and genetically engineered bacteria and/or viruses, or their parts, enter your blood, they may cause genetic mutations of your cells. Then you have sown your bloodstream “with mingled seed” that not only taxes your immune system further, but may cause the development of cancer cells as well. These may go on to become full-blown cancers, particularly in the presence of a weakened immune system, made weak by vaccine “adjuvants”. Likewise, this cross-species transfer of infectious particles often initiates autoimmune diseases. These are major reasons why vaccination is “an unGodly practice”.

Your blood contains vital white blood cell “bodyguards” (i.e., lymphocytes) that provide for surveillance and destructive responses against cancer cells and malignant tumors. Therefore, overly taxing these cells, as vaccinations often do, is unclean and unhealthy. Elsewhere in the *Bible*, God recommends that you maintain your blood clean and healthy.

Integrating this knowledge further, some vaccines are made from “pooling” human blood taken from people, including social drop-outs and drug addicts, who were exposed to various infectious agents (e.g., bacteria and viruses). Once vaccine makers have these people's blood, their laboratory technicians separate their serum from the whole cells, and then this serum is used to make the final vaccines.

This was the case with the Hepatitis B vaccine that was given to gay men in New York City and Blacks in Central Africa in 1974. This vaccine, according to all the suppressed scientific evidence, as well as testimonies from insiders, most likely initiated the international AIDS pandemic.

In essence, the routine vaccine practice of sacrificing animals to grow infectious cancer viruses is obviously risky. This was the case for the cancer- and AIDS-linked Polio and

Hepatitis B vaccines.

Merck vaccine makers took dead or dying animal tissues, including their blood, in an effort to extract these infectious agents. Then they mixed these animal incubated contaminants with human blood. This blood ultimately got mixed to make the final vaccine. In this manner, cross-species transmission of infectious agents most easily and commonly occurred as it does today. According to the *Bible*, this is a sin.

There are several *Bible* references to the importance of maintaining clean blood. A few of these are listed below. It should be recalled that, as I detailed in my book *Emerging Viruses: AIDS & Ebola; Nature, Accident or Intentional?*, the Rockefeller family largely established and controls the international blood banking industry. Laurance Rockefeller, in particular, assembled the New York City Blood Council—the council of doctors that established the New York City Blood Bank.

This was the organization that allowed 10,000 hemophiliacs throughout the United States, and countless others around the world, to receive the AIDS virus (HIV) through their contaminated blood supplies. They knew, in advance, that the blood was infected with these viruses and others. More recently, the Canadian and American publics learned that Hepatitis C-contaminated blood (another cancer trigger) and protein “prions” (the “mad-cow” Creutzfeldt-Jakob disease agent) also flowed from these blood “bankster” labs to millions more.

It is well known that the Rockefeller family also established a virtual monopoly over the American medical and pharmaceutical industries as early as the 1920s. This was the same decade they heavily funded and directed the fledgling cancer industry, as well as the eugenics movement.

The Rockefeller-led eugenics effort began the study of human genetics. DNA differences between the races began to be mapped by their research foundations and organizations long before Hitler’s Third Reich got involved in what later eugenicists called “racial hygiene”. Rockefeller-funded research focused on the genetic predispositions for cancer and other diseases between various races of people. In 1928, the Rockefeller family fortune then built the Kaiser Wilhelm Institute for Anthropology, Eugenics, and Human Heredity in pre-Nazi Germany.

This Institute gave rise to the majority of Hitler’s top racial hygienists, including Ernst Rudin. Rudin later directed Hitler’s “Racial Hygiene Society”.

Stunningly, previously secret documents show the Rockefeller family was heavily invested in a partnership with Hitler’s Third Reich. Germany’s leading industrial organization during World War II was IG Farben. Top Farben directors were among

Hitler’s highest ranking SS officers. With the help of the Dulles brothers, and their Wall Street law firm, Sullivan and Cromwell, John D. Rockefeller’s Standard Oil Company secured the patent rights over the synthetic oil and rubber the Holocaust victims were about to produce in the factories they built adjacent Auschwitz and elsewhere.

It should also be known that IG Farben, Rockefeller’s intimate partner, held the patent on the gas that killed the millions of Holocaust victims as they entered the “showers” allegedly for “public health” and “disinfection”.

[*Editor’s note: And remember that the Rockefeller family, like the Rothschilds in England, were of Jewish extraction, which only makes The Truth behind the “official” version of the events in this dark chapter of modern history that much more interesting—and sad. Is it any wonder, then, that it is against the law in some countries (and a matter of great and noisy rebuke in others) to even dare to question the “official” version of such historical matters as the Holocaust? There are many yet-to-be uncovered skeletons in those dark closets!*]

The book and tape cited above also details the development of the 1974 experimental Hepatitis B vaccine that most likely transmitted HIV to New York City’s gay men, and Blacks in Central Africa. This vaccine was developed by the Food and Drug Administration (FDA), the Centers for Disease Control and Prevention (CDC), and the National Institute for Allergies and Infectious Diseases (NIAID). The project was directed by Dr. Maurice Hilleman, vaccine chief at the Merck pharmaceutical company.

Astonishingly, this company received a major share of the Nazi war chest near the close of WWII. At that time, the company’s president, George W. Merck, was America’s biological weapons industry director. He had been personally appointed by President Roosevelt and Secretary of War Stimson.

Following WWII, most of Hitler’s top biological weapons developers were secretly sent to work for the allies. Several infamous medical experimenters came to America under the covert operation called “Paperclip” administered by the OSS and later the CIA.

Among the Nazi transplants was Erich Traub and his assistant. This world-class cancer virologist, Hitler’s top biological weapons expert, was assigned to the U.S. Navy Biological Research Laboratory affiliated with the University of California. He was paid more than \$65,000 of U.S. taxpayer money (plus benefits!) to continue his nefarious genocidal weapons experiments for many years during the cold war.

Another fact worthy of considering is that today the Rockefeller Foundation, and the Merck Fund, whose parent companies were previous partners with Hitler, are leading funding sources for world “depopulation”. A gift-wrapped form of genocide, and a

continuation of their early eugenics efforts, today their work is positively heralded and allegedly needed for “population control”. These associations, their related histories, and ties to contemporary vaccine agendas, are deserving of investigations by governments around the world.

Following a storm of criticism by many Third World nations during and after international “population control” conferences, several U.S. Government officials decided to phase out institutionalized reference to “population control”. Newly chosen surrogates included the phrases “Family Planning” and “Maternal and Child Health”.

Could this be the real reason why “Family Planning” centers and “Material and Child Health” clinics allegedly “require vaccinations” and promote their use so ardently?

Given this alarming background, the following *Bible* passages have special relevance:

Lamentations 4:13-15 foreshadows the AIDS pandemic, and other current and coming plagues. It also relays the fear and avoidance surrounding HIV-positive and other infected, sick, and dying people. As you read the first paragraph, consider the fact that religious leaders are encouraging their followers to get vaccinated. Many are even inviting “public health” nurses and vaccine administrators into their congregations to deliver the toxic, and too often lethal, doses:

“It happened because of the sins of her prophets and the offenses of her priests (and rabbis) who, within her walls, shed the blood of the righteous. They wander in the streets like the blind; they are so polluted with blood that nobody is able even to touch their clothing.

“‘Keep away! Unclean!’ people shout at them, ‘Keep away! Away, don’t touch us!’ They flee, to wander here and there; but no nation allows them to stay.”

Ezekiel 3:18-20 provides a pretty good argument why it’s important to relay these facts concerning vaccines, blood transfusions, sin, and death:

“When I say to a wicked man ‘You will surely die’ and you do not warn him or speak out to dissuade him from his evil ways in order to save his life, that wicked man will die for his sin, and I will hold you accountable for his blood. But if you do warn the wicked man and he does not turn from his wickedness or from his evil ways, he will die for his sin; but you will be saved yourself.”

Ezekiel 5:17 provides another blood-related warning and prophecy that may relate to recent outbreaks, particularly the hemorrhagic fever virus Ebola. As documented in my book *Emerging Viruses: AIDS & Ebola; Nature, Accident or Intentional?* this virus was apparently produced by Litton Bionetics—America’s sixth leading biological weapons contracting laboratory:

“Yes, I will send famine and savage beasts upon you to leave you without children; plague and bloodshed will sweep through you; and I will bring the sword upon you. I, God, have spoken it.”

Luke 13:1-5 states that those who mix human blood with the blood of sacrificed animals are “sinners”. This is precisely what pharmaceutical industrialists do to many vaccines.

“There were present at that season some who told him of the Galileans, whose blood Pilate had mingled with their sacrifices. And Jesus, answering, said unto them: ‘Suppose ye that these Galileans were sinners above all the Galileans, because they suffered such things?’”

Finally, *Revelation* provides an “End Times” prophecy in which the kings, merchants, and wealthiest men of all the nations were deceived by “magic spells” or “sorcery”. Biblical references to the practice of “magic spells” or “sorcery” come from the Greek root word of “sorcery”—that is, pharmacopoeia meaning pharmacy. This “sorcery” is not only associated in the *Bible* with spilled and impure blood, but with the great plagues, and onslaught of deadly “beasts”.

Strong’s Concordance Hebrew root word for “beasts” is #2416 “chay” meaning “alive, raw (flesh), strong . . . appetite”; in the Greek Lexicon, the word #2342 for “beasts” is “therion” meaning “a dangerous animal, (venomous, wild) beast.” Thus, the Earth’s

greatest depopulation event is predicted to be associated with dangerous beasts and the great plagues. Could these “beasts” be bacteria, viruses, and pieces thereof—infectious microorganisms most insidiously spread throughout the world, most precisely and extensively, in contaminated blood and vaccines? That’s exactly what many experts say is occurring today.

Those who “fornicated” with the devil, and stole “the blood of prophets and of God’s people” would surely be severely judged by God in the last days. (See *Revelation 18:23-19:2*.) The *Bible* predicts that around the time “Babylon the great” falls, its deadly wine, also symbolic of blood, will flow out full of impurities into the “rivers and streams” that the *Bible* says are the Earth’s “people”. They will likely then be infected with agents, little “beasts”, associated with great plagues that will wipe out more than a third of the world’s population.

Indeed, a reasonable interpretation of these sections of *Revelation* includes the suggestion that vaccine/pharmaceutical/blood industrialists, all largely directed by the Rockefeller family and their friends, have deceived international leaders, merchants, and the wealthy.

Finally, in *Revelation*, God’s judgement and great wrath comes upon those who have worshipped these Babylonian idols above the Lord. Today, as modern medical science is idolized, and continues to dramatically alter the

gene pools of plants, animals, microorganisms, and humans, Babylonian scientists are destroying the perfection that God created over all the Earth.

Additional *Bible* verses of interest on these topics include:

“Or if I [Lord God] send a pestilence into that land, and pour out my fury upon it in blood, to cut off from it man and beast.”

— *Ezekiel 14:19*

“And when I passed by thee, and saw thee polluted in thine own blood, I said unto thee when thou wast in thy blood, ‘Live’; yea, I said unto thee when thou wast in thy blood, ‘Live’.”

— *Ezekiel 16:6*

“And the angel thrust in his sickle into the earth, and gathered the vine of the earth, and cast it into the great winepress of the wrath of God...and blood flowed from the winepress.”

— *Revelation 14:19-20*

“And I heard another voice from heaven, saying, ‘Come out of her, my people, that ye be not partakers of her sins, and that ye receive not of her plagues’.”

— *Revelation 18:4*

“The Lord our God...hath judged the great whore, which did corrupt the earth...and hath avenged the blood of his servants at her hand.”

— *Revelation 19:1-2* 

Wisdom Of The Rays: The Masters Teach

The expansive yet compassionate nature of the messages delivered in *WISDOM OF THE RAYS: The Masters Teach* not only challenges those already firmly committed upon the spiritual path, but also provide a serious first step to help ones who are just awakening to (and inquiring about) the magnificent Spiritual Transformation now sensed by many to be in progress upon this planet.

Volume I & Volume II

Preface & Introduction by
Dr. Edwin M. Young
(400 pages + 4 color photos)

“Our Elder Brothers from the Higher Realms of Creation are attempting to communicate with ALL of us at this time. Why? Take a look around you. The old ways of doing things aren’t working. Our planet is entering a time of massive, turbulent change and renewal. To put it bluntly: we NEED help! And that’s where this book comes into the picture. Yes, eventually ‘the Phoenix will arise from the ashes’ after this Great Cleansing process, but the ride could be quite a bumpy one, especially for those ill-prepared for what is to happen.

“Just how we choose to deal with such change is THE question each of us must confront. Yet confusion swirls everywhere upon Earth at this time. And restless searchers cry out for that which may help them cope with these truly challenging times ahead. Thus these messages courtesy of our most loving Elder Brothers from the Higher Realms of Creation who are but further along the same spiritual path we all must eventually walk.”

(From the Back Cover of *Wisdom Of The Rays: The Masters Teach*, Volume 1)

Preface by
Dr. Edwin M. Young
(500 pages)

The Indigo Children

An Interview With Co-Author Jan Tober

[Continued from Front Page]

some time. There are those who say that the “forerunners” to this modern-day phenomenon started being birthed as long as 20 years ago. Futurists, such as Gordon-Michael Scallion, have been speaking of their planetary entrance for some years now, labeled by him as the Blue Children. To Nancy Ann Tappe, gifted with the ability to see the auric field of the human body, they are simply referred to as Indigos.

These are very special children, tremendously gifted. Many of you have probably seen on television, in recent months, the angelic teenage opera-singer Charlotte Church. If ever there was a perfect example of a “musical Indigo”, she’s it.

What does the presence of these “super kids” mean? What is their message? What is their purpose for being here, right now? Is this

just a fanciful idea or a reality? What are the Indigos and what makes them “Indigo”?

Although it took some months to coordinate, on January 17 I was finally able to speak with Jan Tober, the co-author of the provocative book called *The Indigo Children*, about this fascinating subject. While my investigation into this matter could have remained “normal”—that is, rather academic and linear, in a traditional interview fashion—once appraised of the knowledge base and orientation of our readership, Jan Tober became comfortable enough in the conversation to open-up to some of the more spiritual, and some might say esoteric, aspects of this subject centered around these “little” gifts from Heaven.

The book, while merely an “introduction” into the subject, is one that every teacher and school administrator should be required to read. If you have a child who is “a handful”, if you have a child who has been diagnosed with Attention Deficit Disorder (ADD) or Hyperactivity (ADHD), then by all means go get and read this book! It should be in every library across the land.

Authors Jan Tober and Lee Carroll have done a great public service by also providing a comprehensive, free-access website. Here (at www.indigochild.com) they have collected information concerning alternative schools, health professionals, and a wide range of other useful information pertinent to the Indigo children and where to seek help or assistance, if needed. Their book *The Indigo Children* is available through most major bookstores, and the book’s ISBN is: 1-56170-608-6.

Jan Tober is also associated with another website (www.kryon.com) which contains channeled spiritual material which may be of interest to our readers.

When inquiring, during the interview, about “alternative” schooling for those economically disadvantaged Indigo families, you’ll see there was mention of a

particular group in Texas. However, after the interview, I received a call-back from Jan Tober asking me to include within this story the mention of a book called *Home Schooling Handbook*, by Mary Griffith, which has just come to her attention, and is available through Amazon.com on the Internet.

It is obvious that, in an hour and a half, we were only able to scratch the surface on this subject. But if you have been feeling there’s no hope for the world, you’ll get a definite “boost” from this story!

The great Master Teacher of 2000 years ago said: “Blessed are the children.” These children will be the guides to return us, as a world, to the path of love.

Turning now directly to the book *The Indigo Children*, we read:

[QUOTING]

Here are ten of the most common traits of Indigo children:

1. They come into the world with a feeling of royalty (and often act like it).
2. They have a feeling of “deserving to be here” and are surprised when others don’t share that.
3. Self-worth is not a big issue. They often tell the parents “who they are”.
4. They have difficulty with absolute authority (authority without explanation or choice).
5. They simply will not do certain things; for example, waiting in line is difficult for them.
6. They get frustrated with systems that are ritual-oriented and don’t require creative thought.
7. They often see better ways of doing things, both at home and in school, which makes them seem like “system busters” (nonconforming to any system).
8. They seem antisocial unless they are with their own kind. If there are no others of like consciousness around them, they often turn inward, feeling like no other human understands them. School is often extremely difficult for them socially.
9. They will not respond to “guilt” discipline. (“Wait till your father gets home and finds out what you did!”)
10. They are not shy in letting you know what they need.

[END QUOTING]

This is no small challenge for parents because, on top of all the normal requirements of parenting, these children take the matter a large step into the spiritual. That is: “Indigos come into this world with self-respect and an unshakable understanding that they are children of God. Your Indigo will be quite confused and dismayed if you do not have the same

knowledge that you, too, are a spiritual being above all else. Therefore, it is crucial that you respect yourself. Nothing turns an Indigo off faster than parents who do not earn their child's respect, but who instead give away their power and parental responsibility to the child."

—Melanie Melvin, Ph.D., from *The Indigo Children*.

With that said, let's move now directly into my discussion with Jan Tober on the subject of these wonderful, wild, provocative, and often exasperating "old" children.

Martin: Let's begin with a fundamental definition; exactly what are the Indigo children?

Tober: The Indigo children, the definition that we are sharing, that rings true for us, is: an Indigo child is one who displays a new and unusual set of psychological attributes, and shows a pattern of behavior generally undocumented before.

Martin: How did you arrive at the phrase "Indigo children"?

Tober: Indigo children comes from the color of the aura around these children. There's a dear friend of mine, whom I've known since the early 1970s, by the name of Nancy Ann Tappe. Nancy has authored a book called *Understanding Your Life Through Color*. It was printed in 1982. In that book, that is the first documented information about what she has "coined" the Indigo children.

How does she see the color? How accurate is it? Nancy has been diagnosed with a situation where two of her neurological systems cross, and it creates a situation where she, literally, can see the human aura. She's like a Kirlian camera, if you will, and she sees electromagnetic fields and the colors and the frequencies. She's a fabulous gal and a wonderful counselor and metaphysician and teacher.

She noticed, very early on, that there was another auric color associated with all those whom she'd been working with, who she had been studying, working on her Ph.D. with this project. It became apparent that this was not that infrequent, which gives us a breakdown that, basically, Nancy has said that from 1980 on, about 80% of the children born are Indigos. And, since 1995, we have a much higher percentage, so much so that we need to look at what's happening here.

Metaphysically speaking—and we do not say this in the book—and the reason that we do not say, in the book, what I'm going to say here is that we wanted this book to go out to the "mainstream" public. Because those are the people who had the least chance of hearing about alternatives and ways of working with these children.

We're seeing a new generation of Masters coming into the planet, and they have been called "Star Children", "Blue Children", and

through Nancy's work they are called, from our perspective, the "Indigo Children". They are our hope for the future. They are our hope for the present. And that is, esoterically, what's *really* happening.

We try to keep the focus as pragmatic as we can, because we've got a lot of parents out there dealing with very OLD souls, in very tiny bodies, who, in most cases, know more than the parents!

And then, what do the parents do with that? There are metaphysicians who still have some ideas of alternatives. Mainstream, I don't know where they go, except to our book and a few other books that are getting out there.

[*Editor's note: Sadly, at this stage of general un-awareness, many "mainstream" parents have fallen into modern medicine's drug trap for controlling their children. See the article at the end of this interview called The Ritalin Generation: Drugging America's Youth for some unsettling details. Of course the goal is to derail these formidable old souls into a useless stupor. How better to cancel out their potential threat to the dark, so-called "elite" crooks in high places who are attempting to keep we-the-people asleep so as to move ahead with their New World Order planetary control plans.*]

Martin: I'm sure you've been asked a lot of standard questions, and I'm not sure if my questions will be quite as standard. One question that I'm just curious about—I want to move right into some of the deeper aspects—but have you been surprised or overwhelmed about the response you've gotten since this book has come out?

Tober: Yes, and no. One is always a bit overwhelmed when they're in the middle of something that is in its perfect timing.

Martin: Good answer.

Tober: This information about the children came to me, intuitively, in the early '70s, about the time I met Nancy, without realizing that she would be so connected with this. Because at the time, she was not talking much about the Indigo children at all, but I would have dreams where children would come to me and they would tell me who they are, why they came, who their parents were, why they came karmically to be with these parents.

And it was fascinating. I would wake-up from these dreams and I would start being drawn to various babies and small children, and I'd look in their eyes, and I saw these little-bodied old souls. So, I would look around me and I would talk to my friends and say: "Have you noticed a difference, or is this just me?"

And they'd go: "Well, kind-of." You know? And then, of course, that progressed.

I knew this was part of one of the reasons that I'm here. And I know, from the work that Lee and I do, that it certainly is a part of his mission, if you will. So, from that aspect, I was not surprised.

I knew it HAD to be done. It was like two very powerful hands pushing me forward into that area of my life. And then, as we work with people—we travel throughout the world, so we speak to different continents of people. We've been doing that for about nine years, and over the last four years, I would say, there is such a frustration coming back and such an acknowledgement coming from parents, day-care workers, teachers, that they are working with some very unusual old souls.

And the question "What do we do?" is coming from the parents. And how on Earth do they help that child interface with the school system? There was so much frustration, and so much interest, that by the time we actually got the book out, we KNEW it's time had come.

Martin: Are you working on a follow-up?

Tober: Oh, gosh. (*Laughter*) Yes, Hay House has asked us to do a second book and, as a matter of fact, I will ask your readers to help us. It is what we call "warm and fuzzy" stories from parents about their Indigo children. If your readers would share their stories with us, I would really appreciate it. And I'll give them an email address, if they want to do that; also a Kryon email and website address.

Martin: And what is Kryon?

Tober: The Kryon email address?

Martin: This is different than the Indigo children address?

Tober: Oh! (*Laughter*) This is a whole other interview for you. Have you ever heard of the Kryon writings?

Martin: No.

Tober: Well, Lee and I don't talk much about this because, again, the book is aimed at the mainstream public for those parents who need help, who have their nose right up into a prescription of Ritalin. You know what I mean?

Now, concerning Kryon: Lee and I travel around talking about the writings and teachings of Kryon. Kryon is a Master from the Great Central Sun. Lee does live channeling, channeling Kryon much like Ramtha would be. That type of energy. And we have actually spoken at the UN for the last three years. He channels Kryon. And I also channel the feminine aspects of the Kryon entourage. I do the meditations. We do balancing. We spoke to 3,000 people last year, in France alone, for one day, the two of us. It's amazing. The work is, basically, centered around "we create our own reality", which is certainly not a new term, but it is our job to be clear channels for that information to come through repeatedly, to help people take back their power.

Martin: This is just an aside. Have you heard of the book called *China's Super Psychics*, by Paul Dong and Thomas E. Raffill?

Tober: That's who Drunvalo's speaking about?

Martin: Right.

Tober: People have been emailing us stuff about it, and Drunvalo promotes our book in his workshop.

Martin: Yes, he does.

Tober: And the information that I get is that these super-psychics are all Indigos.

Martin: I assumed that.

Tober: They're all Indigos.

Martin: And, I would imagine, the same thing is happening in just about every country, but nobody has written a book about it; they just happened to choose the ones in China.

Tober: Well, China is very interesting. According to Nancy Tappe—let's see, we just got back from our second trip to Singapore. Two years ago, the Kryon entourage, which I call them, because Kryon is not an entity. Kryon is an accumulation of the Archangels, the whole group focusing on helping us through Earth changes.

Martin: This is a subject our readers are very familiar with.

Tober: And I know your readers would be familiar with Kryon. The Kryon entourage created the energy, through the audience in Singapore, to open up a portal. This year we then had to go back and balance the portal out.

Nancy Tappe told me all children coming into Singapore would be Indigos, before I told her about the portal. And then, when I told her that I was instructed that Kryon would be opening a portal, that I needed to do a lot of clearing, cleansing, before we even started the workshop—

Martin: That makes sense.

Tober: —two years ago, she just smiled. She said “Well, of course. There you are. That's why it's in Singapore.” It was a bit of a challenge. I sent her to Singapore with our promoter to talk to some parents there, too. The trip was difficult for us in many ways, but very rewarding in the fact that we know we've helped become a channel for getting some of this movement going to help these souls come in.

You know, Rick, we're dealing, basically—the Masters are coming in as right-brained individuals, coming into a left-brained world.

Martin: Its gotta be tough.

Tober: I suppose you're hearing this as much as we are, but we're talking about the Divine Feminine coming in at this time. And not a moment too soon, may I add!

And the Divine Feminine and the Indigos go hand-in-hand. Who is to say where one starts and the other finishes off, or what came first? My feeling is that the Indigos have made the way for the Divine Feminine to be accessed. We needed a “critical mass”.

That's what the Kryon work is about, to get a critical mass going who accept that through their consciousness, their thoughts, through their words and deeds, they create their reality; hence, we could create the reality here on Earth called Heaven.

That critical mass needed to be up and running, as the Indigos were dribbling in, so that there was a frequency that was refined enough so that they could come through into the physical vehicle, and have a frequency environment where they could stay, where they wouldn't have to crib-death themselves out of here, or sooner [*such as spontaneous abortion*].

Martin: Along this line, I want to talk to you about the misdiagnosis of Attention Deficit Disorder (ADD) and (ADHD), and the use of Ritalin to drug these children. Have you encountered a lot of Indigos who have been drugged and, in your opinion, misdiagnosed?

Tober: Again, I work as an intuitive counselor. I do not work out in the area where a lot of my clients would put their children on Ritalin. They would go to alternatives, innately. However, in our audiences, which do have a bit of broad cross-section, we are experiencing where, maybe not our audience member would go that route, but they would say: “My sister-in-law's child, my niece, my nephew...”, where they are not the primary child caretaker. And it is so prevalent, for instance, when you look at—if I jump around, it is because I'm also intuitive, and a channeler, so sometimes we get a little bit of extra help here, so I'll just try to stay right on line.

Martin: That's fine. Take it wherever you're guided to take it.

Tober: Yeah, I will. I'm giving you a lot more information than I normally feel comfortable giving on, let's say, a call-in radio show. I'm thumbing through this book as I'm talking. I want to quote the percentages we shared in the book, about the increase in the production of Ritalin: “Ritalin production has increased seven-fold in the last eight years, and 90% of it is consumed in the U.S.”

The trend over the past few years has been clear: the percentage of children with an ADHD or ADD diagnosis, walking out of a doctor's office with a prescription, jumped from 55% in 1989 to 75% in 1996. And, if the truth be known, it's higher than that; but I'm not in a position to quote.

What's happening? What's happening is, we have a new paradigm of soul, of entity, coming into the Earth who are, primarily, right-brained. We have them being shoved into a left-brained society where, to be left-brained is to be honored; to be right-brained, i.e., the artist, the musician, dancer, painter, writer, is not to be honored, in this country, for instance, as much as it is in Europe.

So, they're coming into a left-brained world. To get your kudos, to get your strokes, to be really honored and respected, they have to try to fit into that. These souls, as Masters, KNOW the truth and know that we are now moving into honoring the right-brain mode, and they are a part of that.

So, they're not going to fit in, even if they choose to. They're here on a mission

lifetime—and that's a very important statement. They're here on a mission lifetime. They're NOT here to fit in. We are here to understand them, to learn from them, and allow them to teach us a new way of being.

Back to your question. Because they're new and different, where do doctors go? Where do parents go? Where do teachers go? They've got children who would appear to be hyperactive, who have a low attention span, who can't stand in line—all of the symptoms that fit into something like the chicken or the egg.

I mean, which came first: ADD or the child of ADD? It's fitting into a type of pattern. They don't know what to do with it.

Now, if Ritalin healed the process, it would be different. I don't want to get into an AMA discussion, but there are so many incredible alternatives that take, maybe, a little bit more work, but my goodness, is your child worth it? Shouldn't that be the most important thing?

So, there are so many alternatives to that. If the drug healed, then fine. It doesn't. It just prolongs. It just puts them into suspended animation. Eventually they've got to get off the drug, and they have to deal with whatever it is that they're dealing with.

I have a book on ADD and ADHD; it's *The ADD And ADHD Diet*, written by Rachel Bell and Dr. Howard Peiper. I want to include this, although your audience is very savvy, but just for us all to stop, take a deep breath, and think.

“People with ADD/ADHD lack sufficient supplies of neuro-transmitters, especially serotonin. Serotonin is manufactured in the brain in the presence of B6 and tryptophan. Tryptophan is an essential amino acid. If tryptophan and B6 are in short supply, the body cannot make serotonin.” I'm quoting from the book.

“Therefore, people with ADD/ADHD may require supplements of tryptophan and/or B6. Protein supplies amino acids to the body. If the body contains sufficient protein and tryptophan-rich foods, the supply of amino acids will not usually be a problem. The calcium/magnesium ratio is a key factor, also. Insufficient magnesium can result in high insulin levels, which reduce serotonin. Therefore it is necessary to insure an adequate supply of magnesium, in addition to B6 and amino acids.” It goes on. This is one of several books we recommend. This book is very short, and sweet, and concise.

[*Editor's note: Remember a number of years ago when, all of a sudden, there occurred a tryptophan “scare” of “tainted” product on the healthfood store shelves, especially from what was a particularly good supplier? All the tryptophan supplements quickly disappeared under hasty recall and FDA/AMA scare tactics over the major media. Many people had also found this to be a very*

good natural sleeping aid—it's what puts you to sleep after eating turkey. Considering the number of Indigo children who were known to be coming into the world, who would otherwise be a formidable threat to the New World Order crooks, maybe now it becomes clearer why those who orchestrated the disappearing act were so compelled to "protect" us from this supplement!]

First, we've got the Indigo constitution. We've got Indigo Masters coming in on a mission, saying: "We're going to help this planet shift into the Divine Feminine, one way or another. We're going to do it by coming in and being an example of love. You're going to learn how to treat us, and as you learn how to treat us, you're going to learn how to treat each other, with love." I mean, that's the bottom line to all of this. When we learn how to love, be with, parent, if you will, the Indigo child, we're learning how to operate at the highest level with each other. That's the bottom line, and that's what they're teaching us.

So, we've got ADD/ADHD, ok. We've got a new paradigm coming in. They carry a lot of what has been labeled Attention Deficit Hyperactivity Disorder. It doesn't mean it is. What we're saying to parents is this: please look at alternatives. We know it's challenging. That's why the book is out, so you can pick the book up and look at the list of traits, which I can go through, and I feel I should now, and you can see that maybe there's not something wrong with your child; that your child is part of this new paradigm.

Now, how do we work with that? That's what the book is filled with—healthy alternatives, from diet to techniques. There's a technique called sleep-talk, where you work with the child in their sleep state. It's very powerful and it needs to be taught. I'm bringing some teachers with me, as I put together Indigo workshops, who teach this. They've had a wonderful success rate with this, so far.

Proactive formula, heart-map—there are all kinds of choices that parents can look at. Does your child respond to this, to food allergies, environmental poisonings? We all have to get very, very savvy to all of this stuff, and these children are going to force us into doing it—for ourselves, as well.

Martin: Because I'm aware of the time restraints we have here, let me ask you: You have a fantastic list on your website of Montessori and Waldorf schools. And you talk about those as being excellent places for Indigos. What about those Indigos born into families that are economically disadvantaged? What do you say to people who just can't afford that kind of education?

Tober: There have been some wonderful results we've been hearing about with home schooling. There's a group in Houston, I believe there's about 40 families, maybe more, as of this interview, and they are successfully

working with home schooling. That might be an alternative. That, certainly, would be an inexpensive alternative, and they're getting wonderful results, and the children are walking right into Ivy League colleges.

I also know, within my heart of hearts, that there will be, I believe, other forms of schooling coming up that may be not as cost prohibitive to families who don't have a comfortable income. And I know there is such a huge interest in Indigos, and what we can do to help them, that there are a lot of educators now, who are also metaphysicians, who are joining forces and working at putting this schooling together.

I just worked with a client last week, and she asked me what did I see for her, and it was very, very clear that she was going to be working as part of this group. This was part of an intuitive counseling session that I did, and it turns out that she is ready to get her degree, and she does have people who are principals and vice-principals who want to interface with her. So, where there's one, there's many.

I know that books are stirring—this book, and there will be many more. I'm in the process of about four more at this time; one with Lee, and three or four with other people in various areas of education, health, who can get these books out and get the attention of the people, because we must make an inroad enough to make a "wedge of light" into the educational system and make space for these children, because now they are coming in such a high percentage that it can't be overlooked.

Martin: Are there any foundations or clearing houses for information, other than your website, for the Indigos? Is there a central place, or places, that are being established to study and work with these special children?

Tober: Not that we're aware of, but my information is that it will just be a matter of time before these are set up. It's too important and its right in our face; and it is the next step in our evolution. So it will be done.

Martin: You've been around a lot. You've been traveling a lot. What do you think people need to know? What is the most useful information that you can pass on to our readers about this subject?

Tober: There are two words that, if we could say nothing more to you, we would say, in the parenting of the Indigo child. In relating to the Indigo child, the two words are: *CHOICES* and *NEGOTIATE*. If you can remember nothing else, if you do not read our book, give them choices and negotiate everything. I mean, certainly, they're not to run rampant over you. But that is the parenting guide. If we can remember that they're here to teach us, that gives more of a balance to those words.

I want to share with your readers what parents can do to make a difference. In addition to giving them choices and negotiating

with them, you can make a big difference by guiding them, rather than giving them explicit directions. Treat them and interact with them as your best friend, because in truth, they are. Treat them with respect. Honor their existence in your family. Help them create their own disciplinary solutions. You'll be amazed as a parent what they will come up with. And give them choices about everything. Never belittle them, ever. This is just good parenting advice. If we wanted to be the perfect parent, we would say: "This is the list I will follow." So, they are very simply saying: "Now is the time, and you get to practice being the perfect parent. Now is the time on the planet to do this."

Always explain why you give them the instructions you do; never say: "Because I said so." Instead say: "Because this will help me today. I'm a bit tired today. I need some help from you" knowing that honesty will always win out with them because they're intuitive. They know what's going on, because you're thinking it.

Make them your partners in raising them. This is EXTREMELY important. This goes with choices and negotiation. Make them your partner. Let them know they always have a vote. Be PRESENT with them. And, of course, as a friend, as a grown-up family member, we ask always to be present when we're in a situation with people. I mean, that is "be here now". That's being in the moment, all of this metaphysical stuff. Metaphysicians innately know a lot of this. And explain everything to them, if you think they don't understand something—of course, we know that they DO understand at the soul level. And we know we can talk to them before birth.

If serious problems develop, and you feel you want to test them, do not say "Do not go to doctors." What you should say is: "Try some alternatives. Look at diet. Look at supplements. Look at nutrition. Look at homeopathy. Look at chiropractic. Look at polarity." We offer a list, a large list, and we offer access to alternative authors, alternative teachers who you can email, and ask, and take that even further.

Provide safety in your support. Avoid negative criticism. Encourage them in their endeavors. I mean, this is all stuff we know. An Indigo is not a follower. Let them decide what THEY are interested in, and what they want to do. Talk TO them, not AT them. That, basically, is the information we have found from therapists, from very conscientious parents, from Nancy's work, that seems to really help guide the Indigos.

They know who they are. They come in feeling and knowing. It does not serve us to try to mold them into a pattern that possibly we had to learn to break out of, the pattern of how our parents raised us.

There is a new way of being. There's a new way of parenting, and it's about moving

into love. The bottom line is love—being present and loving and understanding. In the months and years ahead, we're going to see school systems, we're going to see our types of areas, where we're going to get help as parents.

At an esoteric level—again, something I don't normally talk about on TV or radio shows, unless they are very holistic, but still, I would tend not to—is that the Indigos come from the 10th dimension. Considering we're in the 4th, moving into the 5th, and hopefully, many of us are in the 5th, moving and getting really comfortable with our ascension process, we've got these beautiful souls coming in from the 10th dimension.

The 10th dimension is about sound and color, and radiates this opalescence. As an intuitive, if you're intuitive, you can go in—if you're intuitive, and I believe most of your readers are—you can go in and ask to access that dimension. When you do, you will sense an opalescence, if you have clear ascension. That says a lot about, going back to, this honoring of the right brain, the honoring of the arts and honoring of the intuitive process, listening to the children.

Let their knowledge out. Let them know who they are, so they choose to stay. Create harmony in your home. Learn about cleaning space. Learn about sage-ing. Learn about preparing energy in your home—burning alcohol and Epsom salts—certain types of incense. Keep your home a clear temple, so that the child can come home, if they've had a difficult time at school, they can come home to a loving parent.

Even if you're tired, at least let them know and make some time to be present with them, so it's safe to come home to their buddy; and they can say: "Gee, mom, the teacher, I knew this was right, but the teacher didn't understand it." The parent can come in, not make the teacher wrong, but at least understand and be there, and be present, and listen to the child, and let the child know that the parent understands who the child is and that they do see things this way, and it is different and maybe challenging.

So you come home to a loving, present parent, and you come into an energetically clean home, whether it's the tiniest little apartment, or a very lavish, large home. It doesn't matter, if the energy is not made clean and kept clean through loving thoughts and through actually—physically and spiritually—cleansing the house. All of these things add to making it safe for the child, and easier for the child.

I am starting to do Indigo workshops, and I will be doing the first one in Indianapolis on February 4. I'm going to bring with me, always, some people who can show some techniques that we're getting wonderful results with.

Martin: Do you have anything scheduled for March?

Tober: As a matter of fact, I've done a workshop in Singapore, a smaller one, but this will be my first larger one. And, no, I don't have anything scheduled yet. I'm very open. We're working with a minimum of 50 people, so we can actually use a large home or a rec-room or a community church, something like that, and keep it small. This has got to be done, and this is something that I am very open to do.

Martin: Have you done much work in Europe? Have you gotten responses about Indigos in Europe?

Tober: Yes. We've worked in France. We only started a couple of years ago. We do get wonderful responses there. You have to remember, if the book isn't out yet, we wouldn't get a response. This last trip we had 3,000 people for one day, in France, just outside of Paris. They had just received, I believe, *The Indigo Children* book.

Our French publishers have also published *The Indigo Children* book in French, along with the Kryon books. The last Kryon book, called *Letters From Home*, had a chapter on Indigos. And of all the things that we've put together and written, that chapter received more interest, and more letters, and more questions than anything. So, wherever that book went, and it went around the world, we got queries.

Australia is very interested in it. They don't seem to have the same situations we do. We seem to have more problems here. But they still have a more intimate way of being in the family and being with their children there, just because of their very culture. We're not as able to be with our children—if you're out there working two or three jobs a week, and things like that. Australia is a slower-paced existence, and easier living.

We're going to England, Ireland, and Israel, and my feeling is that we're going to get a lot of interest, particularly in Israel, on the Indigos. I'm going back to France, again, so the book will have been out even longer. Yes, this is something that is happening. Certainly in Singapore and Hong Kong there is a tremendous amount of interest because they're English-speaking and they've read the book.

Martin: At the end of the book you have some information on the message that the Indigo's bring. Can you comment more about that?

Tober: Specifically, which part, Rick, were you talking about?

Martin: The message that they bring, the message of love.

Tober: Oh, yes! The message IS of love; it is of honoring that piece of us—again, I mention the Divine Feminine, which comes in and honors love, compassion, the intuitive process, all of the pieces that need to come together to make this Heaven on Earth—and they are here to show us, one way or another.

They are going to mirror to us what's happening. If we don't get it—which, I

personally feel, we are getting it—if we don't get it, it's going to be "in our face" and they're going to act it out in some ways that may be violent to us, saying: "Look at the violence in your computer games. Look at the violence on your films; we're manifesting this out." They're going to be a mirror for us, as Masters they will do that. So it's up to us to get it, and to take it and run with it, run interference, and make the way clear for them so that they can do their teaching through love, which is really what they want.

Martin: You talk about them as being "systems busters". What do you mean by that?

Tober: We were told, many years ago, that the first things that would break down would be the old, established institutions and systems. Do you remember that?

Martin: Yes.

Tober: We were told that, as we move into this New Age, this Golden Age—well, they don't fit into the mold—so they're right out there as those who will break, for instance, the educational system as it has been for a hundred years or so. They will not put up with something simply because that's the way it has always been.

So, knowing that we've got a large group of entities coming onto the planet, and that they are "system busters", it can really give you a pretty good picture of where we are going.

In my mind and in my heart, it's awesome. It's just so awesome to know that they're here working with us!

Years ago I would say to my friends, when I was having the dreams about the babies, I said: "You know, it's like we who are conscious are the 'rainbow bridge' from this civilization, from this group of entities, to the new group of souls coming in. We're the 'rainbow bridge' for them." It fills my heart with great hope.

We're seeing amazing things happen, and we who know who they are, can certainly help the parents who are having difficulty and don't understand. We can share with them our knowledge, as these little ones are getting old enough to speak for themselves.

Martin: Let's talk about using the old tricks of guilt and shame as behavior tools with these kids.

Tober: Won't work. It won't work. They know who they are. It will just frustrate, devastate the parents. It will bring in a very agitated energy-field around the parents and around the child, which will defeat any discussion, any real help. It just won't happen.

They KNOW who they are. They're on a mission. They are aware of that. So, this is a challenge, because we have a whole culture who have been raised on "You just wait until your father gets home!" I'm sure you probably heard that a few times. I heard that a few times, and that won't work!

I don't have children. I'm around them a lot,

but I can appreciate what parents must go through when they go back to the old modus operandi for parents, and find out that it doesn't do anything. The children will test them. The children will test them to see how far they can get.

However, these children are not brass. That is not in their consciousness. They will test the parent, in this respect, to see what the ground-rules are. How far can I do this? What can I do? What, really, is important to my parents? What isn't important? And they're going to learn to see how they can negotiate with the parents. So, if a parent comes back with a *negotiation* point-of-view, then they're going to be on the same page.

There's a story about a little boy. We were doing a workshop, and went to dinner with some of the people from the workshop. They had a little child. I would say he was somewhere in the "terrible 2s", 2 or 3, absolutely bright, an Indigo, so aware.

What the parents did was, when it was time for dinner, they said: "Johnny, it's dinner time. Now, would you like to sit in your high-chair, or your junior chair, or you can sit with us, here, or you can have your own little table". In other words, he looked, and he saw he had his choices, and instead of saying "I don't want to have dinner now", he came out and he picked where he wanted to sit. And he chose to be with the adults, because they interact so well with the adults, because look at who they are. And they had a very successful dinner with this 2- or 3-year-old at the same table.

So, it's quite amazing. It's quite amazing to see them in action. It's joyful to see them in action. And it's joyful when you see them in action with conscientious parents, who are coming from love, who certainly are coming from a mind/body/soul integration, through love. That's the bottom line.

Martin: Well, coming from the right brain, it's going to be interesting to see, in the years ahead, what kind of new professions open up as a result of these children.

Tober: And inventions, new ways of doing things!

Martin: I mean, it kind-of takes the old doctor, lawyer, fireman rut right out of the choice equation. (*Laughter*)

Tober: It does. And it's going to really move us into new ways of being.

And, you know what? Years ago, when we would talk about moving our frequencies and lightening-up our frequencies, and the planet is evolving and lightening-up, and we're going to move into this ascension process, and we all wanted to believe it. We all knew, in our hearts, it was the truth. But then it was very easy to get into "How is that going to happen?" And then, all of sudden, here's this whole, wonderful new group of Teachers coming in, and they will make it happen. So, it's ALL SOOOOOOOO PERFECT. We just gotta get out of their way! (*Laughter*)

Martin: (*Laughter*) Right. Have you had contact with many parents, who have Indigos, who are just totally beside themselves?

Tober: I've had a lot of mail from parents who are so thrilled when they read the book, and they knew that their children may not be sick, that they may be Indigos. Then they start working with a lot of the principles we talk about, find success in their parenting, and it's been a revelation to them.

And there are also emails from parents who are having problems, in many cases, with teachers, because they don't know how to interface with the school system—the parent and child, and what to do. But they're all helping each other, you know? They go on-line and they interact, and they offer each other solutions, and certainly ideas and alternatives, and the parents are helping the parents.

I feel that's going to be the way a lot of this is going to work. The parents are going to have to get real proactive, and put together support groups, where they can help each other because we're making it up as we go along here!

Martin: That makes a lot of sense.

Tober: Yeah.

Martin: You're in the Los Angeles area; is that right?

Tober: I'm actually in the San Diego area.

Martin: Are there groups forming down in your area on this topic?

Tober: You know, it still feels like it's a little new. What I do notice is that there's a lot of interest, and I feel that groups are starting to form throughout, at least, the United States. Remember, we don't do a lot of work in our area. So, I wouldn't know as much about this area as I would about the rest of the United States, and the email that's coming in.

Martin: Is there an area of the United States that you find is more aware or tuned-in for this subject than others?

Tober: Well, anywhere where you would have more metaphysical groups. Colorado is quite active.

Martin: That is one place that came to mind.

Tober: Any place where you're going to find a lot of people who are aware, you're going to find interest.

Martin: Do you find much awareness among family therapists?

Tober: Again, if they honor their intuitive process, yes. And, of course, in this area, we do have a lot of people who are counselors and do honor their right-brain, intuitive side.

This new book that Lee and I are writing, again, I want to just mention: If parents out there have some stories about their children—we call them "warm fuzzies"—that make you laugh or make you cry, that really emotionally will help other parents to relate to their children more, by reading these stories from parents who have Indigo children.

And, again, I think most of your readers

have [*or know!*] Indigo children. I think that would be a pretty safe assumption—or at least one out of their brood, if they have more than one child. And we would appreciate if they would send those in—to that Kryon email address I gave you would probably be best. We really need to get these stories in. I know it's going to make a big difference.

When you start reading about these children, and see the wisdom from the stories that we have already received, it helps parents emotionally. It really gives them help. They go: "You know, my child said something like that. Maybe I better look at my child being a little different than I thought." Anything that opens up the heart of the parent, and so I'm asking for parents out there to share their stories about their children.

Martin: You mentioned, when we were talking about *China's Super Psychics*, the book that Drunvalo has talked about—I have a copy here that I'm looking at while we're talking—you made a passing comment about China being interesting, or something like that, and then you went on. Was there something about China that you wanted to say?

Tober: About Singapore having the portal, because it's actually micro-Asia, Singapore, technically, but it's really in that corridor. Well, I'm being told right now that the reason it was Singapore is because Singapore is an island, and having water all around it, it was easier, once it was purified, to hold the space, rather than going into the mainland of China, for instance.

Martin: That makes sense.

Tober: So, again, that's quite esoteric, but I know your readers understand that.

Martin: Let's talk about Kryon. What is the Kryon message?

Tober: The Kryon message is that we create our own reality. The Kryon message is that love is the bottom line and love is all. These sound really "unusual"—I bet you've never heard these things before. (*Laughter*)

Martin: Oh, once or twice! (*Laughter*)

Tober: I think the Kryon message is, basically, Universal Truth, and it comes through Lee and I. Lee Carroll actually does the channeling, live, on stage. We deal a lot with the Earth changes. A lot of the work was to get us all through Y2K, and to change the consciousness about that, because there was so much fear.

Martin: A lot of fear.

Tober: And we had to counteract it by honoring our God-given power—for us to acknowledge the power of who we are—and to realize that we can create a critical mass where LOVE is in charge.

Enough people heard, enough people prayed and pray, enough people meditate, enough people envisioned the planet circled and surrounded with Love and Light, that the planet can go through these changes with a minimal amount of discomfort. That's,

basically, the bottom line.

[*Editor's note: As should always be the case when information is Truth, the above meshes well with many of Geophysical Commander Soltec's lessons about Mother Earth over the past many years, including his preliminary geophysical aside at the beginning of his general spiritual message in the recent January 2000 issue of this newspaper. If the receiving is accurate and truly coming from the Lighted Masters and other Hosts of God, there should be a great deal of overlapping agreement, and the messages should have strong positive, uplifting, and constructively instructive components overall.*]

Kryon is a magnetic Master, so he works with the magnetic grid. And, a lot of it had to do with—again, very esoterically—getting this planet's magnetic grids realigned, and buffering for any discomfort we would go through. Because “as above, so below”, as the Earth is realigned, we are realigned. It is the preparation for what some call “ascension”, which is moving into the next frequency range, where we walk on the planet in a manner where we actively acknowledge that we are co-creators with Spirit. And that as we change ourselves, we change the planet—we change the world, and we change it through pure intent. That we are co-creators with Spirit would be another “bottom line” point brought forth in the Kryon work.

Martin: Well, our readers can easily identify with that message! How have you found your reception to be at the United Nations—for example, speaking of Kryon.

Tober: Well, they invited us back three times, so it is always very surprising to us. We speak in one of the smaller rooms. We speak for SEAT, which is the Society of Enlightenment and Transformation, which is one of the charter

members, meditative members—which, of course, there were many originally.

So, it's a smaller group. It's about 75 people or so, and we're always amazed, when we're in the middle of the group, that we're in a room where major treaties between countries and leaders have been signed. And here we are, talking about ETs, bringing in a Council of Elders from the indigenous peoples of the world, talking about such things as it's time to look at what's happening with HAARP [*High-frequency Active Auroral Research Program*].

Martin: Yes, we're familiar with that.

Tober: We were honored and we're welcomed there.

Martin: Ok, let's shift back to the Indigos. What would you like to leave our readers with, to think about, with regard to this infusion of new energy in the form of these children?

Tober: If you had a knock on your door, and you opened the door, and you saw a great Master in your doorway, you would be honored. You would be joyful. You would be thrilled. And you would ask the Master in.

And you would probably sit down, thank him or her for coming, and you would say: “What is it you want me to know? How can I help you and how can I help the planet? What wisdom do you wish to share with me?”

That is the way to regard the Indigo child.

Martin: That's a good place to end. Thank you for a thoughtful and “inspired” interview. Our readers will truly enjoy this and I'm sure some of them will be contacting you!

Editor's note: For those of you who may wish to contact Rick Martin by email, rm888@mindspring.com is his new email address. 

The Ritalin Generation: Drugging America's Youth

Editor's note: The following timely report is closely linked to the subject of our Front Page interview just presented. To simply call what is going on a tragedy is to miss the point—that such can only happen because we ALLOW it to happen. No excuses, please, especially where the children are concerned!

Hopefully the influx of Indigo children at this time is sufficient to overwhelm such a diabolically directed agenda of incapacitation as is reported here. You can be sure that any statistics mentioned are merely the tip of the iceberg, since it is easy to mask or explain away (and thus hard to scientifically quantify) the range of subtle and complex interactions possible when such psychotropic drugs are part of the mind equation.

We give special thanks to The SPOTLIGHT newspaper for daring to present this information. If it makes you uneasy, then that's a good first step in the right direction. How did our country slip to such a point of sleepy acceptance where the outright drugging of our children is openly conducted and passively condoned on such a massive scale? The answer to that question is the same answer which applies to so many of the ills of our modern world.

1/7/00 F. C. BLAHUT

Drugging more than 2.5 million American children into a cooperative zombie state to

achieve classroom harmony is being questioned in some quarters.

Not everyone agrees that pumping children full of psychotropic drugs is the answer to all classroom problems.

For instance, the Colorado Board of Education recently passed a resolution to discourage teachers from recommending behavioral drugs like Ritalin and Luvox to solve classroom problems.

The action, according to published reports, has intensified a national debate over the growing use of prescription drugs for children.

The resolution, the first of its kind in the country, carries no legal weight. But it urges teachers and other school personnel to use discipline and instruction to overcome problem behavior in the classroom, rather than to encourage parents to put their children on drugs that are commonly prescribed for attention deficit and hyperactive disorders.

Proponents of the resolution, which passed by a 6-to-1 vote on November 11, said they were motivated, in part, by evidence that they said suggested that dozens of violent crimes, including the massacre last spring at Columbine High School in Littleton, Colorado had been committed by young people taking psychotropic drugs.

One of the teenage shooters at Columbine, Eric Harris, had been taking Luvox, an anti-depressant, although there is no evidence that the drug had anything to do with the shootings

or that a teacher recommended the use of the medication.

BROADER ISSUES

Patti Johnson, the school board member who organized a hearing on the issue and proposed the resolution, told reporters that a small number of teachers in Colorado had insisted on a child taking prescription drugs as a precondition to returning to class. The resolution, she said, was largely intended for them.

But the resolution reflected broader issues, as well, as parents, mental health professionals, and school officials debate the use of behavioral drugs by more than 2.5 million children in the United States.

Experts in mental health issues point out that children who take the drugs do so because they are having difficulties to begin with. They acknowledge that impulsive or violent behavior is a side effect in a small percentage of people taking the drugs.

Pro-drug forces, arguing that a majority of the children who use the narcotics are benefiting from them, contend that the Colorado resolution is irresponsible and perhaps even dangerous in that it could lead school personnel to ignore signs of serious mental disorders in children, and that it would discourage communication between teachers and parents.

DRUGGING YOUTHS

The use of Ritalin and other psychotropic drugs has steadily increased among schoolchildren, according to Children and Adults with Attention Deficit/Hyperactivity Disorder, a national nonprofit organization known as CHADD, in Landover, Maryland, a Washington suburb.

In Colorado, increased usage has turned a new focus onto the role that teachers and administrators play in the lives of students.

Johnson told reporters that, in the five years she has been on the board, she has received "numerous complaints" from parents who claimed a teacher had insisted that their child go on Ritalin or another drug before returning to class.

The board member cited the case of one girl who was showing signs of attention deficit disorder through mood swings and napping in class. She said the girl was later diagnosed with hypoglycemia and needed to change her diet.

According to the girl's parents, Johnson said, the teacher told them: "You need to get her a prescription for Ritalin."

DRUG-CRIME CONNECTION?

In addition to complaints from parents about insistent teachers, Johnson told reporters she was also motivated to propose the resolution by

the violent crimes involving young people, in which investigators said the perpetrators were using psychotropic drugs.

Accounts of those incidents also persuaded a Colorado state lawmaker, Penn Pfiffner of Lakeland, to hold a separate hearing on the prescription drugs issue, which, by coincidence, came two days before the school board voted on Johnson's measure.

Dr. Peter R. Breggin, director of the International Center for the Study of Psychiatry and Psychology, a nonprofit research organization in Bethesda, Maryland, also a Washington suburb, testified at both hearings and said doctors have become too eager to prescribe psychotropic drugs at the expense of conversations among parents, teachers, and children to learn why children are acting in antisocial ways.

Breggin said in an interview: "It's a tremendous mistake to subdue the behavior of children instead of tending to their needs.

"We're drugging them into submission rather than identifying and meeting the genuine needs of the family, the school, and community" Breggin told reporters. "It's wrong in principle."

Editor's note: This subject is far more

sinsiter and convoluted—if that's possible—than the above even conveys. In an upcoming issue of The SPECTRUM we expect to present an in-depth interview with Dr. Ann Blake Tracy—if she can stay a step ahead of those trying to silence her for having the courage to tell The Truth!

Dr. Tracy is the Director of the International Coalition For Drug Awareness, a nonprofit organization, and the author of The Prozac Pandora and Prozac: Panacea Or Pandora? She has often been called upon to be an expert witness, and has long studied the full range of drugs being given to our children and the adverse reactions to these drugs.

She has much to reveal about the drug links to the recent shocking school killings—matters you haven't heard about, naturally, through the carefully controlled print and broadcast media outlets. And to answer the question from those of you with a good memory, yes, we have already presented some information by this daring person in our September 7, 1999 issue of The SPECTRUM. But that information, as disturbing as it was, hardly scratched the surface of this subject—according to a recent in-person conversation between her and our Rick Martin. So stay tuned. 

News Desk Special Report:

MSG—The Deadly Mouth Aphrodisiac

Editor's note: In conjunction with our Front Page story, and especially the addendum about the massive drugging of our children with such as Ritalin, we present the following as an important, related News Desk Special Report.

Right up there with the flouridation and chlorination of our drinking water (which we will be addressing in a future article), is this most widely used, yet often cleverly disguised, poison in our food. We thank Dr. Overholt for bringing our attention to this through the interesting and often daring sightings.com Internet website.

While many of you are aware of the dangers of MSG through firsthand experience, this author covers a lot of the history and other typical, money-oriented shenanigans which explain how MSG managed to arrive at the "popular" position it now enjoys. The only important point missing from this otherwise fine article is taking the step beyond the usual money-making explanation for MSG's "rise to

fame" and including the more sinister and well-hidden "New World Order" goals of depopulation and people control through such as covert, poisoning drugs in our food and water—an agenda which circles back to the larger picture of our Front Page story.

Hopefully, if enough people raise their voices in justified outrage, at least an "honesty in ingredients" list may be achieved both for product purchases and restaurant decisions. When that is done, and consumers can actually start to make INFORMED choices about which foods they eat, it won't take long for the bottom line profits of many companies to speak loudly—and in a language they understand—about product changes which promote better health rather than simply make large profits.

2/6/00 JANET ALLEN
<janetplanetl@earthlink.net>

"The worst piece of information I have when I am in the midst of the reaction is that I

am going to live. I only want to die. It will not happen; I know I will live through this, and that's torture."

"I come across embarrassingly as if I have brain damage, even though I graduated from a good college, top of my class."

"If I don't make it, I don't eat it. I have to make everything from scratch. I can't eat in restaurants. It's just really pathetic and I'm really depressed."

What do the people who made these comments have in common? What devastating condition could they possibly be referring to, the one factor which makes their lives at times akin to a living hell?

The answer is a condition termed "MSG Symptom Complex" by the Federation of American Societies for Experimental Biology (FASEB), an independent body of scientists sponsored by the U.S. government's Food and Drug Administration (FDA) in September 1992 to review all available data bearing on the safety of the food additive Monosodium Glutamate and related substances. For a full one third of the U.S. population (70 to 75 million Americans), consuming this chemical (as well as the close relative Aspartame, also known as "NutraSweet" and "Equal") [*See update article in NEWS DESK about these.*] will result in mild to moderate physiological and emotional reactions.

For a small minority of people, accidental ingestion could prove to be severely debilitating and sometimes even life-threatening. What's worse, the *New England Journal Of Medicine* and *Science* magazine have both published articles linking Glutamic Acid and other excitatory amino acids (namely Aspartic Acid and L-Cysteine) to the development of various neurological diseases.

The FDA-funded FASEB report was in response to a set of laws on the books designed "to protect the public health, to prohibit the use in food of additives which have not been adequately tested to establish their safety".

In 1958, the Code of Federal Regulations (Title 21) established a Food Additives Amendment which subsequently required that manufacturers show "proof of a reasonable certainty that no harm will result from the proposed use of an additive". This included the Delaney Clause, which demanded a federal ban on any food additive shown to cause cancer when fed to either animals or humans.

At the Fourth Annual NOMSG (National Organization Mobilized to Stop Glutamate) Conference held in Los Angeles in October 1996, members flew in from all over the country to hear lectures by respected doctors, scientists, authors, and activists, receive legislative updates, medical findings, food and nutritional tips, and a chance to gain more information on how to cope with MSG sensitivity. The following attendees agreed to share their unique stories with us:

Erik J. of New Jersey has been experiencing symptoms since college. For a period in excess of 24-hours after ingesting MSG, Aspartame, or sulfites, he develops a cloudy head, faded memory, an inability to concentrate, and excess nervous energy. It has impacted his life enough to motivate this cross-country journey.

Kaye W. of Montana watched her infant daughter react negatively to MSG-infused babyfood back in the 1950s. Her own typical reactions have included stomach aches, swollen abdomen and gums, frequent urination, difficulty in focusing her eyes, and extreme "gallbladder pains" that have lasted for up to a week. In addition, her rectal and genital regions become highly irritated and inflamed, complete with hardening of the tissues and vaginal bleeding. After a particularly serious attack from eating an offensive salad dressing, her doctor even suggested performing a colostomy. After eliminating MSG from her diet, the condition resolved itself completely and surgery was cancelled. She happily lost 20 pounds within 2 months from this change in her food intake.

Natalie M. of Los Angeles suffers severe 12-18 hour migraine headaches that don't hit her until 8-10 hours after she has swallowed MSG. At that point, she can't ingest anything and even regurgitates her own saliva. Her ability to function plummets to zero until the reaction abates. It is a self-described nightmare.

Ten years ago, Pat Conway of Palm Springs, California would meet her mother for lunch every Wednesday at the same Chinese restaurant. By the end of the meal each week, like clockwork, she would become clammy and sick, plagued by diarrhea. Progressively over time, the symptoms became worse: chest pains, heart pounding, depression. The doctor diagnosed her condition as "panic attacks" and accused her of being a hypochondriac. Previously affluent and happily married, this "mystery illness" destroyed her relationship. Eventually she learned that she was acutely sensitive to MSG.

Today, a single bite of food laced with this flavor enhancer will trigger full respiratory arrest for Conway within 30 seconds. At a seafood restaurant, one nibble of shrimp cocktail (which the waitress had assured her contained no MSG) landed her in the hospital emergency room for 4 hours with a heartrate of 200 beats per minute, followed by severe depression.

In another instance, eating a little bag of flavored nuts during an airplane ride resulting in the stewardess having to drop her the oxygen mask. The numerous breathing crises she has endured have caused her to develop asthma. She's moved to a house only two minutes away from the E.R.

The paramedics have been summoned to her rescue so many times that she not only knows them by name, but has begun educating them and the hospital staff on this affliction of which

most medical professionals are largely ignorant. She feels it just as necessary to inform the general public, especially those employed in the food service industry. "People who work in restaurants are as much a problem as the problem. Because of my MSG sensitivity, they treat me like a space alien, embarrass me, tell me not to worry. They believe that my allergic response would consist only of a little itching and a few hives."

Los Angeles resident David Livingstone has been taken for a wild ride of his own on the MSG rollercoaster as a result of the food industry's lax attitude toward the problem. In July 1993, during a business lunch, he ordered vegetable soup at a Marie Callender's Restaurant after his waitress represented to him that it was free of monosodium glutamate. He had clearly advised her of his health concerns, after which she assured him that the chefs made all the soups from scratch daily.

Walking back to his office, he felt the symptoms of an asthma attack coming on. His inhaler did not provide him with the usual relief, so he promptly drove over to his primary care physician, who was a close 5 minutes away. Experiencing intense bowel discomfort, diarrhea, and profuse perspiration, it was there that he passed out and went into massive anaphylactic shock (a chemically-induced poisoning of the system), which triggered severe respiratory arrest.

Apparently, the MSG had triggered a response for his lungs to shut down. His doctor began applying CPR, which was then taken over by the paramedics who arrived to transport him to the hospital by ambulance. Once there, he went into full cardiac arrest and lost his pulse for 7 minutes. More CPR was administered, during which time some ribs were cracked.

After being worked on for an hour, David was finally resuscitated and stabilized. For the next 3 days, he was unconscious on a respirator in the Intensive Care Unit, then remained another 3 days in the hospital for observation and treatment. An MRI determined that there was some deadening of the grey matter of his brain due to Hypoxia (lack of blood flow to deliver oxygen). He still remains with a slight neurological deficit.

Back on his feet and more than a bit perturbed, this less-than-satisfied customer returned to the same restaurant to do a bit of investigation. Inquiring about the exact recipe of the vegetable soup, he discovered that it actually contained "beef base", a pasty, tar-like material on whose label MSG was clearly listed as an ingredient. Because soup is hot and liquid, the glutamate it contains is absorbed very quickly into the human system and causes a more severe, immediate reaction.

Because he claims his "near-death experience" was a direct result of Marie Callender's providing him with wrong

information, David Livingston initiated, in June 1994, a Products Liability and Misrepresentation Lawsuit against the company. Intending to protect other consumers as well as himself, he feels that “restaurants need to be more proactive in providing information about their food’s internal ingredients to sensitive individuals, especially those who ask.”

Restaurants making false allegations about their use of MSG may just be more the rule than the exception. Jack Samuels, who founded the Illinois-based Truth In Labeling Campaign with his wife Adrienne (both are MSG-sensitive), recounts the tale of an ABC news station in San Diego that investigated 10 different Oriental restaurants, each claiming they didn’t use any MSG. After a laboratory tested food purchased from each venue, the chemical was indicated to be present in all samples. A similar venture pursued by a New York station uncovered an equivalent amount of fraudulent claims by that city’s eateries.

David Livingston and ABC are not alone in their pursuit of honesty and integrity in the culinary MSG minefield: In 1988, a Pasadena, California District Attorney successfully sued Union Foods for mislabeling their Golden Ramen soups as containing “NO MSG”, when in fact it did. Under Section 403 of the Federal Food, Drug, and Cosmetic Act, the FDA has acknowledged that such a practice would be considered deceptive mislabeling of a product. A California Civil Code also permits such a lawsuit if a company makes untrue representations. The Japanese-owned company agreed to pay a \$153,000 fine and recall 455,000 cases of the soup.

In December 1994, a Citizen Petition was filed by the Truth In Labeling Campaign (in conjunction with 29 independent citizens, including 10 physicians) requesting the FDA take specific action. It asked that all processed foods be tested for the presence of glutamates and, if present, that MSG be identified and its amount listed in grams on the label.

It’s estimated that the total investment in these testing and relabeling procedures would be around \$3 billion, resulting in a price increase of only one quarter cent per product. When the FDA failed to respond within the prescribed 180 days, lawyers for the petitioners filed suit in Federal Court in August 1995. As the FDA first attempted to have the Court dismiss the Complaint, then was withholding important documents and evidence in their possession, the trial date has been continually postponed.

HOLD THE MSG!

If all this uproar over a simple seasoning has taken you by surprise, then pull out your chopsticks and get ready to burst a well-established bubble, for the “Chinese Restaurant Syndrome” has gone international. If you

thought the only place you had to exclaim “Hold the MSG!” while ordering a meal was at your local chow mein eatery or egg roll takeout joint, read on. Its presence has spread like a virus, in epidemic proportions, into almost everything we eat (at least anything that’s “convenient”), and we’ve all been fooled.

This article is to shed light on the deleterious effects of Monosodium Glutamate, a dangerous “excitotoxin” which is currently used in some form in almost every single processed, pre-cooked, and pre-packaged food manufactured today, whether frozen, canned, boxed, or dried. Not always detectable by examining the product label, it may be hidden under any one of a number of seemingly innocuous, even wholesome and healthy-sounding ingredients. So buyer beware, as it may not always be where you expect to find it.

A WOLF IN SHEEP’S CLOTHING

If ever there was a wolf in sheep’s clothing, this was it. Until recently, the wool had been pulled securely over the eyes of even this health food advocate, and I was adamant to reverse the damage now that my blindfold had been lifted. I had just finished devouring two incredible books on the subject, and this powerful new knowledge inspired the activist in me to take my first action. Armed with a bag of product “rejects” in one hand and a list of food additives in the other, I ventured into the grocery store and sniffed out the customer service desk, determined to take advantage of the company’s “satisfaction guaranteed or your money back” policy. (Many supermarkets and health food stores have such policies in place, even if the products have been opened or used.)

I knew it would be the first time that a customer returned items because they contained not just MSG, but “hydrolyzed vegetable protein”, “natural flavorings”, “corn syrup”, “barley malt”, or “calcium caseinate”, so I came prepared—documentation close at hand—to explain the whole story should any argument ensue. Surprisingly, the manager quickly and cheerfully refunded my money, casually commenting, “So you’re allergic to MSG, huh?”

Allergic? Tip of the iceberg, I thought. Try brain cell destruction; try Alzheimer’s Disease; try neurodegenerative ailments. If he only knew the extent to which I yearned to spew two volumes worth of statistics, scientific data, and case studies at him like so many cognitive bricks, shattering an ignorance that permeates the food industry and consumers alike. Because although approximately one-third of all Americans are sensitive to MSG consumption, reacting with symptoms running the gamut from fatigue, headaches, nausea, and diarrhea, to heart irregularities, asthma attacks, and depression, the down-and-dirty bottom line of this excitotoxin’s detrimental effects on the human organism is devastatingly simple:

Consumed over a long period of time, in great enough quantities, monosodium glutamate poses a serious threat to one’s physical, mental, and emotional well-being.

Like a cobra curled up in a basket, this toxic substance has insidiously slithered its way into the cuisine of an entire generation and waits, coiled and silent, ready to pounce on even the most unsuspecting victim. Its venom, its poison accumulates invisibly—a predator that may strike now or later, sparing some fortunate individuals, striking others without warning. So, Mr. Grocery Store Manager, no, I’m not allergic to MSG in the classic sense (as far as I know, although I don’t keep track of every headache or bout of minor depression), but yes, I definitely am allergic to death. So give me my money back, please.

AT THE ORIGIN OF FLAVOR

Who would have dreamed that at the root of this whole fiasco was an innocent little piece of seaweed? For thousands of years, Japanese chefs had been spicing up their cuisine by the simple addition of a flavor-enhancing ocean plant called “kombu” or “sea tangle” (*Laminaria japonica*), which can still be purchased in many specialty or natural foods outlets. A chemistry professor at the Imperial University of Tokyo named Kikunae Ikeda began to investigate this seaweed’s amazing, yet mysterious, qualities, and in 1908 was successful in isolating its active ingredient as the sodium salt of the amino acid Glutamic Acid, or Monosodium Glutamate.

Aware that a potential treasure chest sat bubbling in his test tube, Ikeda quickly patented his newly discovered food secret and teamed up with another enterprising businessman, Saburosuke Suzuki, to form the Ajinomoto Company (literal translation: “At The Origin Of Flavor”). Their intention was to synthesize this substance in the laboratory and introduce it to the world in a massive campaign of development, marketing, and distribution. By 1933, production had escalated to 10 million pounds yearly, and “Ajinomoto” (the term is used interchangeably with MSG) was the Orient’s most popular seasoning.

Its consumption has doubled in every decade since the 1940s, with the United States alone using in excess of 80 million pounds annually. Additionally, this figure fails to include the enormous quantities of hydrolyzed vegetable protein used (an ingredient also produced by the Ajinomoto Co.), which contains between 12-20% MSG and is mixed into everything from canned tuna fish to baby food to those vegetarian meat substitutes you thought were safe. Today, this same company is responsible for manufacturing more than half the world’s supply, and has managed to make it a staple within the processed food and restaurant industries. What wheat is to bread, MSG is to

almost anything in a box, bottle, or can.

STOWAWAY IN OUR FOOD SUPPLY

“How can this be?” you ask. You are an avid label reader at the supermarket, and very few products have Monosodium Glutamate listed as an ingredient. Due to the fact that this additive was proven harmful years ago and has a negative reputation in the minds of countless individuals who are highly sensitive to its effects, MSG is cleverly disguised beneath a myriad of deceitful monikers that the average consumer wouldn’t blink twice at. Therefore, under such bland generalizations as “natural flavorings” (which may contain 20-60% MSG), “spices”, “seasonings”, “broth”, “gelatin”, or “bouillon”, one may stumble upon the Glutamate snake coiled up in its basket, waiting to thrust a concoction of unpleasant symptoms onto its unwary dinner guests.

It may be injected into poultry or lurking within the cured tobacco leaves of that cigarette you’re taking drags on. It sneakily snugs within the grains of the myriad baked goods enhanced with malted barley (added to most flour to help it rise) or the yeast used for the same purpose (Red Star Yeast consists of 9-11% MSG).

This free-form Glutamate does occur spontaneously in some whole unadulterated foods, such as tomatoes, mushrooms, potatoes, grapefruit, and parmesan cheese. However, consumer groups want to make it crystal clear that this natural form of free Glutamate is not dangerous and does not cause adverse reactions in people allergic to MSG.

According to Mrs. Wanke, a spokesperson for NOMSG: “The FDA is purposefully clouding the issue and deceiving the public by comparing the naturally-occurring Glutamate found in some foods to the kind that is chemically added or created during processing.” It is the breakdown of proteins during any of a number of manufacturing procedures (pasteurization, fermentation, enzyme modification, hydrolysis, protein fortification, chelation, etc.) which poses the risk to humans.

Jack Samuels of the Truth In Labeling Campaign compares it to breaking apart a pearl necklace, on which is strung a long chain of bonded amino acid beads, after which they fall off into “free form” units and lose their relationship to each other. He relates that “some neuroscientists feel that perhaps hydrolyzed proteins are worse than pure MSG because in effect you’re ingesting a ‘neurotoxic amino acid stew’ containing Aspartic Acid and L-Cysteine as well as Glutamates.”

Most people learn to live with the minor physical reactions, which may occur daily or regularly if one’s diet consists even in part of processed or fast foods. They attribute their discomfort to stress, lack of sleep, the weather, or the flu, coping with the pain by merely

popping an aspirin or antacid whenever symptoms strike. In the scheme of things, a cramp here, a wheeze there, an itch or ache elsewhere, may easily be overlooked, but snap together all the pieces of the MSG puzzle and what materializes is the partial crippling of a substantial slice of this planet’s population.

A minimum of 20 million people in the United States, and in excess of 100 million worldwide, experience prominent reactions. Thirty percent of the population will react when given 5 grams MSG (an amount easily consumed in one day of eating convenience foods) and 90% when administered 10 grams.

So why does the FDA continue to allow this substance to inundate our food supply when over 10,000 individual case studies have proven its danger? Because, having an undeniably suspicious allegiance to the large pharmaceutical and chemical industries, the FDA has decided to ignore documented incidents by passing them off as “anecdotal” evidence and, therefore, scientifically invalid. At least four of the eight men on FASEB’s expert panel had conflicts of interest (MSG industry connections), and even though the original study was advertised as an independent review of existing data pertaining to Glutamate’s safety, some important data were omitted, and other data were distorted.

This was not the first time the FDA’s sources were less than impeccable. An early 1970s committee set up to evaluate MSG in baby food included toxicologists from DuPont and Dow Chemical, as well as scientists tied to Gerber Products and the International Mineral and Chemical Corporation (producer of Accent and 80% of the MSG sold in this country). Yet another “expert” had acted as an industry spokesman on behalf of the Grocery Manufacturers’ Association.

WIZARD OF AHHS

An entire economy revolves around the MSG phenomenon, and the multi-billion-dollar industry at stake has a huge investment in protecting its reputation. As most people are aware, addictions are big business, and greedy corporate empires have more than once been known to sacrifice human welfare for the sake of profit.

Whether the fixation is tobacco, alcohol, sugar, sex, or the almighty tastebud, human beings (my friend calls us “pleasure units”) on the warpath toward sensory fulfillment will always be easily manipulated by the propaganda geniuses of our day. So just who is the Wizard of Ahhs (as in: “Ahh, that sure tastes good!”) lurking in the shadows behind the MSG stage show?

The conspiracy to keep consumers in the dark about the hidden forms of MSG and its deleterious nature has been waged by the food industry itself in conjunction with a special

MSG lobby group (so what’s new?) titled The Glutamate Association. Composed of representatives from major U.S. food manufacturers in addition to (surprise, surprise) the Ajinomoto Company, these powerful monied interests have banded together to fight anyone who would dare criticize their precious seaweed derivative. So if their synthesized chemical neurotoxic time bomb happens to interact with your personal human organism in anything less than a fortunate manner, well, that’s just par for the course.

TOO GOOD TO BE TRUE

In 1948, the first symposium was held in Chicago to introduce Monosodium Glutamate to such companies in attendance as Campbell’s (as in soups), Nestlé, General Foods, Libby, Borden, Pillsbury, Oscar Meyer, United Airlines, and the National Livestock and Meat Board. The almost-too-good-to-be-true, flavor-enhancing attributes of this substance were described: its ability to intensify existing flavors and increase odor appeal without contributing a strong aftertaste of its own; suppress undesirable bitterness or sourness; remove the tinny taste from canned items; provide a meaty, chicken-like flavor; add zest to low-fat, diet, or bland foods; mask inferiority in quality or freshness; and remove the stale or spoiled taste from frozen or mass-produced meals (as in cafeterias).

Needless to say, the bait was irresistible and the big fish bit. The far-reaching consequences of this eight-hour event to revolutionize American food processing and adversely affect the future health of many millions of its citizens was at that time unforeseen. Over the years, as the use of MSG increased, evidence began trickling into the scientific community that something was gravely wrong. The first case studies were ridiculed, ignored, or swept under the rug. Today, the tragedy of this spiking of the American food supply has become crystal clear.

TOXIC TIME BOMB

Almost 30 years have elapsed since physicians and scientists began publishing well-documented accounts of serious, even life-threatening effects from the ingestion of small amounts of MSG (as served up in a bowl of won-ton soup containing only 2.5-3 grains). In sufficient quantities, it is toxic to everyone (the degree of reaction depends upon individual tolerance levels and dosage), but for those who can’t metabolize it effectively, it acts like a poison that can trigger a combination of gastrointestinal, neurological, and psychological symptoms.

It has a peripheral effect on blood vessels and the lower esophageal sphincter, on the brain and central nervous system. Particularly severe reactions in some individuals can mimic those signaling a stroke (slurred speech, loss of

balance) or heart attack (pressure in chest area radiating to the arms and neck); produce disabling, arthritic conditions in the joints and tendons; debilitating migraine headaches; severe hives or rashes appearing to be “atopic dermatitis”; acute asthmatic episodes requiring hospitalization (artificial ventilation and cardiopulmonary bypass); and prolonged attacks of depression requiring psychiatric intervention.

Considering that 100 million persons worldwide suffer from clinically recognized depression (with teenage and childhood suicide rates on a drastic upswing), and that asthma has been identified as “the leading cause of absenteeism among schoolchildren” by the National Institute of Allergy and Infectious Diseases, it’s urgent that health professionals begin considering whether MSG toxicity might in certain cases be the real culprit.

THE SPICE OF DEATH

MSG intolerance is not merely an allergic reaction, but demonstrates a classic toxic reaction, a true drug effect. Technically, it can be classified as a drug since it initiates changes in the physiology and functioning of tissues and organs while fulfilling absolutely no therapeutic purpose. In essence, Monosodium Glutamate works by tricking the body.

In his book *In Bad Taste: The MSG Syndrome*, author George Schwartz, M.D. describes the substance as a “mouth aphrodisiac”. The brain resembles a television set receiving a variety of signals. MSG placed on the tongue increases the sensitivity of our taste buds and feeling receptors, stimulating electrical discharges and creating a more intense picture.”

In addition, Glutamates act as excitatory neurotransmitters which stimulate brain cell activity. In *Excitotoxins: The Taste That Kills*, neurosurgeon Dr. Russell Blaylock presents the latest research findings to illustrate how exposure to this class of chemicals (including MSG and other glutamates, Aspartame/Nutrasweet and other aspartates, and cystoic acid/cysteine) can damage cerebral nerve cells: “When neurons are exposed to these substances, they become very excited and fire their impulses very rapidly until they reach a state of extreme exhaustion. Several hours later these neurons suddenly die, as if the cells were excited to death.” In the May 1997 issue of *Food Science* magazine, contributing writer Shirley Corriher confirms: “there is evidence that glutamic acid is responsible for 75% of the excitatory transmission in the brain.”

What’s more, the devastating implications extend into the realm of our offspring’s health: “Experiments will demonstrate that glutamate and other excitotoxins can alter the way the brain is formed during development.... Exposure to these powerful compounds early in life could cause developmental brain defects that would produce learning difficulties and

behavioral problems as the child grows older...[and] may contribute to violent behavior as well.”

Suspensions are mounting that the recent increased incidence of hyperactivity and attention deficit disorder (ADD) in children may be attributed to the widespread use of these toxins as food additives, and they may play a major role as well in a whole group of degenerative brain diseases in adults (especially the elderly) including Parkinson’s, Alzheimer’s, Huntington’s, and Lou Gehrig’s Disease (ALS). Even an FDA-sponsored FASEB report (the scientific panel mentioned earlier) released in July 1995 finally concluded that, due to the controversy relating to the safety of Glutamic Acid, they suggested it prudent that supplements containing MSG not be used by: infants, children, pregnant women, women of childbearing age, and people with affective (mood) disorders. Yet not only did the Food and Drug Administration suppress this finding, they then approved a new chicken pox vaccine containing two sources of the chemical—Glutamic Acid itself, and hydrolyzed gelatin (vegetarian parents take note)—thereby indiscriminately advocating it for the very young as part of a standard, aggressively prescribed medical procedure, when expert opinion exists that it could be dangerous to exactly these recipients. So much for child protection in America, from C-note to shining C-note. Do money and corporate influence ever stop talking? Apparently not.

IN THE MOUTH OF BABES

As far back as the 1950s and ’60s, the data started rolling in. Although I do not condone any kind of vivisection or animal experimentation, I will present some startling observations from which you can draw your own conclusions. I don’t believe these experimental results can necessarily be applied to humans, nor do I believe they are ethical.

One of the first major indicators that implied an MSG-disease link occurred in 1957 when Dr. D. Newhouse and Dr. J. P. Lucas noticed that baby mice forced to ingest glutamates experienced rapid, irreversible destruction of the majority of the nerve cells in the inner layers of the animals’ retina (the visual receptor cells of the eye) within minutes of exposure. Coincidentally, an ophthalmology conference held in Chicago last year (1996) found that people stricken with Glaucoma happen to contain anywhere from 10 to 50 times as much glutamate in their eye tissue as persons without Glaucoma, and their optic nerves are being destroyed at a much faster rate.

In the late 1960s, John W. Olney, M.D., a neuroscientist working at the Dept. of Psychiatry at Washington University in St. Louis, repeated Lucas’ and Newhouse’s experiment on neonatal mice and, upon

examining their brains, discovered that specialized cells in the hypothalamus (the area critical for both memory and learning) were destroyed after a single dose of MSG. Brain lesions also appeared in an infant Rhesus monkey.

Obesity, behavioral disturbances, endocrine changes, stunted bodies, seizures, and infertility in the test animals were also reported. (Leading Edge Research makes an interesting comment in their literature on Glutamates: “If MSG could solve the rodent population problem, it could also help solve the population problem for humans—in theory, that is.” Could the spiking of the American food supply with this chemical possibly be contributing to the widespread epidemic amongst men of low sperm count?) In all species tested, immature animals were found to be much more vulnerable to MSG’s toxic effects.

Dr. Olney was shocked to learn that the concentrations of this substance added to commercial baby foods was equal to that which created brain lesions in the experimental models. After the Food and Drug Administration refused to take action, Dr. Olney testified before a Congressional committee and finally succeeded in getting food manufacturers to remove MSG from their infant product lines. Ironically, they simply substituted a more dangerous ingredient in its place: hydrolyzed vegetable protein (HVP), which contains three known excitotoxins. (HVP, though advertised as a safe, natural, plant-based protein, is actually a mixture made from “junk” vegetables unfit for sale.)

The extraction process involves boiling them in a vat of acid, then neutralization with caustic soda. The resulting brown sludge, extremely high in glutamates, is scraped off the top, dried, and sold. Then we eat it. (Yucch!) Shamefully, millions of school children are fed cafeteria meals laced with these poisons on a daily basis, and we wonder why there is a marked decline in scholastic performance, concentration, and discipline in the classroom.

Who is protecting the innocent from this chemical bombardment? According to one government official: “There are no federal regulations or policies which prohibit or limit the use of monosodium glutamate in the National School Lunch program or any of the U.S. Dept. of Agriculture’s federally funded programs.” ’Nuf said.

Once again, good conscience must fall on the shoulders of ordinary citizens uniting in grassroots coalitions. The Feingold Association, a children’s advocacy group focused on reducing dangerous color additives in food, wholeheartedly supports NOMSG’s efforts.

SPREAD THE WORD!

If you want to further your knowledge on the subject, please contact: The NATIONAL

ORGANIZATION MOBILIZED TO STOP GLUTAMATES at 1-800-BEAT-MSG, or see their webpage at <<http://www.nomsg.com>>. They have an active membership and publish a quarterly newsletter. The Truth In Labeling Campaign may be contacted at: P.O. Box 2532, Darien, IL 60561; phone: 312-642-9333. To order the books mentioned, Health Press may be reached at 1-800-643-BOOK.

Since MSG sensitivity increases with age, we may all eventually find ourselves in a position of having to become food detectives and legislative advocates in the quest for health freedom and personal choice. For now, we have a few courageous individuals to thank for helping to protect the rights of all American citizens—folks like the Samuels in Chicago who are fighting for stringent labeling laws,

and like David Livingston who awaits his trial against a major restaurant chain.

Armed with a new understanding after his July 1993 brush with death sparked by that Marie Callender's bowl of soup, he warns all consumers to be aware: "The bottom line is, do you really know what you're putting in your mouth when you buy food? Where it's been, how it's been processed, what it has gone through to get to your plate? The answer is that, especially at restaurants—more so than with food you buy at supermarkets, where at least you have a listing of the ingredients—you really have no clue."

Let's take a clue from these pure food pioneers. Become an informed, discriminating consumer. Take action, take control, take charge of your future and your health! 

was in charge of creating the federal recognition process in 1978—the exceedingly long and demeaning process whereby the government dictates the terms and conditions that must be met for a tribe to be officially recognized, and thus eligible for federal funds—has said: [Quoting]

I created a monster.... The B.I.A. and other federal agencies had 35 definitions of Indians. Nobody's ever clearly defined what a tribe is. I wrote the damn things and I didn't know what a tribe was, so for God's sake, what have you got.... You had dueling historians and dueling genealogists and it got to be a joke, a serious joke. The standards got to be impossible.... There's a conflict of interest there...[because] the government doesn't want any more Indians....[End quote]

Assistant Secretary of the Interior for Indian Affairs, Kevin Gover, recently told a coalition of 23 tribes that the B.I.A. "was meant to fail—to see that the tribes disappear." Gover admitted that there are "more than 300,000 mismanaged accounts [*for individual Indians*] that total upwards of \$500 million." But he promised that things are getting better: "The Bureau is poised to serve Indian country in a more responsive and effective manner."

Is the B.I.A. somehow going to straighten itself out? Are we to believe that the foxes are now going to make things better for the hens—especially after they have been successfully devouring them for so many years? This is just more whitewash and lies, and until real and meaningful change is made in the U.S. Government's policies and relations with regard to the Native Americans, they can only expect more of the same.

Wampanoag Indian Chairwoman Beverly Wright said of Kevin Gover's speech: "We have these people who come to our tribe to sell us products. That is what his speech reminded me of." Tribal leaders said they have been hearing about a new and improving B.I.A. for years.

When the B.I.A. states that their "priority is to support and enhance tribal government" they fail to state for *whose* benefit. When one reads such a statement, it appears on the surface that what is meant is to enhance tribal government for the benefit of the Indian tribe—but nothing could be further from the truth. Shouldn't the Indians be accorded the opportunity to have their own traditional governments if that is what they want?

The U.S. Government established the reservations, and then put the B.I.A. in charge of setting up tribal councils for all the tribes. Under the 1934 Indian Reorganization Act (I.R.A.), the Indian Nations were reorganized by having their traditional governmental structures replaced by tribal councils directly patterned after a corporate board. Although not openly disclosed, the real reason for this has been to facilitate outside corporations (like oil, gas, coal, gold, and uranium companies) being able to

— Part IX Of A Series —

Native American Perspectives:

Toward Sovereign Indian Nations

2/22/00 RAY BILGER

Prior to the arrival of the Europeans on these shores, the native, indigenous tribes of America were sovereign by nature. They conducted their own affairs, as they had done for thousands of years, living in harmony with the Great Spirit and All of Creation, and depended upon no other source of power to uphold their acts of government.

From the earliest beginnings of relations between the U.S. Government and the Indigenous American Nations, those relations were "sovereign government" to "sovereign government". Dealings between the U.S. Government and the Indigenous American Nations went through the same treaty process as European or other sovereigns, such as Great Britain or Germany or France.

However, by 1876 the U.S. Supreme Court had clearly acknowledged that "the acquisition of territory has been the moving cause of all Indian treaties" (U.S. v. Forty Three Gallons of Whiskey, 93 U.S. 188). Statements to the contrary avoid this simple truth and make excuses for barbaric and oppressive government actions which persist to this day. For the most part, no really meaningful government recognition of Native rights was present then or now.

The Bureau of Indian Affairs (B.I.A.) was created in 1824 as part of the War Department.

This leaves little doubt as to the real purpose for its creation. In 1849 the B.I.A. was transferred to the Department of the Interior, but there was no substantive change in the overall policy toward the original inhabitants of this land.

Today, the B.I.A.'s Mission Statement claims they are working "to enhance the quality of life, to promote economic opportunity, and to carry out the responsibility to protect and improve the trust assets of American Indians.... Our priority is to support and enhance tribal government." The facts, however, paint quite a different picture.

With the B.I.A. managing hundreds of millions of dollars of tribal trust assets, why have places like the Pine Ridge Indian Reservation (Oglala Lakota Sioux) in South Dakota suffered with 80% unemployment, ramshackle housing, and hunger, for decades? And the situation is the same on reservation after reservation. How does this equate with "enhancing the quality of life?"

The Indians gave up their lands through treaties, in exchange for continuing concessions from the U.S. Government. The truth of the matter is that those trust assets have been mismanaged in case after case. Why? Because the U.S. Government doesn't want any more Indians. They would like nothing more than to see the Indians just dry up and blow away with the wind.

John "Bud" Shapard, the B.I.A. official who

lease Indian lands.

Well, the Indian Nations got reorganization whether they wanted it or not. On the Pine Ridge Reservation, quite a number of dead people somehow managed to vote for reorganization. After this was revealed and documented, the votes were allowed to stand and reorganization proceeded.

On the Hopi Reservation in Arizona, 85% of the Indians opposed and actively boycotted the vote for reorganization. Their abstentions were counted as “yes” votes. The list of such examples could be extended, but doesn’t anybody find something just a bit unjust about all of this?

The tribal councils set up by the B.I.A. consist of Indians who are paid well for being on the councils, while other Indians on the reservations get nothing. This arrangement helps to create dissension between those Indians who have and those who have not. It is the old game of divide and conquer. Those on the councils want to keep their income, and so they “go along to get along”—allowing the leasing of prime reservation land to large corporations for next to nothing, while millions of dollars of profit flow off of Indian lands.

The Hopi and the Navajo in Arizona don’t want the Peabody Coal Company (a subsidiary of Lehman Brothers) raping and destroying Mother Earth for millions of dollars in profits. But they now have virtually no say over the very sacred land that is supposed to be theirs—land given to their care by the Great Spirit. The B.I.A. wants to evict them off of their lands because of fabricated “irreconcilable” tensions between the two tribes.

Do you remember the Indian protests of the 1970s? In 1973, 200 members of the American Indian Movement (A.I.M.) occupied the village of Wounded Knee (on the Pine Ridge Reservation) for 69 days, demanding a U.S. Senate investigation into the condition of Native Americans. The Oglala Sioux were protesting the continuing injustices to their people and the government’s violation of their treaty rights under the 1868 Treaty. But, to this day, there have still been no real substantive policy changes on Pine Ridge.

By the way, if you have not yet done so, you should go out and rent the video of the excellent 1992 TriStar Pictures movie, *Thunderheart*, which is a very serious dramatization of events in the 1970s on the Pine Ridge Reservation. This is a disturbing yet powerful movie that embraces the real spirit of the Indian people, seldom seen by non-Indians. This is a must-see movie.

Tensions continued throughout the 1970s as Indians continued to demand their rights to have the treaties honored. And—just as we still find today—mysterious deaths of Indians were rampant. As former U.S. Attorney General Ramsey Clark pointed out: “In March of 1975 alone, seven Indians were killed [at Pine Ridge],

their deaths going virtually uninvestigated despite the presence of an army of F.B.I. agents and other federal, state, and tribal lawmen.”

What was not revealed publicly, however, was the fact that, on the same day of the shoot-out at the Jumping Bull Ranch (on Pine Ridge), on June 26, 1975 (where two F.B.I. agents were killed), one-eighth of the Pine Ridge Reservation was transferred to U.S. uranium- and gold-mining interests! With Pine Ridge being over 1.7 million acres, that translates to over 220,000 acres, or 347 square miles, given over to the raping of Mother Earth! And who do you suppose gets all the profits that are realized? Remember—there is still rampant poverty and 80% unemployment on Pine Ridge.

The two F.B.I. agents who were killed had chased a pick-up truck onto the isolated ranch where there was an Indian family with small children. What happened immediately after the shoot-out at Jumping Bull has aptly been called “The Reign of Terror”.

The Tribal Council President, Dick Wilson, and his vigilante, self-termed “GOON Squad”, along with more than 300 combat-clad F.B.I. agents, armored vehicles, and helicopters, turned the reservation upside down in their search to find those responsible for the deaths of the agents.

Ramsey Clark doesn’t hold back from pointing a finger directly at the U.S. Government: “With government complicity, a rogue paramilitary group that proudly called itself the GOONS—Guardians Of the Oglala Nation—were provided with weapons, training, and motivation to create a wave of violence...against traditional Indian people and their supporters.”

Former Director of the Rocky Mountain Regional Office of the U.S. Commission on Civil Rights, William F. Muldrow, recalls what happened next:

[Quoting]

The Commission on Civil Rights immediately began to receive calls from reservation residents regarding abuses by the F.B.I. As a Civil Rights Analyst for the Commission, I was sent up to observe and report on the happenings. Terror reigned. Roadblocks were set up and all vehicles were stopped and searched. There were reports of numerous incidents of isolated farmhouses being surrounded by military vehicles, with a helicopter overhead, and the occupants ordered by megaphones to leave their homes. More firsthand accounts told of agents with automatic weapons breaking down doors to search houses without warrants.

Joe Stuntz, an Indian, was also killed during the shoot-out, but no charges or arrests were ever made in connection with his death....

In the period which followed, Anna Mae Aquash, a Canadian citizen, who was seen as a key witness, and who was allegedly threatened and abused by the F.B.I., was found shot to

death and her body dumped in a ravine. An F.B.I.-ordered autopsy failed to reveal the large bullet wound in the back of her head, leading to more criticism of the F.B.I. and their methods.... [Between 1973 and 1976] there were over 60 unsolved murders on the reservation for which the investigatory responsibility lay with the F.B.I.

[End quoting]

The U.S. Commission on Civil Rights is an independent, fact-finding agency of the federal government. It collects and studies information related to the denial of civil rights and makes recommendations for corrective action.

Charged with the murder of those two F.B.I. agents was A.I.M. member Leonard Peltier, an artist and writer, well known for his non-violent style of defending Indian rights. And, although all of the available evidence points overwhelmingly to Peltier’s innocence, the F.B.I. needed (and apparently still needs) a scapegoat, so Leonard sits today in Leavenworth for a crime he didn’t commit. Now well known around the world, Peltier has been called the Nelson Mandela of the American Indian people. (See Peltier’s book, *Prison Writings—My Life Is My Sun Dance*, published by St. Martin’s Press, Spring 1999.)

The U.S. Commission on Civil Rights, in a Memorandum to the U.S. Justice Department, reported that the F.B.I. was an extraneous force on the Pine Ridge reservation, and that the agents had no understanding of Indian ways. It was noted that the F.B.I.’s actions were seen as biased and the source of much tension and controversy. Although the Commission recommended that the F.B.I. be relieved of its responsibility to investigate felonies on the reservation, that recommendation has never been implemented.

Since the F.B.I. is an agency of the government that set up the reservations (and does not want any more Indians), the same government that put the corrupt B.I.A. in charge of installing the “tribal councils”—why would anyone expect the F.B.I. to support the Indians and their rights? It seems only too obvious that they are there to cover-up the truth and help perpetuate the injustice. They appear to be the enforcers for big business and the government (essentially the same conglomerate in this case). Still think brutality against Native Americans is a thing of the past?

On January 16, 2000, about 100 traditional Oglala Sioux protesters peacefully occupied the Red Cloud Tribal Building on the Pine Ridge Reservation, demanding, among other things, the ouster of Tribal Treasurer Wesley “Chuck” Jacobs, a White man. The Indians have had enough. Jacobs has been accused of the mismanagement of \$7-\$9 million.

Considering the highly tense atmosphere, the situation has remained relatively calm. On Monday, January 31, a turbulent and rocky council meeting got underway at the Billy Mills

Hall in Pine Ridge Village. The meeting was expected to continue through Friday, February 4. On the first day, the treasurer was suspended. Since he was only suspended, the protesters said they would stay in the Red Cloud Building until he was removed permanently.

The second day of the council meeting lasted only two hours. Councilman Floyd Brings Plenty introduced a motion to suspend the tribal president for misappropriation of funds. Tribal President Harold Dean Salway immediately adjourned the session, declaring that no business could be conducted with council members and audience members disrupting the proceedings. Council members were stunned by Salway's action.

This was the second time Salway adjourned a meeting when a motion for his suspension was introduced. The last time was on November 23, 1999. Councilman Gerald Big Crow said Salway's move today was enough to consider impeachment. So much for the B.I.A.-installed tribal council being a body representative of the Indians' needs and interests. Salway certainly appears to be working for someone else.

We shall watch and see how that situation unfolds and sorts itself out. The county where Pine Ridge is located is still the poorest county in the United States, even with all that vast mineral wealth beneath their feet!

At the meeting mentioned earlier, that Assistant Secretary of the Interior Kevin Gover had with 23 tribes, Gover fielded questions after his speech. But the tribal leaders were not interested in talking about the B.I.A.'s plans to "fix" the trust fund accounts. They wanted to talk about self-governance issues, and the lack of response from the B.I.A. concerning this.

Many tribes now want to initiate a self-governance policy in which they would assume complete control over how federal monies are spent for their tribes. That would be something new, for they have never been allowed to do so before. However, working out a self-governance policy with the B.I.A. has been nearly impossible.

Wampanoag Chairwoman Beverly Wright asked why, in the last two years since her tribe voted for self-governance, have they not had even one meeting with the B.I.A. about this? Gover said he was unaware of the issue, but promised to look into it. More lies and empty promises?

The Native Americans have never wanted tribal councils imposed on them by the U.S. Government. They had functioned and lived very well for thousands of years without the White man's government, so why would they suddenly want it now?

The answer, quite simply, is that the U.S. Government does not want the Native American tribes to truly grasp the idea that they are Sovereign Nations which don't need the U.S. Government. Rather, the Indians are supposed to believe and consider themselves a

dependant people.

As you can see, there are ample reasons why the American Indian nations might want to again become Independent Sovereign Nations, like France or Germany.

Up in northwest Montana, things were pretty much the same on the Blackfeet Indian Reservation—with ramshackle housing, unnecessary poverty, 50% unemployment, and a corrupt tribal council mismanaging funds. But the Blackfoot people (this is their true name; it was the White man who told them they must be called Blackfeet because there are more than one of them) have had enough, and began to initiate change which has now resulted in the Blackfoot Nation issuing a *Declaration Of Independence* from Canada and the United States.

But we need to back up here to set the stage for this momentous event. It is important to realize that the situation with respect to the Blackfoot people is just a bit different than it is for other Indians. The 1851 treaty, which established the boundaries of the Blackfeet Indian Reservation, was not signed by any Blackfoot. In fact, there was not even one Blackfoot present for any of the treaty negotiations! But the federal government didn't seem to notice, or at least they didn't seem to mind.

By 1855, however, further treaty negotiations were held, but this time only four Blackfoot band chiefs were present to (supposedly) represent thousands of Indians (see *The Blackfeet*, by John C. Ewers, copyright 1958, by the University of Oklahoma Press). It seems doubtful, however, that those four chiefs could comprehend the magnitude of what they were agreeing to.

But now the Blackfoot people have had enough of broken treaties, empty promises, and the corruption of the White man's imposed "tribal business council". On December 14, 1999, The Blackfoot Nation formally submitted their *Declaration Of Independence* to the U.S. Government and the Canadian Government.

The Governor General of Canada (the Head of State, equivalent to the U.S. Secretary of State) personally called a leader of the Blackfoot Nation to acknowledge their announcement, and expressed her personal apologies at not being able to attend an upcoming event related to this *Declaration*.

President Bill Clinton has been requested to call the Blackfoot Nation and congratulate them, but to date there has been no response from Washington, D.C. Perhaps his acknowledgment might be seen as a "green light" to other tribes that they too might seek freedom from the oppressive federal government.

The American Indians are treated like slaves, with what is rightfully theirs stolen from them every day. They are the worst treated people in America, and they always have been (see my book, *The Untold History Of America*,

page 67). Even the Black slaves were given their freedom in 1865. But the Indians remain slaves on the reservations—there to be exploited by the big corporations, and to live in poverty to remind them constantly how they are less than human (remember, even our *Constitution* still considers them so).

Perhaps what the Blackfoot people are doing is what we need at this time—Sovereign Indian Nations (free from any connection to the corrupt White man's government) showing us the way we can begin to live again in harmony and balance with Mother Earth and with All Creation. They can set an example for the rest of us, of how we can clean up the land, and the rivers, the lakes, the streams, the air we breathe, and the water we drink.

Think back for a moment. We have already seen what the White man has done with the environment in the short time we have been on this continent. Surely the Indian's example can be no worse. The example they originally gave us, when the Europeans first came here, was a land of pristine lakes and rivers that were the source of fresh drinking water, unspoiled breathtaking vistas of natural beauty, and pure clean air to breathe—surely unlike what the Europeans had left behind to come here.

We need to look at this new development in a positive light, for that is the atmosphere in which the Blackfoot people are attempting to move as they take a stand to define and shape their own destiny.

Long Standing Bear Chief is one of the leaders of the Blackfoot Nation responsible for submitting the *Declaration Of Independence*. Although the word Chief is part of his name, he says he is not actually a Chief. You can find out more about him and the Blackfoot Nation at the www.blackfoot.org website.

Long Standing Bear Chief consented to be interviewed about the Blackfoot Nation, why the *Declaration Of Independence*, and why now, about life on the Blackfeet Reservation, and about his hopes and dreams for the future. In the next segment of this series we will share some of that interview.

Let us close with some appropriate words of wisdom from an unknown Native American source:

[Quoting]

I know that all must be brought into the Sacred Hoop for it to be mended. I often wonder how we will bring those who do not see even the simplest of Circles into the greatest Circle of all. Then I remember it is a thing that has been promised by Spirit. That is how I know it will come to be.

[End quoting]

These are times of great change and purification on a planetary scale. It should probably thus not come as a surprise that the Native peoples of the American continent may play a pivotal role in this Season of Renewal and Healing. 

News Desk Special Report: A Fancy Trail Of Money Laundering By Greenspan, Bush & The Twiglets

Editor's note: The following information was assembled by our News Desk guru, Dr. Al Overholt, from the sightings.com website. It is not likely this data will be part of the dizzying verbiage parade by the implicated presidential candidates that is already monopolizing the major media outlets.

1/28/00 SHERMAN H. SKOLNICK

**THE REPUTED COCAINE BANK
MONEY LAUNDRY WIZARD FOR
GEORGE BUSH FAMILY
ARRESTED IN CHICAGO**

The reputed cocaine bank money laundry wizard for former President George Herbert Walker Bush and two of his sons has been arrested in Chicago. The matter is tied as well, reportedly, to corrupt top IRS officials, Chicago Region Office, fingered by our work.

Giorgio Pelossi, a prominent Swiss accountant, was arrested January 20, 2000, at O'Hare International Airport, after officials of the U.S. Immigration and Naturalization Service (INS) found he was wanted on an international arrest warrant issued in Milan, Italy, about a year previously. Pelossi, 61, was somehow actually traveling under his own name. His name showed up on a passenger manifest in a routine check provided to officials of the INS. (Savvy sources, however, dispute that it was so "routine", but was rather a follow-up of matters outlined in our TV documentary, 11/29/99.)

In his appearance before a Federal Magistrate in Chicago, Pelossi agreed not to oppose being sent back to Italy by extradition. Pelossi signed papers in Chicago's Federal District Court waiving his right to a hearing in Chicago.

Pelossi is reportedly the cocaine bank money laundry expert for the former president and two of his sons, Texas Governor George W. Bush and Florida Governor Jeb Bush. Some claim that the matter also reportedly

implicates the other son, Neil Bush, who escaped federal prison through a reputedly corrupt arrangement upon the downfall of Denver-based Silverado Savings & Loan Association, an apparent CIA proprietary operation of which Neil Bush was an official. Some contend Silverado, at the hands of Neil Bush, was likewise a money laundry for illicit funds, including reportedly narcotics trafficking.

For a year or more now, journalists and commentators in Spain have been writing and talking about the Elder Bush and two of his sons, George W. and Jeb, being reportedly implicated in billions of dollars of dope money laundered through banks in Spain, Italy, Mexico, and the United States. The cocaine banking cartel, for which Pelossi reportedly was the kingpin and brains, was centered in Milan and Barcelona. According to stories, some date-lined Rome, in December, 1995, by Reuters, United Press International, and other news and law enforcement personnel, Italian authorities contended they had proof leading them to assert that the Archbishop of Barcelona was implicated with the Vatican Bank and others in a vast money laundry ring reportedly involving, among others:

[1] FIRST NATIONAL BANK OF CICERO (a Chicago suburb, Al Capone land, a long-known mafia enclave). Later it became the flagship of PINNACLE BANC GROUP. Still later, to confuse matters, the bank was called Old Kent Bank, a unit whose head office is Grand Rapids, Michigan. Pinnacle was the successor and alter ego to the mysterious, scandal-wrecked BANK OF CREDIT AND COMMERCE INTERNATIONAL, which supposedly (although not actually) went under in 1991. BCCI was a reputed assassination and espionage funding apparatus for various intelligence agencies, including the American CIA, the French CIA, and Israel's The Mossad (The Institute).

Bishop Paul Marcinkus, head of the VATICAN BANK until 1991, was also the dominant force controlling First National Bank

of Cicero. Marcinkus was originally from Cicero and ran a church there. Marcinkus fled the Vatican, sheltering himself with his Vatican passport, when Italian authorities sought to grill him and possibly prosecute him for various criminal offenses he reportedly committed as Vatican Bank chief. He returned to the U.S. and lives in Sun City, Arizona.

[2] Roger D'Onofrio, an American CIA official with dual citizenship, U.S. and Italy, living near Naples, Italy. Italian authorities, in the wire service and other stories of December, 1995, described him as the CIA's secret paymaster in Italy to fund political assassinations of those not liked by the American CIA, and to pay-off or destroy opposition parties in the Italian government.

The Pelossi-Marcinkus-D'Onofrio ring reportedly, through Vatican Bank and other financial institutions, trafficked in smuggled gold, osmium nuclear bomb triggers, high quality counterfeit foreign currencies, and other illicit goods and services. With the corrupt connivance of top officials of the INTERNAL REVENUE SERVICE, Chicago Region office, Pelossi reportedly arranged the laundering of billions of dollars through concealed and dummy accounts, reportedly in the following banks (among others, and for and on behalf reportedly of George W. Bush, Jeb Bush, and the Elder Bush, their father): HARRIS BANK OF CHICAGO, and their Foreign Exchange section, called ForEx, a unit of BANK OF MONTREAL owned principally by the whiskey-soaked Bronfman family (Seagrams booze, Cineplex Odeon movie theater chain, as well as numerous operations of records-entertainment in California).

The former major owner of Harris Bank, now also a major stockholder of the Bank of Montreal, is U.S. Sen. Peter Fitzgerald (R-IL). Harris Bank/Bank of Montreal are interlocked with the worldwide Mexican bank cartel, Grupo Financiero Bancomer. In May, 1998, Bancomer pleaded guilty to U.S. federal criminal charges of vast dope money laundering. They tried to whitewash the matter with an explanation on their www.bancomer.com website.

Bancomer has operated in the U.S. through branches in Los Angeles and New York. Their attempt to open a branch in Chicago was opposed by one or more City of Chicago Alderman who referred to the Bancomer criminal guilty plea. Yet, the Federal Reserve apparently is ready to let Bancomer operate throughout the U.S. in various units.

Bancomer is not only reportedly implicated in the Russian embezzlement caper, where many billions of dollars disappeared or were laundered. They also are reportedly implicated in the ring of which Pelossi has been the brains and kingpin, for the Bush Family and others, in Portugal, Spain, Italy, and elsewhere, including Morocco and Colombia.

Harris Bank also has secret and dummy accounts of reputed terrorist Osama bin Laden. His concealed accounts are reportedly jointly with Sharon Percy Rockefeller, top official in Washington, D.C. of PBS, and her family. She is the wife of U.S. Senator John D. Rockefeller IV (D-WV). Her family reportedly are in the construction business with bin Laden. (President Clinton says he cannot “find” reputed terrorist bin Laden’s accounts to freeze them. Really?)

In October, 1998, we confronted top officials of Harris Bank in Chicago with their secret accounts of the mysterious \$50 million of federal agency funds originally parked with Household Bank, which merged with Harris Bank. The funds, belonging to Joseph Andreuccetti, were secretly transferred without his permission to Little Rock, Arkansas, to try to cover up the embezzlement of Madison Guaranty S&L, for which Bill and Hillary Clinton are subject to federal criminal prosecution for stealing bank funds.

REPUBLIC NATIONAL BANK OF NEW YORK: The bank is a reputed money laundry for smuggled gold as used by the intelligence agencies, such as the American CIA. The principal owner of the Bank, Edmond J. Safra, was murdered in December, 1999, supposedly by the acts and doings of his purported male “nurse”, an unstable former member reportedly of the Green Berets, apparently part of one of their “hit” teams. As to the murder of Safra, visit our www.skolnicksreport.com website and see the story “Murder In The Gold Market” as well as the update.

The arrest of Giorgio Pelossi is apparently just another event related to our one-hour public-access cable TV documentary cablecast within Chicago to some 400,000 viewers on November 29, 1999. Our program, called *Broadsides*, showed pictures of an ocean-going boat, renamed California Rose—a reputed traveling money laundry, plying between Mexico, through the Caribbean, including stopping at the Dutch Island of St. Maartens, a dope laundry haven, and then on to Portugal and Spain.

The boat, as we stated, is a reported gambling casino, apparently owned and operated by current, recently current, and former top U.S. INTERNAL REVENUE SERVICE officials, Chicago Region Office. For some twenty years, they reportedly operated a dope traffic “immunity” zone in a western suburb of Chicago, four large buildings called Kingspoint Condominiums. The buildings, originally owned by Joseph Andreuccetti, were seized by the corrupt IRS officials, NOT for the public treasury, BUT FOR THEIR OWN PERSONAL INTEREST. Andreuccetti was kept in an apparent fraudulent INVOLUNTARY bankruptcy for almost 14 years, at the connivance of First National Bank of Cicero and the nephew and godson of

Bishop Paul Marcinkus.

Reportedly participating in all this was Congressman Henry Hyde (R-IL) who lived near Kingspoint.

For details, see the three-part series “Corrupt IRS Officials Face Exposure In Dope Bust”. Part 3 has pictures of the IRS boat. Visit our www.skolnicksreport.com website.

Our sending six heavy volumes of corruption documents to the Inspector General of the U.S. Treasury apparently caused the dope bust situation in January, 2000, as well as the arrest of Pelossi.

Pelossi is reportedly interwoven with the German political scandal that has tarred former Chancellor Helmut Kohl and his conservative political party, the Christian Democratic Union. Pelossi, according to published reports, has provided German prosecutors with information about alleged pay-offs to German political figures.

(The *Chicago Sun-Times* on January 27, 2000, had a much-censored, watered-down story about Pelossi leaving out many details that the presslords are well aware are involved about the Bush family and the corrupt IRS.)

2/10/00 SHERMAN H. SKOLNICK

GREENSPAN REPORTEDLY BRIBES & AIDS BUSH IN GOLD SWINDLES **PART 1**

More than three hundred reportedly authentic secret Federal Reserve wire transfer records show how the Chairman of America’s private central bank has apparently bribed and aided in corrupt deeds George Herbert Walker Bush and his family, all over a period of time. Later, Greenspan, reportedly jointly with Bush and a swarm of major financial entities, derived a horrific benefit in a major gold swindle.

In clandestine meetings, over a period of months, the reportedly genuine documents were turned over to our research and investigation group by government officials clearly in an inside position to possess and confirm such data.

A conversation at one such meeting: “Tell Sherman, if you or he ever reveals our identity, we are all dead, every one of us. Also in jeopardy of life and limb would be more than eight others in key government and financial positions.” Some of the records purport to have the wire transfer signature of A. Greenspan whose term as Commissar of the Federal Reserve was renewed in the new century. Because he is like a corrupt Soviet dictator, answerable to no one, we coined the term “Alan Redspan”.

The document delivery team was assured of confidentiality by our past record. As the founder/chairman of our group, Citizen’s Committee To Clean Up The Courts, since 1963, I have been imprisoned some eight times

in four decades, not for committing crimes, but for so-called “contempt of court”, for refusing to reveal the identity of long-reliable sources of high-level corruption data turned over to us on the sly. Our sources, cross-checked with others, and backed-up by over one million documents already in our possession, have enabled us, over a period of decades, to spotlight what some describe as the biggest judicial bribery scandals in U.S. history.

Briefly stated, this includes the downfall we caused in 1969, of Illinois’ highest tribunal, the Illinois Supreme Court, with half the high court being put to the wall. In the 1970s, our work led to the jailing for bribery of the highest level sitting federal judge in U.S. history, a federal appeals judge in Chicago, who had also been former State Governor, and his aide, former head of the Illinois Department of Revenue, the tax collectors. 7th Circuit Federal Appeals Judge Otto Kerner, Jr. went on all the media and said “Skolnick is a liar”. Kerner died an ex-convict, convicted as I accused him to his face, as is our long-time policy.

From 1983 to 1993, our work set off a series of scandals, by which 20 local judges and 40 lawyers were sent to prison for bribery, including the Chief Judge of the Traffic Court, who in a taped interview said: “Mr. Skolnick, you are imagining things, there is no corruption in this courthouse.”

The Federal Reserve wire transfer data, which is also corroborated by matters already in our possession, among other things, confirms the following:

[1] That George Herbert Walker Bush, starting back at the time he was Vice President and continuing long thereafter, reportedly corruptly benefitted from billions and billions of dollars transferred at the behest, of among others, Alan Greenspan, to private corporations worldwide, in which the Elder Bush apparently has a beneficial interest, and/or is a major stock or bond holder, and/or is a kingpin therein, in other capacities. Included are enterprises in Saudi Arabia, North Korea, Hong Kong, Denmark, England, Red China, Taiwan, Japan, and Germany, among others. Some of the purported secret wire transfers of massive amounts were jointly for the Elder Bush and his brother, Prescott, a financial broker in New England. According to published accounts, Prescott Bush arranged vast, unsavory deals with the Japanese mafia, the Yakuza, as well as dictator-types in Red China, including reportedly with the top officials of the Red Chinese Secret Police (who also operate greatly in North America).

[2] Holding as well a large beneficial interest, and/or as major stock or bond holder in those accounts has been Jackson Stephens, the Little Rock, AR-based bond broker, largest such operation outside of Wall Street. Stephens, tied reportedly to the ethnic Chinese gangsters like the Riady family interwoven with

Clinton and Ollie North and the dope traffic, has been a major backer of Sludge Willie. The nefarious worldwide reputed corrupt deals of the Stephens family have been covered up by Alan Redspan and what some call the highly secretive, conspiratorial Federal Reserve.

[3] Some of the firms and enterprises, to which the massive wire transfer assets were sent, are reportedly CIA proprietary operations set up by Bush as the head and former head of America's secret political police. (Now a Chicago-based bankruptcy expert, William A. Brandt, Jr., has been a worldwide expert in quietly terminating CIA proprietaries once their espionage function is completed, as shown by documents released under Freedom of Information by the U.S. Justice Department. Brandt's activities overlapped those of the Elder Bush.)

[4] Some of the billions and billions of dollars of reputed wire transfers went for the beneficial interest of the Elder Bush, and his son Neil, an official of a CIA proprietary, disguised as Denver-based Silverado Savings & Loan Association. The S & L went under and Neil Bush should have been sent to prison for causing the downfall by reportedly misusing large amounts of federally-insured thrift agency funds. On the other hand, as accused in stories in the press in Spain, the Elder Bush and his sons George W. Bush (Texas Governor) and Jeb Bush (Florida Governor) and Jeb's wife, a native of Colombia, are reportedly incriminated through huge money laundering of dope proceeds through banks owned by criminals in Spain—dope proceeds reportedly from Colombia, Morocco, Portugal, and Italy. We publicized the quiet arrest in Chicago in January, 2000, of the reputed Bush family cocaine bank money laundry wizard, Giorgio Pelossi, a prominent Swiss accountant. (Visit our www.skolnicksreport.com website for the details.)

The Elder Bush has been with the CIA since at least 1959, when he helped set up Zapata Petroleum Co., later called Zapata Offshore, with upwards of 600 branches worldwide in international hotspots for the reported purpose of gathering intelligence for the spy agency. Some news sources have contended that Zapata's offshore drilling rigs, located beyond the U.S. jurisdiction limit, are reported centers for transferring large quantities of illicit drugs and other contraband.

[5] Some of the reportedly huge secret wire transfers were for or with the Elder Bush jointly with the Queen of England, through her accounts in the British Monarchy's Coutts Bank, London. The secret account numbers are contained in some of the more than 300 apparently authentic Federal Reserve wire transfer records. The British Monarchy has long been accused of being worldwide kingpins in the narcotics traffic, going back over 150 years, starting with the Opium Wars in China.

[6] Others of the more than 300 documents relate to a situation started in the 1970s, when the Elder Bush arranged to overthrow the Iraqi government by political assassination. Bush helped install Saddam Hussein.

Others of those and other documents relate to the decade 1980 to 1990, when the Elder Bush was a secret private business partner of Saddam Hussein in extorting billions of dollars per year from the weak sheikdoms in the Persian Gulf oil industry kick-backs to supposedly assure security. A little-known Federal lawsuit in Chicago dealt with the secret partner of Saddam Hussein—namely George Herbert Walker Bush.

I and my associates were the only journalists attending the federal appeals court hearing. I later did an exclusive group of interviews with the participants, confirming that Bush and Saddam were private business partners in extortion of the sheikdoms. Only one populist paper dared publish the details, in 1991, of my interviews on the federal case.

In a typical sort of falling-out of business partners, Bush suckered Saddam Hussein into seizing a portion of Kuwait long challenged by Saddam as being an Iraqi province and part of Saddam's oilfields. Bush used a top U.S. official to mislead Saddam into thinking the U.S. would not intervene in this local quarrel with the former British colony. Bush was the one, on behalf of U.S. oil drilling interests, who helped develop the Kuwaiti oilfields, following the 1961 relinquishing of British sovereignty. In its simplest form, the 1990-91 Persian Gulf conflict was a falling-out of private business partners.

The result of this treachery? Great loss of life of ordinary soldiers. Upwards of 150 thousand young Iraqis died in the conflict, some buried alive by U.S. war bulldozers. President Bush ordered U.S. warplanes to shoot, in the back, the retreating Iraqi soldiers proceeding under a white flag of surrender. It was the most horrendous murder of surrendering troops in world history. The German massacre of some 80 U.S. troops surrendering in World War II, during the Battle of the Bulge, was a small matter by comparison. (Our public-access cable-TV program in 1991 was about the only TV show in America that dared discuss this matter.)

Following the Persian Gulf War, some 15,000 U.S. troops died from the mysterious malady called Gulf War Syndrome which the Pentagon denies is happening. Ex-GIs continue to die from the strange ailments, and the total deaths and debilitating diseases amount to more than 20% of casualties of all the Americans serving in the military in the Persian Gulf in 1990-91, more than 100,000 American soldiers.

Having been apparently massively bribed and aided in corrupt deeds over a period of years, the Elder Bush owed Alan Redspan and others important favors. Bush has been a

potentate, in one form or another, with Canadian Barrick Gold. The Bank of England, jointly with the Queen of England who reportedly shared accounts with the Elder Bush at Coutts Bank, London, and three or more major financial entities, orchestrated a vicious attack on gold in 1999. Together, they drove down the price of gold to about \$252 per ounce, more than \$30 per ounce BELOW THE COST OF PRODUCTION of the most efficient gold mines, such as in Canada.

Reportedly helping this unlawful attack on gold, gold mines, and gold mine workers, forbidden by U.S. anti-trust laws, have been the following, among others:

- Goldman Sachs, one of the world's largest bond and gold trading houses. Cynics, knowing these facts, call them "Goldman Sucks". Goldman Sachs has been so much into short selling deals of gold that, in the October, 1999 gold crisis, they were reportedly considering invoking the contract provision called "Force Majeure" used to avoid complying with a contract because of wars, hurricanes, revolutions, and such. The Federal Reserve has, through various dirty tricks, bailed out Goldman Sachs repeatedly.

- Bank of America (long ago called Bank of Italy, in America), big in foreign exchange trading, called ForEx; they were reportedly part of the "knock down the price of gold" group.

- Bank of England, jointly with the Queen of England, offering for auction or sale gold that neither one apparently really owns, but is actually a huge gold horde stolen upon the downfall of the Soviet regime and whisked away to Dutch custody at a Swiss airport for speedy transport wheresoever requested. Bank of America is owned jointly by the Vatican, the Jesuits, and the Rothschilds. Joining them in recent years as major owners have reportedly been the Japanese mafia, the Yakuza, big in the U.S. dope traffic, and owning most every bank in California.

The purpose of the gold attack was to drive down the price of gold, among other things to help bail out six hedge funds that have been more than a trillion dollars under water in derivatives gambling—that is, asset swaps. The bankrupt hedge funds, when gold is low-priced, can obtain gold loans for as little as 1% interest. Were the hedge funds disaster scenario to be more public, it might set off a melt-down of the financial system of the Western world.

Reportedly at the behest of Bush, Barrick became part of a complicated trick of forward leasing of gold. A sort of short selling of gold. Thus, sold short has been more than ten thousand tons of gold—more than four years of total world gold production. Gold has been called by some "The Killer Yellow Metal" for the type of situations it can cause. In February, 2000, Barrick, Bush, and the anti-gold gang, reportedly again sought to stop the precious

metal from going up to a more fair market price, such as \$600 per ounce.

The disclosures of the reputed secret Federal Reserve wire transfer records could torpedo the pirate ship of which Alan Redspan is a treasonous Captain joined by reputed super-crook the Elder Bush and his family and others in their gang. All together, they are part of the big gold swindle of the new century.

See our website to view a few samples of the more than three hundred apparently authentic Federal Reserve secret wire transfer records that tend to incriminate Bush, Redspan, the Queen of England, the Bank of England, and others.

2/14/00 SHERMAN H. SKOLNICK

GREENSPAN REPORTEDLY BRIBES & AIDS BUSH IN VARIOUS MATTERS PART 2

Former President George Herbert Walker Bush and his three sons should be prosecuted for reportedly massive money laundering from the dope traffic and other illicit doings worldwide. Also, for bribery, and in the case of the Elder Bush, for treason. This is clear from the more than 300 secret reputedly authentic documents consisting in part of the following:

[1] Federal Reserve bank wire transfer records showing massive amounts in and out of accounts that are reportedly those of the Elder Bush, his sons, and/or in which they have a beneficial interest and/or are the major owners of the entities involved. Most have the secret authorizing code of the Federal Reserve Chief "A. Greenspan", who we call Alan Redspan, because he is like a corrupt Soviet commissar, answerable to no one.

[2] Hand-written notes of a senior U.S. government official in the Office of Internal Affairs, U.S. Department of the Treasury. His notes with bank wire transfer codes list 25 banks secretly transferring funds in and out of "Proteus/Potus", bureaucratic slang for Vice President of the United State/President of the United States. As we began to show in Part One of this story, and continuing now, Federal Reserve dictator Alan Redspan, with his secret authorizing codes shown, arranged and approved of the massive transfer as a money laundry, of billions and billions of dollars to the Bush family as follows:

• To George Herbert Walker Bush, using the Spanish spelling he prefers as his first name, as JORGE Bush. And to George W. Bush (Texas Governor), Jeb Bush (Florida Governor, who has a wife from Colombia), and Neil Bush, once an official of the defunct-by-fraud, Denver-based Silverado Savings & Loan. Sent to and from Banco Exterior de Espana, Malaga, Spain, for Pilgrim Investments, the reputed Bush money ship, with the codes

shown. This was arranged reportedly through the reputed Bush family cocaine bank money laundry wizard, Giorgio Pelossi, quietly arrested in Chicago, January, 2000. (For Pelossi details, visit our www.skolnicksreport.com website.)

• The Elder Bush sharing proceeds of illicit transactions, reportedly including dope trafficking, with the Queen of England, through her identified accounts in the British Monarchy-owned Coutts Bank, London. Remember or note if you did not already know: the British Monarchy, directly and through the Jardine Family as their agents and others, have been kingpins in the dope trade since the Opium Wars in China, starting 150 years ago and continuing. Financing it over the years in various forms reportedly has been the enterprise owned jointly by the British Monarchy with remnants of the Chinese Royal family, Hong Kong & Shanghai Bank, merged more recently with the Jacobs Family-owned Marine Midland Bank of Buffalo, New York and Chicago. (More on this later.)

• The Elder Bush, as a U.S. government official and afterward, to benefit him for having done certain acts and doings as such, taking benefits and bribes reportedly from the Emir of Kuwait, to start a war with Bush's disgruntled PRIVATE BUSINESS PARTNER, Saddam Hussein, Iraqi strongman. Details of Bush as such partner for the decade 1980-1990 were part of the secret records fought over a Chicago branch of Italy's largest bank, Banca Nazionale Delavoro, owned in part by the Pope. It was a subject of an unpublicized federal suit in Chicago. Bush/Saddam extorted hundreds of billions of dollars from the weak oil sheikdoms of the Persian Gulf for "protection", same as mafia gangsters shaking someone down. I and my associates were the only journalists attending the hearing in the federal appeals court. After which, I interviewed the participants, May 1991, detailing the same on Radio Free America, hosted by long-time broadcaster and journalist Tom Valentine. A transcript appeared several times in the populist newspaper *SPOTLIGHT*. Zero for the rest of the press—who I call the newsmakers.

Saddam Hussein was suckered by Bush using a top U.S. official, telling Saddam it is purely a local matter of no interest to the U.S. for Iraq to seize a portion of Kuwait long-claimed by Saddam as an Iraqi province and oilfield. For sending U.S. soldiers in harms way and suffering post-war Persian Gulf Syndrome, the Emir of Kuwait reportedly bribed Bush. The proceeds went, in part, to and through reputed Bush-identified accounts in Arab Bank Corporation, Monaco. Fifteen thousand U.S. military since 1991 have died of the strange malady and eighty-five thousand are either in dying condition or suffering horrible debilities. In addition, Bush reportedly received from the Emir \$15 million in gold. This is all forbidden by the *U.S. Constitution, Article 1,*

Section 9: "No title of Nobility shall be granted by the United States; And no Person holding any Office of Profit or Trust under them, shall, without the consent of the Congress, accept of any present, Emolument, Office, of Title, of any kind whatever, FROM ANY KING, PRINCE, OR FOREIGN STATE." (Emphasis added.) What Bush did is also in violation of federal statute, as noted by the senior Treasury official in his hand-written notations.

• The Queen of England and her control of British counter-intelligence, called MI-6, bribed and benefitted Bush to arrange for MI-6 to spy and coerce U.S. citizens in the United States and to destabilize such persons, particularly the large Irish Catholic populations of places like Chicago. (Chicago has a considerable number of Irish Catholics who sympathize with the anti-British royalty, anti-British IRA.)

Further, Bush was bribed and benefitted to induce him to pursue a course detrimental to the United States. Bush's reputed pirate operation, Pilgrim Investments, received many billions of dollars through the Queen's accounts at her Coutts Bank, London. Bush's reputed firm is linked to the Pilgrim Society, an offshoot of the Cecil Rhodes Trust, formed from the South African gold and diamond mine cartel. The Rhodes Trust is pledged to the treasonous purpose of overthrowing the U.S. government and restoring British domination over the American continent by returning it to the status of puppet colonies. The Rhodes Trust takes the position that those of Irish and German descent (many Americans) are sub-human and are not entitled to occupy this land and have a government called by them the "United States of America".

Great Britain has vowed to take back this continent since at least the War of 1812, and for that purpose has arranged the political assassination of two anti-British U.S. Presidents, President James Garfield and President William McKinley.

William Rockefeller Clinton (that is what I call him for good reason mentioned elsewhere) as a student attended Oxford on behalf of the Cecil Rhodes Trust and took a pledge to support the same, which calls for the collapse and overthrow of the U.S. Government. Twice inaugurated as President, Clinton took an oath to support the *U.S. Constitution*. How is this contradiction resolved? (*U.S. Constitution, Article 2, Section 1.*)

Visit the www.alfayed.com website. There you can consider the contentions of Al Fayed that the husband of the Queen of England, Prince Phillip, arranged with MI-6 to murder Al Fayed's son, Dodi, and his intended new wife, Princess Diana of Wales, then pregnant with his child.

As shown by the reportedly authentic Federal Reserve bank wire transfer records, hundreds of millions of dollars were sent through the Rockefeller's Chase Manhattan

Bank to Marine Midland Bank of Buffalo, New York, to credit to Bush's reputed accounts, Pilgrim Investments, Inc. The Jacobs family of Buffalo own Marine Midland Bank. They also own Emprise Corp., a reputed mobster international enterprise dominating the food and beverage and other concessions of many sports stadia and race tracks in the U.S. and elsewhere. Later, because of the smelly links becoming public, the name was changed to Sportsystems, Inc. By the way, they reportedly made Buffalo resident O.J. Simpson into a sports celebrity. (The Norby Walters case, 1988-89, in Chicago's federal district court, dealt with sports celebrities having many times mafia sports agents, without which they would go nowhere. OJ's Buffalo business partner in the major cocaine traffic was murdered during OJ's first trial in 1995, according to a major Buffalo newspaper.)

Emprise Corp., in turn, has been a major stockholder of Chicago-based Bally Manufacturing Company that has been the largest manufacturer of pinball and slot machines used in gambling casinos, too often under criminal domination. Published accounts link Emprise to Cosa Nostra families in at least two cities. In 1976, well-known Arizona reporter Don Bolles was investigating Emprise and intending to write about them. He was murdered by a car bombing; his last words included the word "Emprise".

The reported mobster details of the Jacobs family and their Emprise Corporation and Sportsystems are in a long series of press reports, such as the *Chicago Sun-Times* for the dates 9/16/71, 1/16/72, 5/15/72, 11/28/72; *Chicago Daily News* (now defunct) 4/28/72. In their issue 4/24/72 it was said, after describing them as a mob-linked concession company, "The company, Emprise Corp., of Buffalo, N.Y., has made millions of dollars in loans available to major league baseball teams, race tracks, and other sports enterprises. In return, Emprise usually has received ironclad contracts—sometimes running more than 30 years—to provide food and beverages at sports events." Also, *Chicago Tribune* 3/4/75.

The Jacobs family runs the dog racing tracks in Arkansas, popular there, and has contributed heavily to the "campaigns" of Bush family crony, William Rockefeller Clinton.

So, with his reputed criminal enterprises the Elder Bush was in safe hands running his game, with the help of Alan Redspan, through Marine Midland Bank of Buffalo. In more recent years, the Marine Midland Bank has merged with the British and Chinese royalty-owned Hong Kong & Shanghai Bank. One of those of Chinese royalty, now residing in the Midwest, is the reputed North American chief of the Red Chinese Secret Police. He has a direct link by fax to the White House. When we fingered him in 1997, he arranged with the FBI to block the website on which my story

about him (with his name, address, and phone number) was posted.

The reportedly authentic, hand-written notes of the senior official of the U.S. Treasury detailing and summarizing the numbers and accounts that go with some of the details here, dealt with twenty five banks used by the Bush family, which tend to incriminate them in reportedly illicit trafficking and bribery funds. The Bush family's reported criminality overlaps that of William Rockefeller Clinton, a close family crony of the Elder Bush, going back to the time Clinton was a college student in England and spied on the Peace Movement in Europe under the auspices of the CIA Station Chief in London, as arranged by the Elder Bush.

The Al Gore Campaign Committee reportedly paid upwards of one million dollars for a fairly recent picture made undercover by the U.S. Drug Enforcement Administration (not 30 years ago). It ostensibly shows George W. Bush (now Texas Governor) snorting cocaine with Bill Clinton. In exclusive stories on my website, I have detailed several attempts to assassinate Albert Gore, Jr. as Vice President. Is THAT what is deterring Gore from using this reported picture to finger George W. Bush—as of this date, a supposed political opponent? (Actually George W. is a Clinton crony.)

CBS Network apparently found out we were working on this several-part story. Result: recently CBS's *60 Minutes* program put up a "straw man" to knock down, to divert attention. *60 Minutes* referred to supposedly shocking allegations against former President Bush. They were made by a team made up of Mark Phillips and his apparent girl friend, Cathy O'Brien, in their book with a double-meaning titled *The Trance Formation of America*. She claims she was put into a trance and became a "sex slave" by high government officials, including George Herbert Walker Bush.

Several years ago this couple were set to be guests on my public access cable TV program cablecast within Chicago. Before coming here, Mark Phillips called me as the producer/moderator of the show, and insisted on the following conditions: [1] all my questions were to be put in writing and submitted to them in advance and [2] I was to make a written, ironclad guarantee that I as the moderator would NOT ask them or her any

"negative questions". Having due regard for my integrity and being independent-minded, I refused these outlandish conditions. So, to blunt OUR Bush criminality stories, CBS ran this sex slave story to divert attention.

Go to our website to view a few samples of the reportedly authentic records we have, some hand-written by a senior official of the U.S. Treasury, going over the numbers and accounts of the Bush family apparent criminality using Alan Redspan's Federal Reserve bank wire transfer notations as a summary.

More parts of this story are coming. Stay tuned.

* * *

Since 1958, Mr. Skolnick has been a court reformer. Since 1963, founder/chairman, Citizen's Committee To Clean Up The Courts, disclosing certain instances of judicial and other bribery (most often implicating banks owned and operated by judges) and political murders. Since 1991, a regular panelist, and since 1995, moderator/producer, of *Broadsides*, a one-hour, weekly, public-access cable TV show cablecast within Chicago to some 400,000 viewers, each Monday evening, 9 p.m., Channel 21 cable. For a heavy packet of our printed stories: send \$5.00 (U.S. funds) and a stamped, self-addressed business-size envelope (#10 envelope, 4-1/4 x 9-1/2) with three stamps on it to Citizen's Committee To Clean Up The Courts, Sherman H. Skolnick, Chairman, 9800 So. Oglesby Ave., Chicago IL 60617-4870. Office: 7 days, 8 a.m. to midnight: (773) 375-5741 (PLEASE no "just routine" calls). Before sending FAX, call. PUBLIC FORUM

Glimpses Of The Truth Behind Your Shadow World

3/3/00 SOLTEC / HATONN

Good morning, my friend. It is I, Ceres Anthonious "Toniose" Soltec, come in the Radiant One Light of Creator Source. Be at peace, for the attacks upon you are indeed great.

There are ones who do not wish for your messages to continue to be put forth. These ones are masters at exploiting any and all weaknesses you have.

Be diligent in your affirmations of service unto Lighted Service, and learn to allow for these distractions yet not become disabled by them. There is much work left to be done, and for those who agree to become conduits for we of the Host, there is always an amplification of the intensity of the sort of attacks you have been experiencing.

As always, the choice is yours to remain in such service. There will never be threats or coercion on the part of any entity working with the Lighted aspects of The Creation.

Allow for the immediate pressures to pass through you. There are adjustments being made which are giving the queasy sensation in your abdominal area.

There is great interest in stopping the messages that are penned through you, for they serve to free ones from their own ignorance and are much more than what they appear to you to be.

Allow The Light to fill you from within and radiate outward in a natural spiraling manner. You are capable of matching the frequency pulses that are going through your body as we speak. Allow for the shift to occur; do not resist the natural tendency towards balanced energy exchange. To stop the flow causes the nauseating feelings, while allowing the energy to pass through you will alleviate such feelings.

* * *

Gyeorgos Ceres Hatonn here, in Light and in Service to The One Light. Be still, my friend, for there is a much needed message that we wish to deliver. I am using Soltec's frequency, for his is much easier for you to lock onto in your present condition. Be still, and all will flow forth as it should be.

You American citizens are being distracted and played for sleeping fools as your world leaders take drastic measures to throw your

world into a global conflict. Your oil prices are the highest they have been in over 9 years, while you have several presidential "hopefuls" putting on a good show, day after day.

Meanwhile, there are great attempts to ignite a war in the Middle East. The "need" for oil is an artificial "crisis" that has many ones outraged. Your world energy giants, such as OPEC, are trying to leverage legislation that will ensure their empire continues to be prosperous, while these same ones desperately try to squelch the new technologies that threaten to make their current commodities much less valuable.

[Editor's note: Speaking of suppressed energy production technologies which threaten the status quo, don't miss the feature article on the subject of Cold Fusion elsewhere in this issue of The SPECTRUM.]

The pressures applied, and the resulting mental energies being focused on this very carefully orchestrated situation, are intended to precipitate stressful conditions for the majority of ones there in the United States who are among the most dependant upon the gas and oil—the middle class.

These mental stresses are causing not only an external distraction, but a very real internal distraction that, if left unchecked (which is typical of the masses), will fester and grow as ones become more and more unsettled. This is designed to cause a "tension" in etheric space that is hoped to be used as a catalyst for igniting the planned global war.

This sort of manipulation is beyond the mental capacities of the so-called "elite" puppets who believe themselves to be in control of your world. Rather, this manipulation comes from *direct* influence of negatively oriented, shall we say "extra-dimensional" beings. These beings are masters in the manipulation of energies, and are currently using their mastery in such a manner as to enslave others and to keep ones from connecting within to Higher Knowing and thus to accessing insights about the greater reality and nature of the game being played at this time.

Your world is presently going through an upward dimensional shift (graduation or birthing). There are great energies currently available to all of the inhabitants of your world that were not as accessible just a few short years ago. These energies are neither good nor

bad—they simply ARE.

You ones decide how you will focus your energy at any given point in time. As your planet continues to awaken in response to these ever-increasing (in both frequency and intensity) energies, the "average" ones who discipline themselves to tap into these energies have the potential of bringing down the illusion that so many are caught-up in and yet see it not.

This enslaving illusion is fast approaching it's disintegration point. These negatively oriented "extra-dimensional" entities have calculated that their window of opportunity for effecting a desired negative impact will be closing in a relatively short period of time.

The events that are likely to be precipitated by these dark ones will become the very catalyst that will, for the most part, act like a slingshot. There will be the apparent backslipping as the sling is being pulled back or cocked. This will be a time of great tension and hardship, and yet it will facilitate an inner stirring—a strong emotional desire for justice, freedom, and a return to balance—and hence a call will go out unlike anything prior in the history of your world. This call will summon forth great healing and balancing energies that will empower and en-Light-en those who will, in turn, be given to see the Higher Soul-ution to the seemingly hopeless situation.

These events can always be diverted through extreme focus and desire of a relatively small few. What we speak of here is based upon our observation of current energy flows, including their average frequency, amplitudes, and contours. Our mathematical constructs give us both probabilities and possibilities.

Please consider that many of you who are experiencing at this time are the same ones who were experiencing on Maldek (the remnant of which is what you have come to know as the Asteroid Belt between the orbits of Mars and Jupiter) and on Mars (which was rendered virtually uninhabitable by its previous occupants). The karmic predisposition of your world's population is one that seems to opt for the harsher experiences, rather than becoming diligent students of Life-Force Energy and therein finding a better way.

We of the Intergalactic Federation of Sovereign Planets in Service to The One Light, Creator Source, have consulted with the Guardians of your world, a council of seven

who were appointed Guardians at the time of your solar system's inception. And though we are somewhat limited as to what we can do—based upon our moral and ethical standards which dictate that it is quite inappropriate to interfere with the free-will choices of a species—we are being allowed EQUAL opportunity, using the same “extra-dimensional” energy-flow techniques as are being used by those dark ones who are efforting greatly to ignite a great war—the true purpose of which would be to create an environment that will spawn and precipitate anger, fear, and hate.

Such generated lower-emotional energies would help to neutralize the many awakening souls on your planet and keep them in a low-frequency state as long as is possible. The intention is to keep ones from naturally gravitating to the higher frequency states of joy, happiness, and love, wherein the inner connection to Higher-Infinite Intelligence (many call this the Christ-consciousness) can be more readily achieved.

When this important connection is made by a Lightworker while incarnate, the end result often has a very profoundly positive global effect. Such ones become powerful conduits of Love, Balance, and Peace. Their example then awakens the same in many others.

[Editor's note: Keep the above in mind when considering the ramifications of our Front Page story about the Indigo Children and the ongoing attempts to drug them into a state of ineffectiveness—or worse.]

Regardless of the atrocities you ones may witness, hold strong in your heart that the physical is but an illusion that is precipitated from the non-physical energies which have their origin within the creative imaginings of Creator Source—God of Light. The physical vehicles you are housed within are not YOU. You—the real you—are of the finer energies which transcend space and time, and which adhere only to the Laws of The Creation which govern the Greater Reality responsible for sustaining the very small subset that you commonly know as the physical universe.

You all are a part of a much larger reality. The current experience is but a mere twinkling of an eye when compared to the infinite journey of your soul. The seeming atrocities you may experience are transient at best. They serve as opportunities for you each to have experiences from which to draw contrast—what is personally perceived as appropriate or inappropriate—and thus evolve in wisdom in how you choose and summon forth Creative Energies in unique, balanced ways so as to forever create newness of experience which leads to growth.

With the proper mental attitude and understanding, your spirit for life and living and creating cannot be manipulated, usurped, or broken. Thus you become a beacon of Light by which others will be able

to see hope, and thus find inner comfort and greater personal realization.

Do not take the illusion of the physical experience too seriously or literally. Seldom are the situations with which you are confronted what they appear to be. For every seen action, there is a more fundamental non-physical energy flow which precedes and thus precipitates (determines) the aforementioned physical action.

The key to truly understanding the cause of any physical happening lies in the energy that precipitates it. Likewise, the key to creating a more balanced physical experience lies in the precipitation of non-physical energies. Learn to tap into and modify that which precipitates the physical reality, and you will be well on your way to understanding the true nature of the game you are participating within.

Many of the so-called “elite” of your world know and practice what many of you, who will be reading this message, would term “the black arts of ritualistic magic” wherein they conjure, in nonphysical space, vortices of energy potential that they then focus in very self-serving manners to enslave the minds of the masses and thus usurp their energies.

The greatest threat to these “elite” are those awakening beings who demonstrate the same ability to summon forth (tap into) non-physical energies and use same to help all of humanity. The ones, such as Christ and Buddha, who taught the use of non-physical energies in order to establish balance and peace, were most often persecuted and greatly feared by the ones who wished to remain in control of the populations. Such Wayshowers have had their original teachings manipulated and, wherever possible, destroyed. The many Christian teachings of the biblical scriptures have been modified to teach ones to fear the use of non-physical energies, and will call such skills “sorcery” and “witchcraft”—yet the ones at the highest levels of the Church regularly perform “secret” rituals that would horrify the average churchgoer who has been dutifully trained to be fearful of same.

I apologize for the apparent bluntness of this message, but for the most part our goal is to answer the petitions of those who will most likely be reading this message both presently and in the future—those of you who have the inner eyes to see, and the inner ears to hear. Look within your heart and search carefully your feelings. Are you looking for that “something” elusive that seems to be “missing”? Have you sat in many a church only to leave not quite satisfied?

What is it that is missing? IT IS THE ENCOMPASSING EXPLANATION THAT YOU ARE A CO-CREATOR!

Part of the reason you have chosen to participate in the physical experience is so that you might have the opportunity to learn to responsibly use your ability as co-Creator to

mold and change your environment in such a manner that there becomes a great resonance within your being that will, in turn, re-radiate Peace, Happiness, and Joy.

You are an immortal being—a unique spark of Creator Source's Light and Desire—who has chosen to take a “class” called “Physical Universe 101” wherein the goal is to learn, through first-hand experience, to exercise your own creative abilities while appreciating the uniqueness of each individual—and yet, at the same time, see the connectedness (the Oneness), through The Creator, of each.

When you can see these things without the apparent paradox created as the mind wrestles with the heart, you will have again taken a step forward along the evolutionary journey of “life”. Integration of the mind and heart allows one to more wisely precipitate unique situations wherein newness of thought will be born, and thus you have fulfilled a very basic desire of The Creation—that of newness, expansion, and growth.

You have at your disposal the same Creative Potential to effect change as do any of the so-called “elite” controllers of your world. Perhaps one of the greatest obstacles standing in the way of the dark energies is the fact that the mind-numbing techniques they use to keep the masses sleeping also make it very difficult to get these same masses too riled up. For the most part, the majority of people have grown quite numb to shock.

However, those of you who are inclined toward (and have chosen to seek) this sort of information are NOT numb. And the relatively small numbers of ones like you are the greatest threat to ones such as Clinton, Bush, Greenspan, or their counterparts in other countries, for you represent the Light of Exposure and an end to their game.

Please take these words to heart, for they are meant to give insight without usurping your free will. You must ultimately choose how it is you will focus and flow your energies.

You will have to choose whether to become part of the mass hysteria or to remain balanced while your world is seemingly falling apart. And though the slingshot may be being pulled even farther back, there will come a time when the masses go within and connect with Source. At that time there will be a great release of the stored energy, and the resulting infusion of Light will catapult your world forward into what many will end up calling the “Age of Radiance”.

I am Gyeorgos Ceres Hatonn. I come with the Host of God as promised, as a Messenger, Guide, and as a Friend. I serve the Lighted aspects of The Creation. I do this through the recognition of the Oneness of All That Is. To serve you, my brethren, is perhaps the greatest tribute in understanding I can possibly make to Creator Source—God of Light—for we are all ONE! In Light and Love, Salu.

CLASSIFIED ADS

Fill out the form below with your ad. If your ad runs longer, please write it out on a separate piece of paper and attach it to this form.

Signature _____

By signing you agree that the above ad is exactly as you want it to be presented in the paper.

Column inches are measured vertically. Each page has 3 columns and each column is 3.37" wide.

Display ads: Send your camera-ready ad and this order form to *The SPECTRUM* Ad Dept., P.O. Box 1567, Tehachapi, CA 93581, or feel free to use the fax. If you wish, you may send a 3.5" floppy disk or an IOMEGA zip disk with your camera-ready ad or ad information. The ad must be in Pagemaker or Photoshop 6.5 format, or have a graphic extension (i.e. tif, gif, jpg). Please send the best quality image you can. We will always do our best to make your ad look great; remember, poor quality camera-ready ads make poor ads. You may also send information via e-mail: spectrumads@tminet.com.

Classifieds: Classified ads are charged per line, at \$5 per line. There is not limit on how many lines your ad may be. An average line has between 40-44 characters (including spaces, letters, and punctuation). Classifieds are easy to do over the phone with a credit card.

Ads will only be processed when payment is received. Rates are locked-in only for as long as you commit; rates subject to change.

* Discounts: If you wish to run your ad for more than one issue, then discounts are as follows: For 2-6 issues, deduct 5%; for 7-12 issues, deduct 10%. (These discounts apply to classifieds as well as display ads.)

** Design fee: If you do not have a camera-ready ad, we can design a nice ad for you (at a rate of \$25/hour). Please call for an estimate.

All display and classified ads are due by the 15th of each month. Any ads received after the 15th are placed on a first come, first served basis, and any ads that do not make it into the upcoming issue will be placed in the next. We reserve the right to refuse any ad as an editorial decision. All payment will be refunded if this is the case. We reserve the right to resize ads to "fit" (ads will never be sized down, and you will not be charged for the larger ad size).

If you wish to place an ad that does not conform with the above chart, or you have any questions, please feel free to call us for cheerful answers .

Wisdom Books & Press, Inc.

The Biggest Secret

by David Icke

ISBN: 0-9526147-66

The long awaited NEW RELEASE by David Icke. The Blockbuster of all Blockbusters!! With stunning information never before released on the murder of Diana, Princess of Wales.

David Icke's most powerful and explosive book to date includes the astonishing background to the murder of Diana, Princess of Wales. Every man, woman, and child on the planet is affected by the stunning information that Icke exposes. He reveals in documented detail how the same interconnecting bloodlines have controlled the planet for thousands of years. How they created all the major religions and suppressed the spiritual and esoteric knowledge that will set humanity free from its mental and emotional prisons. It includes a devastating exposé of the true origins of Christianity and the other major religions, and documents the suppressed science which explains why the world is facing a time of incredible change and transformation. *The Biggest Secret* also exposes the true and astonishing background of the British Royal Family and, through enormous research and unique contacts, he reveals how and why Diana, Princess of Wales, was murdered in Paris in 1997. This includes information from a close confidant of Diana for nine years, which has never before been made public.

The Biggest Secret is a unique book and is quite rightly dubbed "The book that will change the world". No one who reads it will ever be the same again.

The Reptilian Agenda

Parts I & II

David Icke has produced two amazing videos with the Zulu "sanusi" or shaman, Credo Mutwa, who reveals astonishing information which, until now, was only available to the highest initiates of the African shaman tradition.

He has had attempts on his life and endless threats in an effort to silence him right up to the recording, but, as Credo says, "The world must know this—and know it now."

He reveals how a shapeshifting reptilian race (the "Chitauli" to Africans) has controlled humanity for thousands of years and how their bloodlines are in the positions of royal, political, and economic power today.

Credo Mutwa supports all the themes outlined in *The Biggest Secret* and adds his own unique knowledge and experience of travelling Africa for nearly 80 years.

These videos will re-write the UFO/extraterrestrial story in a way that will blow your mind. UFO researchers have ignored Africa and therefore ignored one of the greatest sources of knowledge on the planet.

While people still argue over Roswell and the extraterrestrial beings apparently found there, African tribespeople have been interacting with these ET "gods" for thousands of years, sometimes eating them, as Credo Mutwa did on one occasion with unforgettable consequences.

Credo has not only seen dead "greys" many times, he has seen them examined behind their "grey" exterior and he knows exactly what they really look like—and it is nothing like we think!

"This is the most amazing man it has ever been my honor to meet—a genius—and the importance of these videos is simply beyond words".

—David Icke

After making these videos, Credo was visited by two people from Cape Town who offered him 50,000 rand, and a house anywhere in South Africa he would like to name, if he would agree to never speak to David Icke again and never have anything to do with him. Credo's reply can be imagined!

Amazing Confirmation that a reptilian extraterrestrial race controlled the world for thousands of years

the reptilian agenda part one

"the most astonishing man it has been my honour to meet."

David Icke talks with the Zulu Shaman Credo Mutwa
